PRN: 998

C

LAND MANAGEMENT:

SITE: Probably used for grazing. No livestock present when visited.

Sheep on adjacent fields.

HALO: Appears well managed - continuous grass cover + no scrub encroachment.

D

DESCRIPTION/CONDITION OF MONUMENT:

A roughly circular, saucer shaped feature. Banks form 2 distinct steps when viewed looking up the slope. Smooth profile with continuous grass cover. Part of site extends under a hedge. Diameter is approx 50m. Rabbit scrapes seen in area close to hedge.

Bank probably 1-1.5m above surrounding level.

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

Main threat is farm cultivation which will affect the banks. At present the feature is clearly visible.

Rabbit scrapes - see (A) on map. Not a great problem because no deep burrowing is involved.
