BASELINE 1993

A

OS 1:10000 SHEET: SH 49 SE	GRID REF: SH 4656 9329.
PRN: 3567 SITE NAME: Ffynnon Eilean, holy well, Hanelian	
AIR PHOTO No 173	LANDSCAPE TYPE: Coastal Shelf.
No GROUND PHOTOS: 4	
DATE SURVEYED: 24/12/93	SURVEYED BY: MARK ALEXANDER.
ACCESS: M. Emrys Owen Peelton Farm Amledwr. Use coastal path.	
CONSENT FOR RELEASE? YES <input type="checkbox"/> NO <input type="checkbox"/>	

B

LAND COVER:
SITE: Coastal heath and dune - rock outcrop.
HALO: Coastal heath - Erica, Calluna, Agrostis Juncus, grass, Dandelion

YNYS MÔN ESA, HISTORIC MONITORING

BASELINE 1993

PRN: 3567

C

LAND MANAGEMENT:

SITE: Possibly grazed by sheep - otherwise none.

HALO: As above - also the area to covers the coastal fringe where there is a footpath - which is well used and managed.

D

DESCRIPTION/CONDITION OF MONUMENT:

The site is a spring from a rock face - surrounded by a rectangular wall - designed to hold the water. The wall divided into two halves, has collapsed on the one side filling the inside with rocks - while the other side is in reasonable condition. The spring has now moved down hill to an opening some 6 feet above the sea, although the site is still well

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

The exposed face of the fallen down wall is being eroded away quickly from the sea wind and animal and plant activity.

Scrub - is growing on the side of the good wall dislodging some of the stones.

Drain lines run close to the site - with the coastal path not far away.

CONTINUED? YES ☐ NO ☒

SUPPLEMENTARY NOTES TO FIELD SURVEYS PAGE OF PRN: 3567

TABLE 1

YNYS MÔN ESA, HISTORIC MONITORING, BASELINE 1993

PRN: 3567

POTENTIALLY THREATENING FACTORS			
AGENT	PRESENT?	ACTION	SIGNIFICANCE
ANIMALS	<input type="checkbox"/>	■ Burrowing - badgers, foxes, rabbits	■ damage/disturbance to underground artefacts
	<input type="checkbox"/>	■ Overgrazing - cattle, horses, sheep	■ loss of vegetation cover/soil damage, leading to erosion
	<input type="checkbox"/>	■ Poaching - cattle, horses, sheep	■ as above, possible damage to upstanding feature
	<input type="checkbox"/>	■ Rubbing point/erosion focus point - cattle, horses, sheep	
HUMAN	<input type="checkbox"/>	■ Demolition or removal of monument	■ active removal of artefacts/monument
	<input type="checkbox"/>	■ Rubbish Dumping	■ infilling/contamination
	<input checked="" type="checkbox"/>	■ Trampling/poaching - on footpaths/desire lines	■ loss of vegetation cover/soil damage leading to erosion
	<input type="checkbox"/>	■ Mountain Bikes/Motorcross etc	■ as above
	<input type="checkbox"/>	■ Deep Ploughing/Drainage Works/Building	■ damage/disturbance of artefacts
	<input type="checkbox"/>	■ Shallow cultivation/Reseeds	■ as above
	<input type="checkbox"/>	■ Tree/Scrub removal by uprooting	■ as above
VEGETATION	<input type="checkbox"/>	■ Scrub Burning in Bonfires	■ intense heat at point source, damage to artefacts and alteration of soil profile
	<input type="checkbox"/>	■ Root damage - trees and scrub (especially where deep rooted (heavy crowns))	■ damage/disturbance of artefacts
	<input type="checkbox"/>	■ Tree Windthrow	■ potential massive damage/disturbance
	<input checked="" type="checkbox"/>	■ Scrub Encroachment - bracken, gorse, rhodedendron, thorn	■ root or rhizome damage/disturbance (bracken least significant)
WEATHER/SITE FACTORS	<input checked="" type="checkbox"/>	■ High rainfall/windspeeds - exposure	■ greater erosion risk than level, non exposed site
	<input type="checkbox"/>	■ High Gradient
