1. Crynodeb

Balchder Bro sydd wedi comisiynu ac ariannu'r ddogfen hon, ar gyfer Ardal Gymunedol Llangadog, a gwnaed y gwaith yn ystod tri mis cyntaf 2004. Bwriad yr arolwg yw i ddarparu gwybodaeth er mwyn galluogi datblygu rhaglen ddehongli o fewn i'r gymuned.

Fel rhan o'r prosiect gwnaed ymchwil hanesyddol o'r Cofnod o Safleoedd a Henebion Rhanbarthol yn bennaf, a hynny yn ardal de orllewin Cymru a hefyd o ganlyniad i'r ymgynghori cyhoeddus a gynhaliwyd ar yr 28ain Ebrill 2004. Cafwyd gwybodaeth werthfawr mewn perthynas â gwybodaeth hanesyddol ac archaeolegol sydd heb ei gofnodi'n flaenorol o fewn cymuned Llangadog. Darparwyd gwybodaeth bellach gan y cofnodion o dderbyniadau (eitemau sydd wedi'u rhoi) o Ardal Gymunedol Llangadog ac a gedwir gan Amgueddfa Sirol Sir Gaerfyrddin. Mae'r wybodaeth hon wedi'i chyfuno er mwyn cynhyrchu adroddiad terfynol y prosiect hwn, ac i wella'r Cofnod o Safleoedd a Henebion Rhanbarthol ar gyfer cymuned Llangadog a rhanbarth de orllewin Cymru.

Mae'r adroddiad yn tynnu sylw at yr amrywiaeth a'r cyfoeth aruthrol o olion archaeolegol o fewn cymuned Llangadog, ac mae ei threftadaeth yn ased diwylliannol, dehongliadol ac economaidd pwysig. Tynnir sylw at sawl thema y gellir eu defnyddio ar gyfer unrhyw gynllun dehongli yn y dyfodol.

2. Arolwg Treftadaeth Cymuned Llangadog

2.1 Yr Arolwg

Mae gan Ardal Gymunedol Llangadog dreftadaeth archaeolegol sy'n gyfoethog o ran cynnwys ac amrywiaeth ac mae'n cynnwys enghreifftiau o sawl math o safleoedd archaeolegol y gellir dod o hyd iddynt yn nyffryn Tywi a dwyrain Sir Gaerfyrddin gyfan. Mae'r adroddiad hwn yn ceisio dod â'r wybodaeth sy'n wybyddus am safleoedd archaeolegol a hanesyddol o fewn ffiniau ardal Cyngor Cymuned Llangadog fel ag y mae heddiw ynghyd ac mae'n ganlyniad i waith ymchwil hanesyddol ac ymgynghori cyhoeddus. Balchder Bro sydd wedi comisiynu ac ariannu'r gwaith, ac ymgwymerwyd â'r gwaith gan Archaeoleg Cambria yn ystod tri mis cyntaf 2004.

2.2 Cydnabyddiaeth

Hoffai Archaeoleg Cambria ddiolch i Jenny Hall a Paul Sambrook, am eu gwaith wrth gynhyrchu drafft cynharaf yr arolwg hwn, a Mr Gavin Evans, Curadur Amgueddfa Sirol Sir Gaerfyrddin, am ddarparu manylion o'r casgliadau o ardal Llangadog sydd yn yr amgueddfa. Gair o ddiolch yn arbennig i aelodau'r cyhoedd wnaeth gynorthwyo i gynhyrchu'r ddogfen hon trwy gyfrannu gwybodaeth, ffotograffau a dogfennau sydd wedi caniatáu i ni wella Cofnod o Safleoedd a Henebion Cymuned Llangadog a de orllewin Cymru.

2.3 Amcanion

Gosodwyd yr amcanion canlynol fel y briff ar gyfer y prosiect:-

1. I gynhyrchu adroddiad ar dreftadaeth archaeolegol cymuned Llangadog, gan gynnwys rhestr o safleoedd gyda mapiau perthynol.
2. I wella'r Cofnod o Safleoedd a Henebion rhanbarthol (SMR) ar gyfer Ardal Gymunedol Llangadog fel cofnod cynaliadwy.

