BASELINE 1993

PRN: 5597

C

LAND MANAGEMENT:

SITE: Grazed similar to below - no attempt to reduce stock movements.

HALO: Improved pasture - heavily grazed.

D

DESCRIPTION/CONDITION OF MONUMENT:

Barely recognisable, a series of depressions in the ground and several large boulders, now buried, are all that remain. The depressions are however reasonably distinct and of irregular pattern so aiding their identification.

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

Poaching is a major problem - as is the possibility that the area could be drained and reseeded. It is a small area of an improved field. Some burning of scrub material has taken place on the site.
