## **TIR GOFAL SITE MANAGEMENT CATEGORY**

As used in accompanying site gazetteer.

**Category A - Sites and Monuments of National Importance**

**Category B - Sites and Monuments of Regional Importance**

**Category C - Sites/Features of Local Importance**

**Category D - Sites/Features needing further investigation (including damaged sites or sites with no defined physical presence).**

## **TIR GOFAL COLOUR CODING**

As used on accompanying holding maps.

<b>Category A - Blue</b>	<i>Scheduled Ancient Monuments Grade 1 and 2* Listed Building</i>
<b>Red</b>	<i>Other Sites and Monuments of National Importance Other Buildings of National Importance</i>
<b>Red toning</b>	<i>Registered Parks and Gardens of Historic Interest</i>
<b>Red Banding</b>	<i>Registered Landscapes of Historic Interest</i>
<b>Category B - Amber</b>	<i>Sites and Monuments of Regional Importance Grade 2 Listed and Other Buildings of Regional Importance</i>
<b>Category C - Green</b>	<i>Sites / Features of Local Importance Buildings of Local Importance</i>
<b>Category D - Grey</b>	<i>Sites / Features of Unknown Importance</i>

## **ARCHAEOLOGICAL SITE STATUS**

Terms used in gazetteer.

### **SAM.**

Scheduled Ancient Monument. SAMs are notified under section 1 of the Planning (Listed Buildings and Conservation Areas) Act 1990. The register of SAMs is maintained and administered by Cadw.

### **LB1, LB2\* & LB2.**

Listed Building categories. Listed buildings are notified under section 1 of the Planning (Listed Buildings and Conservation Areas) Act 1990. The list is maintained and administered by Cadw.

### **HL - Landscapes of Exceptional and Great Historic Interest.**

Defined by the Register of Landscapes, Parks and Gardens of Special Historic Interest in Wales: Part 2.1 Landscapes of Exceptional and Great Historic Interest. The register is advisory only, and has no statutory powers. The register is being compiled by Cadw in partnership with the International Council on Monuments and Sites (ICOMOS) and is concerned with man-made, historic elements of the landscape.

### **HGP - Register of Historic Gardens & Parks.**

Defined by the Register of Landscapes, Parks and Gardens of Special Historic Interest in Wales: Part 1 - Parks & Gardens. The register is advisory only, and has no statutory powers. The register is being compiled by Cadw in partnership with the International Council on Monuments and Sites (ICOMOS) and is concerned with man-made, historic elements of the landscape.

<b>PRN</b>	2971	<b>Site name</b>	CASTLES BAY SOUTH	<b>NGR</b>	SM84570181
<b>Site type</b>	FLINTWORKING FLOOR	<b>Period</b>	Mesolithic;Neolithic	<b>Site Status</b>	

**Description**

Findspot. Flint working waste found in the 1960s.

**Recommendations**

No specific management recommendations.

<b>Site type</b>	FLINTWORKING FLOOR	<b>Period</b>	Mesolithic;Neolithic	<b>Site Status</b>	

**Description**

Findspot. Flint working waste found during the 1960s.

**Recommendations**

No specific management recommendations.

<b>Management Category</b>	D	<b>Visited by</b>	NAP	<b>Visited On</b>	28/11/99
----------------------------	---	-------------------	-----	-------------------	----------

<b>PRN</b>	3064	<b>Site name</b>	CASTLES BAY	<b>NGR</b>	SM84530180
<b>Site type</b>	CASTLE?;TOWER?	<b>Period</b>	Mediaeval	<b>Site Status</b>	

**Description**

The site is difficult to understand. It seems to have been used by the military. The headland is covered with rectangular hollows cut into the steep slopes - military? dark age huts?. The only masonry is part of a wall at the extreme east of the promontory. The whole area is now virtually cut off from the mainland. KM 1996. There had been no significant change to site between 1996 and this site visit.

**Recommendations**

This site lies within the scheduled ancient monument Castle Bay Hillfort PRN 3605 and is therefore protected under the current SAM agreement. Because the site is now virtually separated from the mainland the site is well protected.

<b>Management Category</b>	A	<b>Visited by</b>	NAP	<b>Visited On</b>	28/11/99
----------------------------	---	-------------------	-----	-------------------	----------

<b>PRN</b>	3065	<b>Site name</b>	CASTLES BAY	<b>NGR</b>	SM84550182
<b>Site type</b>	HILLFORT	<b>Period</b>	Iron Age	<b>Site Status</b>	SAM

**Description**

High survey priority. PC 1994 This site is beginning to suffer severe coastal erosion. The military site PRN 32777 has been built over its bank causing damage. KM 1996. The surviving section of the bank and ditch is suffering some erosion from visitors otherwise the site has not altered since the 1996 visit.

**Recommendations**

Limit grazing on the site. repair erosion by visitors. Liaise with Cadw regarding the best techniques for repairing erosion damage. All works will require Scheduled Monument Consent (SMC). Formal SMC applications must be made and permissions granted before any works can take place.