2.4 Methodoleg

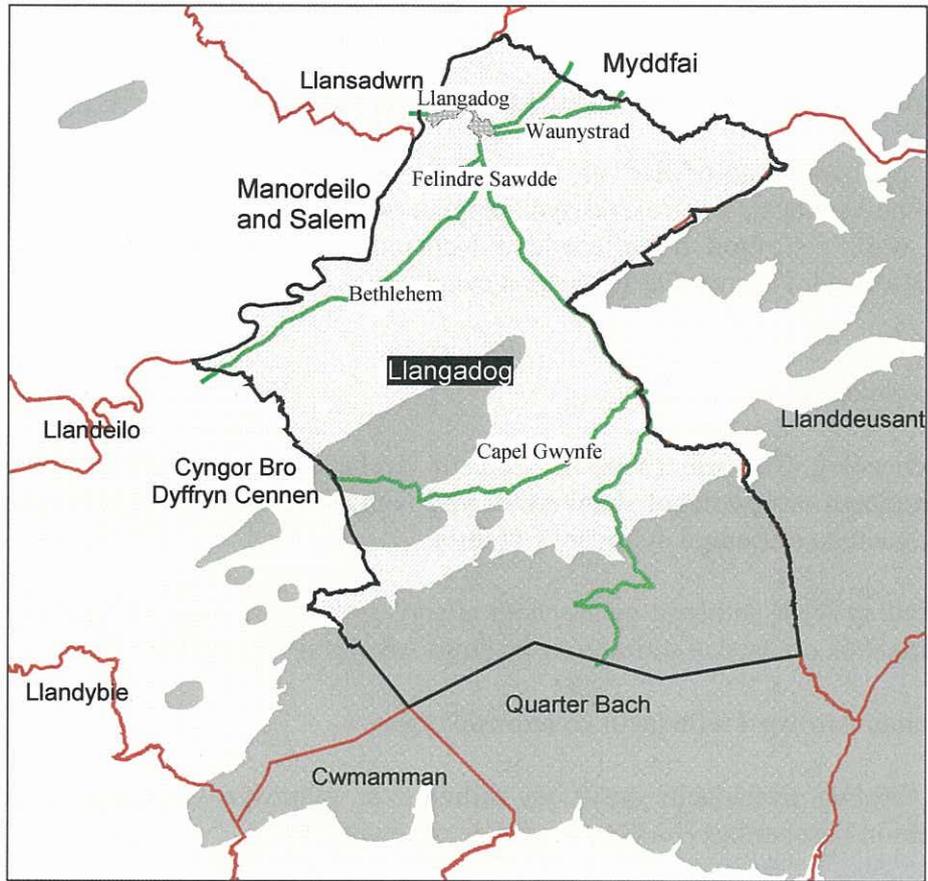

Mae Archaeoleg Cambria (Ymddiriedolaeth Archaeolegol Dyfed) yn un o'r pedwar ymddiriedolaeth archaeolegol rhanbarthol yng Nghymru. Mae addysgu'r cyhoedd yn un o swyddogaethau elusennol sylfaenol Cambria.

Mae'r mudiad wedi datblygu gwasanaeth allanol gyda'r nod o gynorthwyo cymunedau i gymryd mantais o'i asedau treftadol trwy lunio Arolygon Treftadaeth.

Prif elfennau Arolwg Treftadaeth Gymunedol yw: -

- Creu arolwg treftadaeth drafft yn seiliedig ar gynnwys y Cofnod o Safleoedd a Henebion rhanbarthol (SMR) ar gyfer de orllewin Cymru.
- Ymgynghori gyda'r cyhoedd er mwyn gwneud yn siŵr fod gan bobl leol y cyfle i gyfrannu i'r gwaith o gasglu gwybodaeth hanesyddol, yn ogystal â rhoi sylwadau ar flaenoriaethau treftadol y gymuned. Gwneir hyn trwy gynnal cyfarfodydd cyhoeddus a dosbarthu taflenni sy'n casglu gwybodaeth.
- Cynhyrchu adroddiad terfynol sy'n cynnwys yr holl wybodaeth ac a fydd yn caniatáu paratoi argymhellion ar gyfer gwaith dehongli a rheoli adnodd treftadol y gymuned.
- Gwella'r SMR rhanbarthol trwy ychwanegu gwybodaeth sy'n newydd neu sy'n cywiro ac a gynhyrchir trwy ymgynghori â'r gymuned a thrwy waith ymchwil ar y prosiect.

Mae'r holl elfennau hyn wedi'u cynnwys yn Arolwg Treftadaeth Llangadog. Cynhaliwyd y cyfarfod cyhoeddus cymunedol ar yr 28ain Ebrill.

Map 2/ Mapiau 2: Cymuned Llangadog/ Llangadog Community

3 Treftadaeth Gymunedol Llangadog

3.1 CYNHANESYDDOL

Mae gan Langadog nifer fawr o safleoedd cynhanesyddol o ddiddordeb, gan gynnwys mannau darganfod arteffactau cynhanesyddol, safleoedd claddu a rhai safleoedd anheddu.

Yr arteffact cynharaf o bosib a gofnodir yn yr Ardal Gymunedol yw llawfwyell fflint (PRN 913) a adroddir ei bod yn dyddio o ddyddiad Palaeolithig (250,000CC – 10,000CC), a ddarganfuwyd yn 1968 ond ni wyddir am ragor o wybodaeth. Poblogaeth wasgaredig fyddai yn yr ardal bryd hynny, ac fe fyddai wedi'i heffeithio gan haenau o iâ rhewlifol. Daeth yr Oes Iâ ddiweddaraf i ben c 10,000CC. Mae'r dystiolaeth o ran gweithgarwch dynol yn ystod y cyfnod hwn yn ymwneud â phresenoldeb grwpiau o helwyr-gasglwyr a fyddai o bryd i'w gilydd wedi defnyddio'r dirwedd leol.

