The following sites have been identified by Cambria Archaeology's Deserted Rural Settlements project team as worthy of consideration for Scheduled Ancient Monument Status.

The list includes deserted settlement sites that are single structures as well as many which are groups of settlement related features that include a presumed dwelling component and ancillary structures. Where there are multiple features, they are grouped together in this document to make their relationships evident.

Paul Sambrook,
February 2004.

PRN... 8345 NGR... SN79254270 FORM/CONDITION...Building/C

 NAME...TROED Y RHIW
 COMMUNITY.....Llanfair-ar-y-bryn
 LAND USE.....Pasture Grass
 DIMENSIONS (Max height/Min Height/Max Width/Min Width/Max Length/Min
 length)....0.3//7//10
 SITING.....Natural Terrace/Flat/Middle/Sheltered
 ORIENTATION...NNW-SSE
 ASPECT.....E
 PROXIMITY.....
 VIEWS.....Good to the east and south.
 DESCRIPTION....Possible deserted settlement site. A sheepfold is marked at
 this NGR on the 1985 OS Pathfinder map. RPS 10.2001;This is an outstanding
 long hut. It has a drainage gully and grassed over, but stone built, wall
 bases (1m wide). There is an entrance in the NNE lateral wall. The site is
 on a public footpath and has a 180 degree panoramic view. Slight erosion is
 visible at the NNW end (sheep burrowing?). Possible other earthworks?/
 midden?, sited immediately to the NE. PR 2003 based on RPS 2003

 ORIENTATION...N-S
 ASPECT.....N
 PROXIMITY.....
 VIEWS.....Good to the north
 DESCRIPTION....This structure was recorded in 1988 as a long hut and
 described as a "Rectangular building c.7.5m x 4.3m in similar location to
 PRN 13416. Walls are 0.75m wide. Possibly partitioned in half by a
 cross-wall. It was reassessed in 2003, and linked with PRN 13418, as
 a single longhouse, described thus; "This is a two celled longhouse, with a
 third cell added to the north end. The overall measurements for the
 longhouse are 8m N-S x 5m, with drystone wall bases up to 1m thick and up
 to 0.3m high. There is a fall of c.0.3m from the south cell to the north
 cell. Built of often large stone blocks, with the south end surviving best.
 The structure is largely obscured by reeds. NGR amended from SN75332068. PR

 length)....1//4//12
 SITING.....River Terrace/Gentle/Middle/Sheltered
 ORIENTATION...N-S
 ASPECT.....N
 PROXIMITY.....Streams within 20m to east and west
 VIEWS.....Excellent to the north, very picturesque
 DESCRIPTION...Rectangular building 11.8m x 4.0m situated on a platform
 near Fforch Ceulan. Aligned N-S long axis of building is perpendicular to
 contours. Partitioned by cross-wall in ratio of 2:1. Walls of upper larger
 division are 1.2m wide and of other 1.0m wide; The lower division is a
 more roughly built "sheepfold", but it is integral to the dwelling in the
 upper portion. The term "Longhouse" is therefore correct. This site is
 reminiscent of the style of longhouses at Blaenbrefi and Llanddewi Brefi.
 The walls of the structure are up to 1m high in the lower division, 0.3m
 high in the upper. The site is located on a spur between two streams. NGR
 amended from SN75312018. PR 2003 based on RPS 2003

 ORIENTATION...NE-SW
 ASPECT.....S
 PROXIMITY.....Stream 2m to the SW
 VIEWS.....Good views south towards Rhosamman
 DESCRIPTION....Single chambered rectangular building 5.8m x 4.7m at level
 sheltered location close to stream. Walls are 1.0m wide and up to 0.4m
 high.;There is a slight reed filled depression within the structure. The SW
 end appears to have been left open, creating a U-shaped structure. The wall
 bases consist of large stone blocks protruding through grass, with some
 smaller stones infilling. This is possibly a fold. It could be a long hut
 but the open end and almost square plan suggest otherwise. PR 2003 based on

DESCRIPTION....Single compartmented long hut. RPS 11.2001;This long hut
appears to have apposed entrances to the centre of the lateral walls, but
this impression may be false as a recent sheep track cuts through the site.
Appears to be one of a group of possible Mediaeval Hafotai on the breast of
this hill. It is built on the slope, slightly terraced into the slope
possibly. Wall bases are low, no more than 0.2m high and defined by stones
protruding through the surface. NGR amended from SN69171523. PR 2003 based

 11.2001.01;A well preserved long hut. The walls have fallen inwards - some
 evidence of coursing is visible. They are now only 0.3m high at most and 1m
 wide. The long hut appears to have a single cell only. There seems to have
 been some slight modification, post-abandonment, to create a sheep shelter.
 A stone spread at the SE end, outside the hut may be a fallen gable and may
 obscure another cell or an ancillary cell. There is a nice drystone fold to
 the NE c.10m x 15m NE-SW. NGR amended from SN77131699. PR 2003 based on RPS
