LAND MANAGEMENT:

SITE: a good cover of winter grass. No stock present at time of visit. The field is grazed by cattle and a silage cut is taken HALO: as site.

D

DESCRIPTION/CONDITION OF MONUMENT:

This feature is close to the field boundary and without the position bring marked on the map it would not be obvious. There is no pronounced hump or stones at the site. Past cultivations have probably reduced the size of the feature

POTENTIALLY THREATENING FACTORS: (see Table 1)