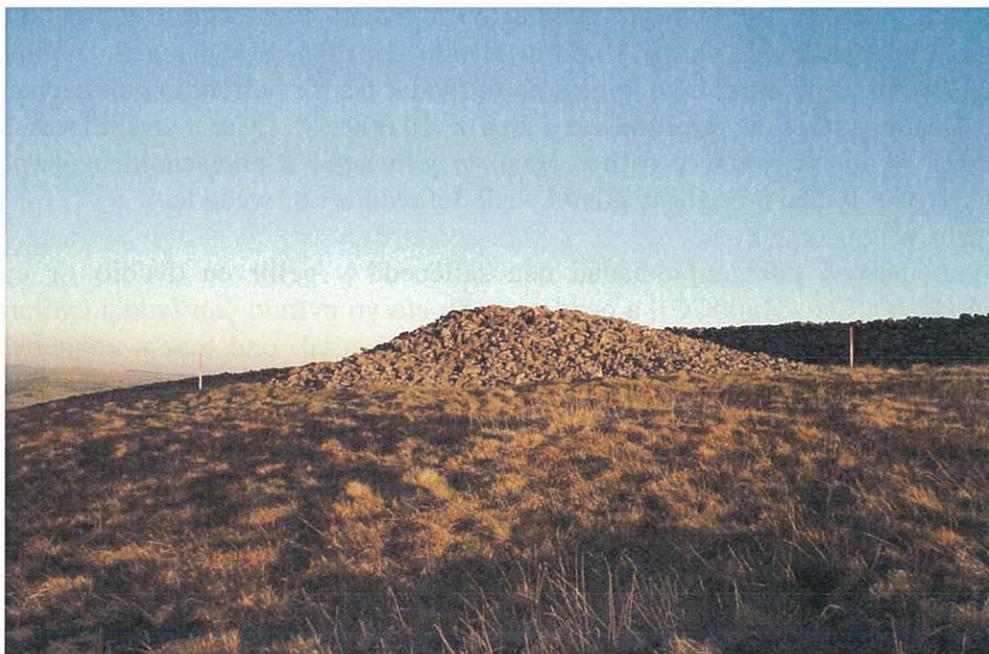

Nid oes yna unrhyw ddarganfyddiadau neu safleoedd y gellir eu dyddio i'r cyfnod Mesolithig (10,000CC – 4500CC), a oedd unwaith eto yn gyfnod pan fyddai cymunedau o helwyr-gasglwyr yn defnyddio adnoddau naturiol yr ardal, ond mae'n annhebygol y byddent wedi sefydlu unrhyw anheddiadau sefydlog oherwydd credir mai grwpiau crwydrol oeddynt yn eu hanfod.

Mae yna sawl safle posib sy'n perthyn i'r cyfnod Neolithig (4500BC – 2200BC), y cyfnod pan oedd yn debygol y byddai'r ffermwyr cyntaf wedi anheddu yn yr ardal. Fel ffermwyr, roedd y bobl Neolithig yn byw mewn cymunedau sefydlog ac ar eu holau fe fyddent wedi gadael sawl cofeb gladdu drawiadol, yn enwedig beddrodau siambr neu gromlechu. Mae yna bedwar safle claddu Neolithig yng nghymuned Llangadog (PRN 4044, 4045, 5519 a 34670) er mai dim ond un o'r rhain, Waun Pwtlyn (PRN 4044, Plât 1.) sydd wedi'i gadarnhau fel safle dilys, a ddisgrifir fel crug hir Neolithig tebygol ac a ddiogelir fel Cofeb Hynafol Rhestredig.

Plât 1. Crug Hir Waun Putlyn (PRN 4044)

Mae'r rhan fwyaf o gofodeiladau cynhanesyddol yn yr Ardal Gymunedol yn dyddio o'r Oes Efydd (2200CC – 700CC). Mae mwy na 50 o domenni claddu, carneddau a meini hirion wedi'u dynodi neu credir eu bod yno yn yr ardal sy'n dyddio o'r Oes Efydd. Mae'r mathau hyn o gofebau yn aml iawn yn cael eu cysylltu gyda chorfflogsiad a gwelir llawer ohonynt ar hyd cefnennau a phigau'r Mynydd Du ac ar hyd bryniau lleol megis Garn Goch a Trichrug (Plât 2.).

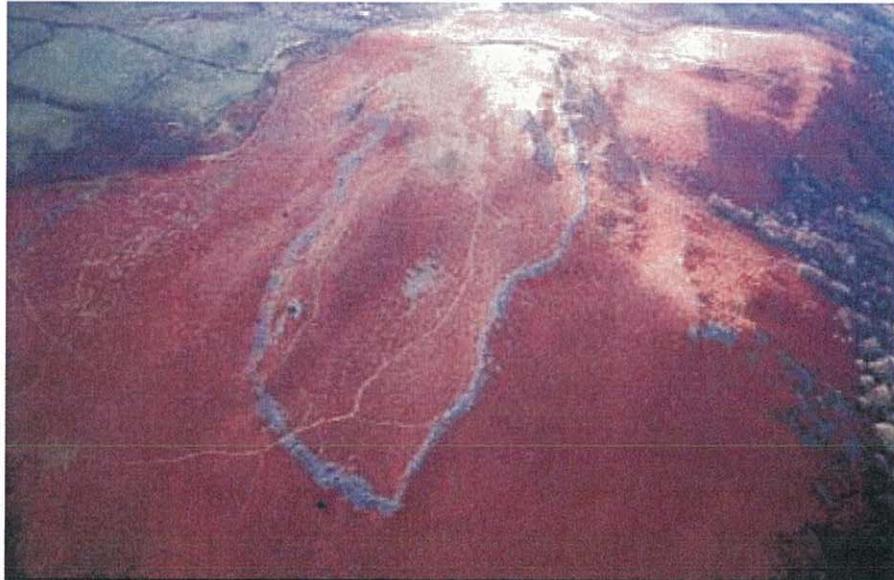

Plât 2. Carn Trichrug (Prn 900)

