C

LAND MANAGEMENT:

SITE: } Quite a few sheep present. Appear
well grazed (possibly over-grazed) as
dwarf shrub heath is not thriving.

HALO: } Overall, a well managed area of tidy
appearance.
Fairly steep, leading down to cliff edge,
used as rough grazing only.

D

DESCRIPTION/CONDITION OF MONUMENT:

precise location of monument not found. To
the naked eye there are no clear visible
features of the monument. As a result 6
wide angle photographs of the location
(site & halo) were taken to demonstrate this point.

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

1. Burrowing - quite a few rabbit holes were observed within halo.
2. Overgrazing by sheep!!!
3. Trampling on footpaths - a footpath crosses the halo/site.

D:DESCRIPTION/CONDITION OF MONUMENT

As with baseline survey the location of the monument was not found. Mynydd y Gwyddel is a fine viewpoint and being very close to the NT car park lots of visitors walk the path. Far fewer progress on to Trwyn y Gwyddel but the path does go through the site. No evidence of soil erosion.

Note the true location of photo baseline 1. Other baseline photo locations are marked on overlay for clarification.

Baseline photos 1 and 3 appear to miss out the site/halo.

An extra photo 7 was taken along the ~~the~~ ridge line looking towards Bardsey showing the site and halo.

Note that base photo 6 is the best photo to show marked site and location.
