

Improved Pasture.

YNYS MÔN ESA, HISTORIC MONITORING

BASELINE 1993

A

OS 1:10000 SHEET: SH 57 SW.	GRID REF: SH 5130 7180.
PRN: 2702 SITE NAME: EARTH WORKS, REMAINS OF BRYN GOF PENMYNYDD.	
AIR PHOTO No 230, 231	LANDSCAPE TYPE: 4
No GROUND PHOTOS: 3	Ridge and Vale.
DATE SURVEYED: 19/12/93	SURVEYED BY: Mosh Alexander
ACCESS: Mr HUGHES. THE BUTCHERS. LLANFAIR. P.G.	
CONSENT FOR RELEASE? YES ☐ NO ☐	

B

LAND COVER: SITE: A rich sward - mostly improved species - some areas of wetland seen by the presence of molinia, juncus etc. HALO: Similar to above, but with more areas of wetland.
--

YNYS MÔN ESA, HISTORIC MONITORING

BASELINE 1993

PRN: 2702

C

LAND MANAGEMENT:

SITE: Checked for grazing - the growth of the vegetation seemed to indicate that the area had not been grazed that year.

HALO:

As above.

D

DESCRIPTION/CONDITION OF MONUMENT:

Very little indication as to the location of the site.
A slight incline from the wetland - is the eastern boundary - while field boundaries occupy the south and west sides. Continued farming has amalgamated the site into the surrounding landscape.

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

Although not being grazed at present - because of the wetness of the site and any stock movements would lead to poaching.

CONTINUED? YES ☐ NO ☒

SUPPLEMENTARY NOTES TO FIELD SURVEYS PAGE OF PRN: 2702

FIELD DIAGRAM

TABLE 1

YNYS Môn ESA, HISTORIC MONITORING, BASELINE 1993

PRN: 2702

POTENTIALLY THREATENING FACTORS			
AGENT	PRESENT?	ACTION	SIGNIFICANCE
ANIMALS	☐	■ Burrowing - badgers, foxes, rabbits	■ damage/disturbance to underground artefacts
	☐	■ Overgrazing - cattle, horses, sheep	■ loss of vegetation cover/soil damage, leading to erosion
	☐	■ Poaching - cattle, horses, sheep	■ as above, possible damage to upstanding feature
	☐	■ Rubbing point/erosion focus point - cattle, horses, sheep	
HUMAN	☐	■ Demolition or removal of monument	■ active removal of artefacts/monument
	☐	■ Rubbish Dumping	■ infilling/contamination
	☐	■ Trampling/poaching - on footpaths/desire lines	■ loss of vegetation cover/soil damage leading to erosion
	☐	■ Mountain Bikes/Motorcross etc	■ as above
	☐	■ Deep Ploughing/Drainage Works/Building	■ damage/disturbance of artefacts
	☐	■ Shallow cultivation/Reseeds	■ as above
	☐	■ Tree/Scrub removal by uprooting	■ as above
	☐	■ Scrub Burning in Bonfires	■ intense heat at point source, damage to artefacts and alteration of soil profile
VEGETATION	☐	■ Root damage - trees and scrub (especially where deep rooted (heavy crowns)	■ damage/disturbance of artefacts
	☐	■ Tree Windthrow	■ potential massive damage/disturbance
	☐	■ Scrub Encroachment - bracken, gorse, rhodedendron, thorn	■ root or rhizome damage/disturbance (bracken least significant)
WEATHER/SITE FACTORS	☐	■ High rainfall/windspeeds - exposure	■ greater erosion risk than level, non exposed site
	☐	■ High Gradient	

Improved Pasture.