Ffermwyr oedd wedi anheddu oedd cymunedau'r Oes Efydd, ac eto ychydig iawn o'r safleoedd anheddu hyn o'r cyfnod sydd wedi'u canfod yng ngorllewin Cymru. Serch hynny, mae'r nifer fawr o safleoedd claddu yn dystiolaeth fod yna boblogaeth gweddol sylweddol wedi anheddu'r rhan hon o'r wlad. Mae'n bosib fod rhai o'r cylchoedd cytiau a gofnodir ar dir comin ar y Mynydd Du efallai'n dyddio o'r cyfnod hwn, ond ni allwn fod yn bendant ynglŷn â hyn ar hyn o bryd. Mae yna nifer fechan o arteffactau sydd wedi'u darganfod yn Ardal Gymunedol Llangadog yn dangos fod yna boblogaeth yn byw yma yn ystod yr Oes Efydd. Mae'r arteffactau hyn yn cynnwys bwyell carreg (PRNs 4050 & 4054) a chylllell fflint (PRN 909). Darganfyddiad pwysig o'r Oes Efydd yw breichledi aur (PRN 1) o Faenordeilo, ychydig y tu allan i'r Ardal Gymunedol sy'n rhoi arwydd pellach i ni o bresenoldeb poblogaeth soffistigedig sydd wedi anheddu yn y rhan hon o ddyffryn Tywi mwy na 3000 o flynyddoedd yn ôl.

Mae archaeoleg yr ardal yn yr Oes Efydd yn nodedig am ei safleoedd claddu, mae archaeoleg o'r Oes Haearn yng ngorllewin Cymru yn nodedig am ei safleoedd anheddu, ychydig iawn o safleoedd claddu o'r Oes Haearn sydd yn y cofnod archaeolegol. Mae'r Oes Haearn yn cynnwys y cyfnod o c. 700CC tan y goncwest Rufeinig, a ddigwyddodd yn yr ardal erbyn c. AD74. Mae de orllewin Cymru yn ystod yr Oes Haearn wedi'i nodweddu gan nifer o ffermydd bach gwasgaredig. Byddai pob un o'r rhain yn fwy na thebyg yn cynnwys y tai crwn lle byddai grŵp teuluol estynedig yn byw. Mae rhai bryngaerau mwy o faint yn dynodi elfen o reolaeth ganolog, wleidyddol.

Mae yna bum bryngaer yr ydym yn gwybod amdanynt yn Ardal Gymunedol Llangadog. Mae'r rhain yn cynnwys y safleoedd gwyh ar Garn Goch ger Bethlehem. Mae'r mwyaf o'r safleoedd hyn yn cynnwys , Y Garn Fawr (PRN 887), yn un o'r bryngaerau mwyaf yng Nghymru (Plât 3.). Mae'n bosib fod y rhagfur anferth o carreg wedi bod yn amddiffynfa i'r boblogaeth amaethyddol o amgylch mewn amserau o drafferthion. Serch hynny, efallai ei fod hefyd yn symbol o rym gwleidyddol y pennaeth lleol pwerus.

Ychydig iawn yr ydym yn ei wybod ar hyn o bryd ynglŷn â bywydau bob dydd y ffermwyr lleol o'r Oes Haearn. Dim ond un neu ddau o ddarganfyddiadau sydd o bosib yn arteffactau o'r Oes Haearn neu'n Frythonig-Rufeinig yr ydym yn gwybod amdanynt yn lleol er mwyn dod â ni i gyswllt â'r boblogaeth amaethyddol. Mae rhan o lawfelin, sef y math a ddefnyddiwyd i falu grawn, wedi'i ddarganfod ger Felindre Sawdde (PRN 847) a throellen cogail carreg, a ddefnyddiwyd i nyddu gwlân â llaw, wedi'i darganfod ger Bryn Meilwch (PRN 11210). Mae pob un o'r darganfyddiadau yn arwyddocaol gan eu bod yn dweud wrthym fod cnydau yn cael eu tyfu a bod y cymunedau lleol yn cadw gwlân ar ddiwedd y cyfnod cynhanesyddol.

