C

LAND MANAGEMENT:

SITE: Typical upland sheep pasture - well managed. Thin soils over the site

HALO: as site

D

DESCRIPTION/CONDITION OF MONUMENT:

A broad mound on the highest point with fine views in all directions. A single stone lies close to the summit. It is completely grass covered apart from some erosion in the SW of the summit see photo 2

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

Some erosion caused by animals see photo 2 which being at an exposed site could deteriorate further unless it grasses over. No other risks.
