C

LAND MANAGEMENT:

SITE: Permanent pasture - sheep grazing. det for summer grazing

HALO: Permanent pasture but drier and evidence of higher fertilizer use.

D

DESCRIPTION/CONDITION OF MONUMENT:

The site of In Sant was not obvious. The visit followed a period of heavy rain and as the photos show there was a lot of surface water at all the boundaries. The most obvious pool was at photo 3 which is at the gateway into the next field. It is likely that none of the wetter areas

are obvious in summer and it is impossible to say where the site is. It was ironic to see a water tanker parked in the field photo 1.

POTENTIALLY THREATENING FACTORS: (see Table 1)