Plât 3, Y Garn Fawr (PRN 887)

3.2 RHUFEINIG A CHANOLOESOEDD CYNNAR

Mae presenoldeb y Rhufeiniaid yn nyffryn Tywi yn agwedd gyfarwydd o ran hanes lleol. Erbyn AD47 roedd y lluoedd Rhufeinig wedi darostwng y llwyth Demetae brodorol ac yn dal gafael gadarn dros yr ardal trwy rwydwaith o gaerau milwrol. Yn ystod y cyfnod o wrthdaro wnaeth y byddinoedd Rhufeinig sefydlu canolfannau dros dro a elwir yn “wersylloedd cyrch”, ceir enghreifftiau o’r rhain yng nghymuned Myddfai sydd gerllaw. Adeiladwyd caerau mwy sefydlog yn Llanymddyfri a Llandeilo a feddiannwyd mor hwyr â’r ganrif 1af ac 2il, yn fwy na thebyg adeiladwyd y rhain er mwyn selio’r goncwest yn yr ardal, ac yn dilyn hynny er mwyn cadw heddwch a threfn. Roedd yna ffordd yn cysylltu’r rhain ar hyd ochr orllewinol dyffryn Tywi a oedd yn ffurfio rhan o’r rhwydwaith ehangach o ffyrdd Rhufeinig, a oedd yn cynnwys y wlad gyfan. Mae’n bosib fod yna anheddiadau *vicus* wedi datblygu y tu allan i’r caerau hyn, gan roi llety i’r dinasyddion a oedd ynghlwm wrth fasnach a’r gwarchodluoedd milwrol. Serch hynny, mae’n debygol mai ffermio’r tir oedd trwch y boblogaeth yn ei wneud o hyd. Gydag amser, byddai arferion a sefydliadau Rhufeinig, a’r iaith Ladin, wedi cael dylanwad sylweddol ar bob ran o gymdeithas.

Er bod yna dystiolaeth archaeolegol gref bod byddinoedd Rhufeinig wedi bod yn bresennol mewn sawl cymuned wrth ymyl Llangadog, ychydig iawn o dystiolaeth sydd wedi’i gofnodi ar hyn o bryd o’r cyfnod hwn o fewn yr Ardal Gymunedol ei hunan. Mae un safle Rhufeinig, neu Frythonig-Rufeinig, dyddiad (rhwng AD74 a AD410) wedi’i gofnodi’n lleol, ond efallai mai dyma un o’r safleoedd mwyaf diddorol a geir yn rhan ganol dyffryn Tywi. Yn 1961 cafodd Llys Brychan (PRN 4047) ei gloddio’n rhannol, pan gafodd yr hyn a gredir i fod yn faddondy Rhufeinig ei ddiorchuddio. Mae arsylwadau diweddarach yn awgrymu ei bod ynghlwm wrth ddatblygiad tebyg i fila mwy sylweddol, y credir sy’n dyddio o gyfnod rhwng c. AD200 – AD400, yn gartref i deulu lleol cyfoethog oedd wedi’i Rhufaineiddio. Efallai ei bod yn arbennig o arwyddocaol bod Llys Brychan wedi’i leoli yn agos at y bryngaerau o’r Oes Haearn ar Y Garn Goch. Rydym yn gwybod y cafodd y bryngaerau eu gadael yn segur yn dilyn y goncwest Rufeinig a bod y dosbarthiadau oedd yn rheoli wedi mabwysiadu arferion a chyfreithiau’r Rhufeiniaid yn gyflym iawn. Mae’n bosib fod y fila yn Llys Brychan yn cynrychioli cartref aelod pwysig mewn cymdeithas leol, efallai un o ddisgynyddion pennaeth a oedd unwaith yn rheoli’r ardal o’r bryngaer.

Mae hefyd yn bosib fod Llys Brychan yn gyswllt rhwng y byd Rhufeinig a’r gymdeithas Frythonig a ymddangosodd ar ddiwedd y cyfnod Rhufeinig, ac a nodwyd wrth i awdurdod ymerodraethol Rhufeinig ymadael ar ddechrau’r 5ed ganrif. Datblygodd nifer o deyrasoedd bychain yn y cyfnod Ôl-Rufeinig yng Nghymru, gyda’r llys yn ganolbwynt i bob teyrnas. Mae’n bosib mai dyma oedd Llys Brychan, sy’n esbonio’r enw. Serch hynny, nid oes yna unrhyw dystiolaeth archaeolegol ar hyn o bryd i gadarnhau hyn. Mae yr un mor bosibl bod traddodiad wedi datblygu’n ddiweddarach sy’n cysylltu adfeilion yr hen fila Brythonig-Rufeinig hynafol gyda sedd bwerus y llywodraethwr o’r canoloesoedd cynnar Brychan Brycheiniog. Roedd Brycheiniog yn dylanwadu dros lawer o Ganolbarth Cymru gan gynnwys Sir Frycheiniog, a dyma sut y cafodd yr ardal honno ei henwi.

