EARLY MEDIEVAL ECCLESIASTICAL SITES IN PEMBROKESHIRE

STAGE 2: ASSESSMENT AND FIELDWORK

1.0 SUMMARY

The early medieval ecclesiastical sites project (EME) was initiated by Cadw, through the four Welsh Trusts, in 2001. The aim of the project is to identify ecclesiastical sites in Wales with pre Anglo-Norman Conquest origins, in order to formulate management strategies and scheduling priorities. Cambria Archaeology (Dyfed Archaeological Trust) was appointed to cover the counties of Carmarthenshire, Ceredigion and Pembrokeshire, in which the cut-off date of 1100 was selected.

Early medieval ecclesiastical sites fall into two main categories -

- *Church/chapel sites, ie. 'developed' cemetery sites*
- *Open cemetery sites, ie. 'undeveloped', never having received a building. These include a number of bronze age round barrows and iron age enclosure re-use sites. These open sites are usually more difficult to identify and assess.*

Stage I of the project consisted of a desk-based assessment of the three counties, using the Sites and Monuments Record (SMR) as the baseline data. From this assessment emerged a graded list of 154 sites with probable or possible early medieval origins, in addition to a list of 116 Early Christian Monuments (ECMs).

Stage 2 comprised analysis of aerial photographs of all 154 sites, and selective field visits in order to assess their nature, extent, condition, archaeological potential, threats and value. As a result, the list of 154 sites was amended and refined to a list of 150 sites, comprising -

	2003	(2002)
▪ *Grade A sites (high probability)*	*27*	*(27)*
▪ *Grade B sites (medium probability)*	*29*	*(33)*
▪ *Grade C sites (low probability)*	*29*	*(43)*
▪ *Grade D sites (possible sites)*	*65*	*(51)*

In addition -

▪ *Early Christian Monuments (ECMs)*	*116*

The main outcome from Stage 2 has been the enhancement and refinement of both the SMR and the schedule, with the formulation of management strategies, scheduling priorities and recommendations for future archaeological investigation.

One of the outcomes of this assessment is a demonstration that many of the traditional indicators and suppositions do seem to hold true ie. circular churchyards, in situ *ECMs and 'Celtic' dedications are often accompanied by other evidence for early medieval origins. Re-use of iron age sites, and the former presence of large, curvilinear outer ecclesiastical enclosures were suggested at a large number of new sites. In addition, the former location of ECMs, topographic evidence and post-Conquest documentary sources were used to suggest early medieval origins for several new sites. However, it was also demonstrated that the 'native' ecclesiastical tradition was remarkably persistent, particularly in the north of the county where, for example, at least two cist cemeteries can be dated to the 13th century, and where the pilgrimage cult that developed around the Welsh saint Brynach reached its peak just before the Reformation.*

2.0 ALPHABETICAL LIST OF SITES AND EARLY CHRISTIAN MONUMENTS (ECMs), BY PARISH (with PRNs)

2.1 Sites

Ambleston (St Mary), churchyard	PRN: 46766
Amroth (St Elidyr), churchyard/enclosure	PRN: 46767