<b>PRN</b> 32776	<b>Site name</b> ANGLE	<b>NGR</b> SM84960165
<b>Site type</b> QUARRY	<b>Period</b> Post Med?	<b>Site Status</b>

**Description**

Small quarry approximately 10m in diameter and 2m deep located on the coastal slope partially infilled with recent debris. B Allen 1996. The site is now partially grassed over.

**Recommendations**

No specific management required.

<b>Management Category</b> D	<b>Visited by</b> NAP	<b>Visited On</b> 28/11/99
------------------------------	-----------------------	----------------------------

<b>PRN</b> 32777	<b>Site name</b> ANGLE	<b>NGR</b> SM84640183
<b>Site type</b> POSITION MARKER	<b>Period</b> Modern	<b>Site Status</b>

**Description**

R Thomas has listed this site under the term 'Position Finding Cell' RT125. This is an extensive site covering the area of the defensive banks of the hillfort 3065. All that remains are two small stone blocks one inscribed 'WD No.3 plus arrow' the other 'WD No.4 and arrow'. Some concrete rubble is also noted in the vicinity and a small circular earthwork possible anti-aircraft battery? The site is on the edge of the cliff in an area of recent slumping. B Allen 1996. The stone blocks noted in 1996 are no longer visible. 1999.

**Recommendations**

This site lies within the promontory fort Castle Bay Fort PRN 3065 and is therefore now protected as part of the scheduled monument.

<b>Management Category</b> A	<b>Visited by</b> NAP	<b>Visited On</b> 28/11/99
------------------------------	-----------------------	----------------------------

<b>PRN</b> 32779	<b>Site name</b> ANGLE	<b>NGR</b> SM84540221
<b>Site type</b> BRIDGE	<b>Period</b> Modern	<b>Site Status</b>

**Description**

Small concrete bridge military style-WWII? B Allen 1996. The bridge is maintained as part of the Pembrokeshire Coast Path.

**Recommendations**

Maintain in present condition.

<i>PRN</i>	33300	<i>Site name</i>	ANGLE	<i>NGR</i>	SM84730192
<i>Site type</i>	BATTERY	<i>Period</i>	Modern	<i>Site Status</i>	

**Description**

R Thomas refers to this site as number 246 searchlight battery. All that remains is a scattering of brick and concrete debris. B Allen 1996. The battery was built into a small boundary bank.

**Recommendations**

No specific management recommendations.

<i>Management Category</i>		<i>Visited by</i>	NAP	<i>Visited On</i>	28/11/99
<i>PRN</i>	33437	<i>Site name</i>	SOUTH STUDDOCK	<i>NGR</i>	SM85250134
<i>Site type</i>	LOOKOUT	<i>Period</i>	Modern	<i>Site Status</i>	

**Description**

Hexagonal stone built observation post with some brick additions. Now roofless and disused. B Allen 1996. A lookout house was shown in this position on the OS 2nd edition 6" map (1909) and it probably dates from the mid 19th century.

**Recommendations**

Maintain in present condition.

<i>Management Category</i>	C	<i>Visited by</i>	NAP	<i>Visited On</i>	28/11/99

<b>PRN</b> 39077	<b>Site name</b> SOUTH STUDDOCK	<b>NGR</b> SM84910189
<b>Site type</b> EARTHWORK	<b>Period</b> Post Med?	<b>Site Status</b>

**Description**

A grass covered mound c.3m x 2m x 0.6m high located just N of the coastal path. The mound seems unusual in this area and does not fit with the surrounding topography. The N end of the mound has been slightly truncated by vehicle tracks. The function of the mound is unknown it could be connected to the WWII activity which was widespread along the cliff top or it could be associated with the small-scale quarrying that occurred in the area or it could be the remains of a small burial mound.

**Recommendations**

Avoid further damage to its N end and maintain in present condition.

<b>Management Category</b> D	<b>Visited by</b> NAP	<b>Visited On</b> 28/11/99
------------------------------	-----------------------	----------------------------

<b>PRN</b> 39078	<b>Site name</b> SOUTH STUDDOCK	<b>NGR</b> SM85330203
<b>Site type</b> FARM	<b>Period</b> Post Med?	<b>Site Status</b>

**Description**

Farm complex consisting of a house PRN 39079, a stable PRN 39080, a cartshed PRN 39081, a cowshed, PRN 39082, and several modern concrete and metal barns. The name Studdock was first used in the 14th century when it was referred to as 'Stodhoc in Angulo'. The name means stud or stallion hook, the hook element being a hook or spur of land (Charles 1992, 673). It is not known when the name South Studdock was first used although it was probably during the 18th century. On the early OS maps (1809-10 and 1818) of the area the farm is shown with a number of buildings arranged around a square yard but on the tithe map only the house, PRN 39079, is shown. Curiously the house is shown as a rectangular building rather than the L-shaped house that seemed to be shown on the early OS editions and that survives today. It may be that a detailed drawing of the farm complex was not necessary for the purposes of the tithe map. There are a number of rounded gate pillars around the yard and the nearby fields that are in various states of repair. Rounded gate pillars are perhaps unique to South Pembrokeshire and they are an interesting feature of vernacular farm architecture.