Roedd y canoloesoedd cynnar (AD410 – AD1094), tan yn ddiweddar, yn cael ei adnabod fel yr “Oesoedd Tywyll” ac yn wir mae yna brinder gwybodaeth ynglŷn â bywyd a chymdeithas yn ardal Llangadog yn ystod y cyfnod hwn. Nid oes yna unrhyw safleoedd yn yr ardal wedi’u cadarnhau fel rhai sy’n dyddio o’r cyfnod hwn, ond gellir disgrifio un thema arwyddocaol sy’n deillio o’r canoloesoedd cynnar, sy’n parhau i ddylanwadu ar gymdeithas heddiw. O ganlyniad i dwf yr eglwys Gristnogol tua diwedd y cyfnod Rhufeinig gwelwyd cynnydd mawr mewn gweithgarwch cenhadol ar ddechrau’r canoloesoedd cynnar. Yng Nghymru cyfeirir at y cyfnod hwn yn aml iawn fel “Oes y Seintiau,” yn hytrach na’r Oesoedd Tywyll, fel cydnabyddiaeth o’r ffaith fod y cyfnod yn un o ddatblygiad diwylliannol ac ysbrydol aruthrol i drigolion Cymru. Mewn gwirionedd roedd y seintiau yn genhadon a ffigurau eglwysig Cristnogol wnaeth sefydlu a ehangu’r mynachlogydd, fel tai o ddefosiwn a dysg ar draws y wlad. Mae enwau llawer o’r prif ffigurau oedd yn byw yn ystod y 5ed a 6ed ganrif AD, megis Dewi, Teilo a Phadarn wedi’u coffau heddiw yn enwau llawer o eglwysi, ac mae Llangadog ei hunan yn coffau Sant Cadog, sant o’r 6ed ganrif, y credir i fod yn ŵyr i Brychan Brycheiniog a’r un a sefydlodd fynachlog Llancarfan Fawr yn Nyffryn Morgannwg. Yn ôl yr hanes roedd Cadog yn weithgar yn Sir Forgannwg a Sir Frycheiniog ac mae yna sawl eglwys sy’n dwyn ei enw yn y ddwy sir. Credir hefyd mai ef a sefydlodd yr eglwys yn Llangadog. Roedd Cadog hefyd yn teithio y tu allan i Gymru gan sefydlu eglwysi mewn llefydd mor bell â Llydaw, Yr Alban a Chernyw.

Ar wahân i safle presennol eglwys y plwyf, mae yna safle posib arall i eglwys yn y gymuned sydd o bosib â’i gwreiddiau yn y canoloesoedd cynnar. 400m i’r de ddwyrain o fila Rufeinig Llys Brychan mae cae sy’n cael ei adnabod fel Mynwent y Capel neu Cae Capel (PRN 4051), a ddisgrifiwyd fel sail i amgaead cynharach o fewn i’w ffiniau pan wnaeth y RCAHM ymweld â’r lle yn 1903. Oherwydd ei fod yn agos at Lys Brychan ac oherwydd yr enw “Mynwent” mae’n bosib ei bod yn safle i eglwys a mynwent Gristnogol gynnar. Ceir safle eglwys bosib yn dyddio o’r canoloesoedd cynnar yng Nghapel Tydist (PRN 897), er bod tystiolaeth gyfredol yn awgrymu ei bod yn gapel gorffwys sy’n dyddio’n ddiweddarach yn ystod y canoloesoedd. Felly hefyd, mae’r eglwys yng Nghapel Gwynfe (PRN 5516) yn fwy na thebyg yn gapel gorffwys yn ystod y canoloesoedd, yn gwasanaethu’r rhan anghysbell hon o’r gymuned, ond nid ydym yn gwybod digon am ei gwreiddiau i allu dweud a oes ganddi wreiddiau o’r canoloesoedd cynnar.

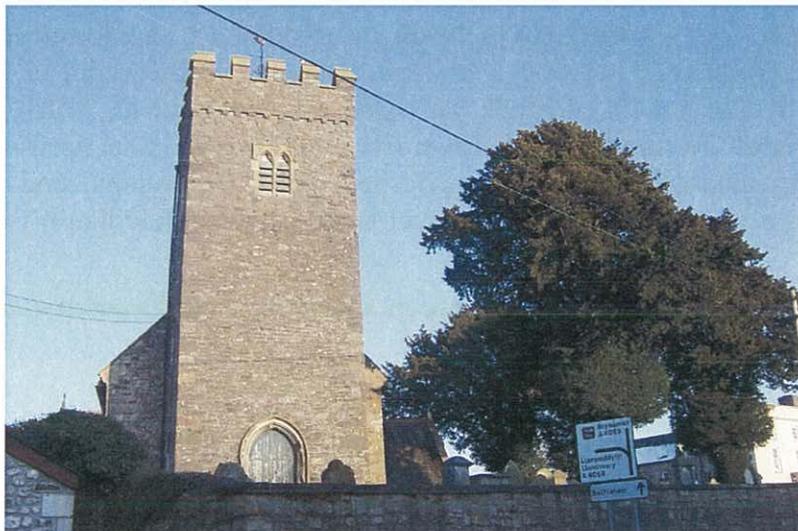

3.3 CANOLOESOL

Mae gan Langadog gyfoeth o hanes canoloesol, yn ymwneud â'r cyfnod rhwng c. AD1080 a AD1540, a gellir rhoi crynodeb byr o dan y themâu canlynol.

