DESCRIPTION/CONDITION OF MONUMENT:
Set or a remed outeres the stone ing stone were
ret amount several smalle stone valid over bronied
around it. The stone has now faller of over and from
the ments at the liene of the stone aros only bence
to a depth of just over linches.

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

Now the stone has faller there is the possibility

that it may be removed. The reoser for it falling

was probably because of the depth that it was bories

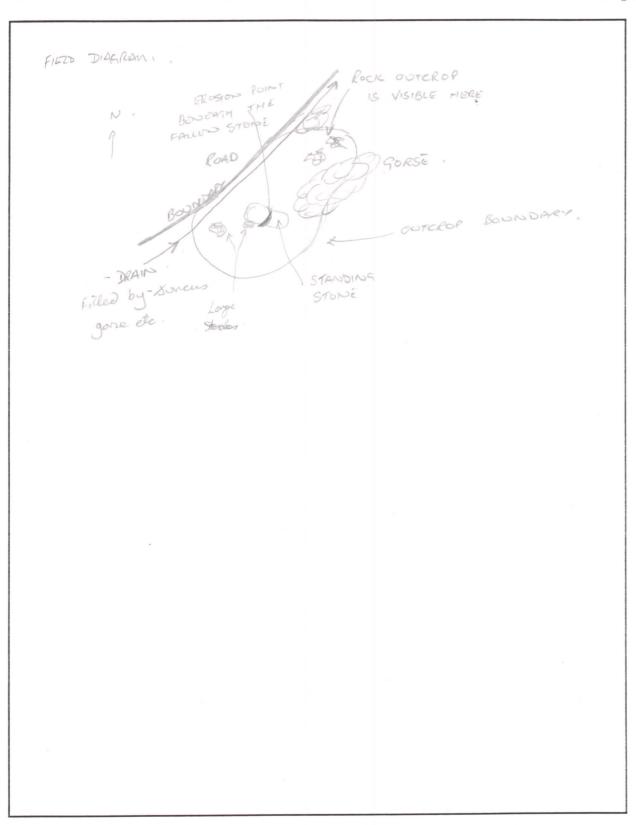

and from erosion at the stones have on the east side,

the development fell.
