LAND COVER:	
SITE:	Improved grassland. Small area of wet land (triangle shape) by drain, this area dominated by rushes. A little amount of bracken on the monument, & some rock/stones below or at ground level on site.

C

LAND MANAGEMENT:

SITE: } All managed as one field. No livestock present during visit. All of field except for wet area & the monument
HALO: } are dry & flat, & could be cut for hay or silage. Field appears well managed, tidy appearance, not over or under grazed, however, there is some evidence of cattle poaching,

D & a little amount of bracken on the monument which needs to be kept under control.

DESCRIPTION/CONDITION OF MONUMENT:

Map shows two mounds, A & B. photographs 1 to 5 are of A, which is believed to be the Hut platform, whilst 6 is a long shot of the two mounds, & 7 a shot of mound B. Mound B shows no resemblance to a hut platform, whereas A does (see map for shape of mounds). Mound A is in good condition, c. 1m above ground level of a rectangular shape. It has continuous ground (grass) cover with little evidence of slumping/erosion. Overall, a fairly smooth profile & continuous - clearly visible as a feature.

POTENTIALLY THREATENING FACTORS: (see Table 1)

1. Poaching.
2. Deep ploughing - pasture improvement
3. Dumping of earth, stones or rubbish.
4. bracken encroachment.

Overall, a monument in good condition, clearly visible as a feature, however, the nearby mound B is unidentifiable, & is not believed to be a part of the monument ~~ie mound A~~. Bracken needs to be kept under control.

The land is owned by Messrs Thomas, Hurllys Newydd (located up the hill out of Stambodog 1st farm on R towards Mynytho). It is important to gain permission - site can be seen from farm. Farmer and villagers are well aware of this USAR - Hurllys.