Bwrdeistref Eglwysig Llangadog

Mae gan yr eglwys ganoloesol hanes amlwg a diddorol yn ardal Llangadog. Fel y soniwyd cynt, mae yna safleoedd eglwysig yng Nghapel Gwynfe a Chapel Tydist sydd efallai â gwreiddiau o'r canoloesoedd cynnar, ond a ddefnyddiwyd yn bendant fel capeli gorffwys yn ddiweddarach yn y canoloesoedd. Eglwys y plwyf Sant Cadog (PRN 4049, Plate 4.) oedd y prif ffocws yn anheddiad canoloesol Llangadog, ac yr oedd gan y lle statws uwch, oherwydd erbyn y 13eg ganrif roedd yr anheddiad yn fwrdeistref eglwysig, ac yn rhan o ystâdau mawr Esgobion Tyddewi. Roedd yr eglwys, a gysegrwyd yn wreiddiol i Dewi Sant, wedi'i gysegru i Cadog erbyn yr 1130'au, er efallai mai dim ond cymwynaswr lleyg ydoedd. Rhwng 1283 ac 1287 cafodd gyfansoddiad fel eglwys golegaid Esgobol (PRN 8330) ar gyfer arweinydd a 21 canon, sefydliad *de novo* hwyr gan yr Esgob Bek. Tybier i hwn ei sefydlu o fewn eglwys y plwyf, ond nid oes yna unrhyw dystiolaeth ar y lleoliad o unrhyw adeiladau neu lety cwfaint. Symudodd i Abergwili yn 1287. Roedd mynwent fechan, hirgrwn Sant Cadog (PRN 49286) yn arfer bod yn fynwent cylch, ac awgrymir ei bod efallai wedi'i lleoli ym mhen gogleddol amgac eglwysig mawr hirgrwn.

Mae Llyfr Du Tyddewi, a ysgrifennwyd yn 1326, yn gofnod hanesyddol hynod ddiddorol o dref fwrdeistrefol Llangadog, y wlad oddi amgylch neu *Patria* Llangadog, a'r anheddiad yn Felindre Sawdde. Mae'n cynnwys llawer o enwau'r trigolion ac yn disgrifio'r dyletswyddau yr oedd disgwyl iddynt eu gwneud wrth wasanaethu'r Esgob.

Plât 4. Eglwys St Cadog (PRN 4049)

Castell Meurig

Mae castell mwnt a beili Castell Meurig (PRN 5515) yn Gofeb Hynafol Rhestredig. Mae yna fwnt mawreddog a beili o waith pridd siâp pedol sydd wedi'i gadw'n dda, mae'n atgof trawiadol o'r degawdau o ymladd sy'n nodweddu hanes yr ardal yn ystod y 12fed ganrif a 13eg ganrif. Cyfeirir at y castell yn 1203, 1208 ac 1209 fel rhai a oresgynnwyd

yn ystod yr ymladd rhwng y Cymry a'r Saeson ac sydd yn ôl yr hanes â chysylltiadau gyda Thywysogion brenhinol y Deheubarth, yn ogystal â'r goresgynwyr Eingl-Normanaid. Mae yna dŷ modern yn y beili.

Amaethyddiaeth

Roedd y wlad o amgylch Llangadog wedi'i anheddu ac yn cael ei amaethu yn ystod y canoloesoedd ac mae yna lawer o safleoedd archaeolegol ac hanesyddol sy'n cynrychioli'r agwedd hon o hanes y gymuned. Mae hyn yn cynnwys cofnodion o felinau grawn canoloesol a ffermydd, ond hefyd olion system gaeau strip o'r canoloesoedd (PRN 8329) yn Felindre Sawdde (Plât 5.). Yn yr ardal hon roedd yna anheddiad o gaethion, taeogion oedd yn glwm i wasanaethu eu harglwydd, yn y canoloesoedd. Rhoddwyd yr hawl i Felindre Sawdde gynnal ffair flynyddol yn 1383 ac efallai ei bod yn faerdref; mae ei siâp hirsgwâr braidd yn anarferol ac mae'r caeau siâp sribedi yn unigryw yn rhan uchaf dyffryn Tywi.

Mae'r tir comin sydd yn y gymuned, o Garn Goch i'r Mynydd Du yn parhau i fod yn llawn o adfeilion tai a chytiau'r bugeiliaid canoloesol oedd yn treulio tymor pori'r haf gyda'u hanifeiliaid yn eu *hafodydd* ar hyd lethrau'r mynydd. Mae deall hanes amaethyddol yr ardal yn holl bwysig wrth esbonio a mwynhau'r dirwedd fel ag y mae heddiw ac mae'n thema hanesyddol bwysig.

Plât 5. Caeau sribed yn Felindre Sawdde

3.4 ÔL-GANOLOESOL A MODERN (1540 – Presennol)

Mae yna sawl lle yn yr ardal sydd o ddi-ddordeb i'r cyfnod ôl-ganoloesol o fewn Cymuned Llangadog, sy'n cael eu trafod yma yn ôl thema yn yr adran hon.