**Recommendations**

A survey should be carried out of the house and yard buildings to determine the development history of the site and to provide an up to date record of the condition of the buildings. Any major defects recorded in the buildings by the survey should be repaired and consolidation works carried out where necessary. The rounded gate pillars should be renovated to their former condition.

------------------------------	-----------------------	----------------------------

<b>PRN</b> 39079	<b>Site name</b> SOUTH STUDDOCK	<b>NGR</b> SM85310201
<b>Site type</b> FARMHOUSE	<b>Period</b> Post Med?	<b>Site Status</b>

**Description**

An L-shaped stone house with gabled slate roof. The exterior is rendered but the house is probably stone-built. The building probably originates from the 18th century, although it is now much altered.

**Recommendations**

Survey house and yard buildings to determine the development history of the site and to provide an up to date record of the condition of the buildings.

<b>Management Category</b> B	<b>Visited by</b> NAP	<b>Visited On</b> 28/11/99
------------------------------	-----------------------	----------------------------

<b>PRN</b> 39080	<b>Site name</b> SOUTH STUDDOCK	<b>NGR</b> SM85310202
<b>Site type</b> STABLE	<b>Period</b> Post Med?	<b>Site Status</b>

**Description**

Stable constructed from 'Angle Blocks' with a tiled roof, the tiles have been turned through 45 degrees to give them a diamond pattern.

**Recommendations**

Survey the building to determine its development history and to assess its current condition. Make safe any defects.

<b>Management Category</b> B	<b>Visited by</b> NAP	<b>Visited On</b> 28/11/99
------------------------------	-----------------------	----------------------------

<b>PRN</b>	39081	<b>Site name</b>	SOUTH STUDDOCK	<b>NGR</b>	SM85310202
<b>Site type</b>	COACH HOUSE	<b>Period</b>	Post Med?	<b>Site Status</b>	

**Description**

Small two-storey coach house and store of random rubble construction with a corrugated tin roof built against the E end of the house PRN 39619. There are four openings in the front, N, wall two on the ground floor and two in the upper storey. Ground floor entry is via a brick arched opening now partially blocked while the upper storey was entered through a wooden door which is 1.5m above ground level and presumably reached in the past by wooden steps. There is a small square-headed window towards the E end of the ground floor and a slightly larger window placed centrally just below the eaves in the upper storey. Internally the floor for the upper storey has been removed but the joist holes are still visible in the walls. The building is currently used as a workshop. A stone-built wall runs E from the SW corner of the building to form the S side of the yard.

**Recommendations**

Maintain in present condition.

<b>Management Category</b>	B	<b>Visited by</b>	NAP	<b>Visited On</b>	28/11/99
----------------------------	---	-------------------	-----	-------------------	----------

<b>PRN</b>	39082	<b>Site name</b>	SOUTH STUDDOCK	<b>NGR</b>	SM85340204
<b>Site type</b>	COW SHED	<b>Period</b>	Post Med?	<b>Site Status</b>	

**Description**

Low single storey cow shed. Constructed largely from random rubble with a corrugated asbestos roof there is a modern brick extension on the N end. There are three openings in the front W wall two of which now have modern pens in front of them. Internally the floor was originally cobbled although part of it has been replaced by a modern concrete floor. The roof timbers are fastened by wooden pegs. There are some narrow ventilation slits in the walls. This building is beginning to show signs of age and some of the roof timbers are in a poor condition and there are cracks in the walls. A half-round stone gate pillar survives in good condition against the SW corner of the building. The remains of a similar rounded pillar form the other side of the entrance into the yard. This style of rounded pillar known locally as 'Jombs' are a feature peculiar to South Pembrokeshire.

**Recommendations**

Check the condition of the cow shed building and make good any defects. Retain the rounded gate pillar and rebuild the damaged pillar on the S side of the farm entrance.

----------------------------	---	-------------------	-----	-------------------	----------

<b>PRN</b>	39083	<b>Site name</b>	SOUTH STUDDOCK	<b>NGR</b>	SM84930219
<b>Site type</b>	BRIDGE	<b>Period</b>	Post Med?	<b>Site Status</b>	

**Description**

A stone-built bridge over a small stream. The bridge is of dry-stone construction 2-3m wide and stands in places to c.1.75m high. Both the bridge sides continue field boundary lines to create a funnel shaped entrance to another field on the opposite side of the stream. The bridge was not shown on the tithe map (1842) but it was on the OS 2nd edition 6" map published in 1909. The bridge is now overgrown with blackthorn and some cracks are evident in the bridge sides. The track over the bridge is very muddy so it is not known whether it was originally just a dirt track or whether it was metalled or paved.

**Recommendations**

Clear the vegetation from the bridge itself and consolidate the structure.
