Grazed with sheep.
no sign of overstocking

D

DESCRIPTION/CONDITION OF MONUMENT:

There are 4 sites
/only one adjacent to deeply rutted track up
hillside, but in good condition.
Upper three remote from track, also in
good condition.

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

Lower platform adjacent to deeply rutted track
could cause potential hazard.
Upper 3 sites have little threat

C: LAND MANAGEMENT

Tracks onto hill appear more eroded than in baseline photos. Area appears quite heavily grazed - although Vaccinium is in good condition. Grass patches may be overgrazed - rabbit browsing may also be causing this.

D: DESCRIPTION/CONDITION OF MONUMENT

No change as such - growth of bracken obscuring one side (photo 6).

E: POTENTIALLY THREATENING FACTORS (see table 1)

Increased erosion along access track leading to damage lower house platform.
Overgrazing in surrounding area?

HALO: Sheep present.

D: DESCRIPTION/CONDITION OF MONUMENT

Evidence of greater 4WD traffic which is now coming closer to the 3 horse platforms higher up the hill.

No obvious damage to 4 sites - condition has not really changed from 1996 survey.

E: POTENTIALLY THREATENING FACTORS (see table at back of proforma)

Appears to be more 4WD access than in 1996. New tracks are more obvious especially around the 3 horse platforms higher up the hill. Area still highly grazed but Vaccinium is in good condition. No sign of any heather which seem to be present in some 1993 photos. Bracken growth still a small threat.
