

# Historic Environment Feature Management Report:

## **Ty Mawr barn**

Customer Reference Number: A0027987

UID: 310,850

'© Next Perspectives. Welsh Assembly Government 2009'

This management plan has been produced by Dyfed Archaeological Trust Heritage Management to inform the positive management of the identified Priority Historic Environment Feature. The identified management outcome will meet the objective for the Historic Environment Feature Targeted Layer as part of the Glastir Land Management Scheme.

**PRN** 38135 **Name** TY MAWR BARN  
**Period** Post-medieval **Site Type** BARN  
**NGR** SN6897894331

### **Site Description**

Field barn recorded on 1890 & 1906 Ordnance Survey maps. Rectangular building c.12m x 5m, aligned North-South; walls 1m thick. 2 blocked windows East wall; door & window West side + open fronted room South side, separated by recent wall. Walls survive to 2.5m high, blocked windows and more recent wall on South side. Situated on agricultural land adjacent to Forest Enterprise plantation. CAP 1999

### **Management Issues**

The main management issue for this site is the control of tree and/or scrub growth, which has the potential to damage buried archaeological remains through the disruptive activity of root development, and built structural remains by prising apart masonry bonds or wind throw.

### **Desired Management Outcome**

The management outcome is to maintain the earthwork and built structural remains of the barn in a stable and visible condition.

### **Management Actions**

Scrub growth is damaging to the long term survival of earthwork and built structural remains through the disruptive activity of root development. Trees can pose a threat through wind throw or falling limbs.

- Remove mature trees which are at risk of wind throw and could threaten upstanding remains of the longhouse and enclosure through uprooting (root plate damage) or falling limbs.
- Remove any young trees or vegetation growing out of the wall tops but cutting by hand. Spot treat to prevent re-growth. Do not pull-up by the roots as this is potentially destabilising to masonry bonds.
- Cut any scrub back by hand in order to retain the visibility of the building ruins.
- Where present maintain a canopy of mature trees over the site. This will reduce light reaching the ground, inhibiting scrubby vegetation growth.

## **Glastir Whole Farm Code**

Please also remember that, unless we have indicated otherwise, the Glastir Whole Farm Code should be observed for all historic features on your farm. The Whole Farm Code states that you must not damage any historic feature identified on your agreement map.

Definitions of damage to a historic feature include ANY of the following:

- Ground disturbance or excavation especially extending beneath topsoil.
- Dumping or storage of material, including temporary storage.
- Removal of any material, including stones, soil or subsoil.
- Visible signs of active erosion (loss and disturbance of topsoil) caused by livestock and vehicles or other agricultural practice.
- Planting trees.
- Allowing scrub to develop.
- Ploughing or reseeding.
- Displacing individual stone features.