Treftadaeth Gristnogol:

Gwnaed newidiadau mawr i eglwys Sant Cadog a sonnir amdano yn ystod y drafodaeth ar y fwrdeistref eglwysig ganoloesol rhwng 1888-9. Ail-adeiladwyd portsh y de ar yr adeg yma, ac ailosodwyd bwa'r gangell a bwâu'r transept a rhywfaint o'r rhagfur. Rhoddwyd ffenestri newydd a hefyd drysau newydd yn y de a'r gorllewin, felly hefyd y toeon a'r lloriau. Yn ogystal â hyn, cafodd nawdeg y cant o'r adeilad ei ailbwyntio a'i ailblastro. Er gwaethaf hyn, mae chwedeg y cant o ddeunydd adeiladu'r eglwys yn dyddio o cyn y 19eg ganrif, gan fod y gangell, canol yr eglwys, transeptau gogledd a de a'r tŵr pob un yn dyddio o'r canoloesoedd.

Adeiladwyd eglwys 'All Saints' Capel Gwynfe (PRN 35363), capeliaeth i blwyf Llangadog, a adeiladwyd yn 1898-9 union i'r gogledd ddwyrain o Gapel Gwynfe (PRN 5516, Plât 6.), ac yn ei lle cafwyd estyniad i'r fynwent. Gadawyd y capel cynharach yn segur, a bellach defnyddir fel neuadd yr eglwys bresennol. Mae yna gapel wedi sefyll yng Nghapel Gwynfe ers o leiaf diwedd yr 16eg ganrif, pan gafodd ei nodi ar y map 'Saxton' fel 'Capel Gwenvye', ond gellir dyddio'r strwythur presennol (neuadd yr eglwys bresennol) i'r cyfnod 1812-18 ac nid yw'n ymddangos fod yna ddeunydd adeiladu cynharach ynddo. Yn ôl yr hanes adeiladwyd yn hwyrach na adeilad c1710, a oedd yn debyg iawn o ran cynllun a maint. Roedd mynwent wreiddiol Capel Gwynfe (PRN 49287) yn fach ac yn amlonglog, er awgrymwyd ei bod yn wreiddiol yn amgaead mawr sydd bellach yn cael ei gynrychioli gan ffiniau caeau.

Plât 6. Neuadd Eglwys Capel Gwynfe (PRN 5516)

Roedd anghenion ysbrydol anghydfurfwyr cymuned Llangadog yn cael eu diwallu gan o leiaf deg capel ac yn rhyfeddol iawn, mewn cyfnod pan mae cymaint o gapeli Cymru yn cael eu gadael yn segur neu'n eu newid i'w defnyddio'n secwlar, mae yna addoli yn digwydd yn o leiaf chwech o'r rhain o hyd. Dechreuodd yr achos Methodistiaidd Calфинаidd yng Nghapel Goshen (PRN 20401) yn fwy na thebyg yn yr 1740'au pan

wnaeth Howell Harries, Methodist cynnar, bregethu yn Llangadog, o bosib yng ngardd tafarn y Llew Coch. Roedd y Bedyddwyr yn addoli yng Nghapel Sion, Carregsawdde (PRN 51405), pan ddechreuodd yr achos yn c.1806. Hefyd roedd yna nifer o gapeli Annibynnol yng Nghapel Bethlehem (PRN 18863), adeiladwyd c.1800; Capel-y-Maen (PRN 18866) adeiladwyd c.1852; a Chapel Seion, Llangadog (PRN 18936) pan adeiladwyd y capel gwreiddiol c.1909 ar safle'r Ganolfan Gymunedol bresennol. Ers hynny, cafodd y capel hwn ei ddymchwel, ac mae'r capel presennol Capel Seion (PRN 50445) yn Heol Walters. Cychwynnodd sawl achos Annibynnol llawer yn gynt na phan adeiladwyd y capeli, gyda llawer o'r gwasanaethau yn digwydd mewn cartrefi ac ysguboriau ar ddiwedd y ddeunawfed ganrif a dechrau'r bedwaredd ganrif ar bymtheg.

Hanes Cymdeithasol:

Mae yna hanes cymdeithasol cyfoethog yn perthyn i fywyd ar ffermydd, bythynnod a phentrefi'r ardal. Mae llawer o'r hanes hwn ar gof ond heb ei gofnodi. Mae hyn yn ymwneud â gweithgareddau o amgylch siopau lleol, tafarndai ac ati sy'n adlewyrchu datblygiad y gymuned yn ystod y 19eg ganrif a'r 20fed ganrif. Efallai ei bod hefyd yn ymwneud â digwyddiadau hanesyddol, megis Terfysg Beca, neu'n cyfeirio at feirdd, awduron neu artistiaid sy'n gysylltiedig ag ardal Llangadog. Un agwedd o fywyd cymdeithasol yr ardal yw'r râs trotian. Dyma'r cyfarfod rasio hynaf i'w gynnal bob Dydd Llun y Pasg a hynny ers 1884 pan oedd rasys carlamu, trotian a neidio dros y clwydi. Yn ystod diwedd yr 1800'au roedd y rasys trotian yn cael eu cynnal ar hyd y ffyrdd, ond wrth i fwy a mwy o geir ddod, symudodd y rasio i draciau mewn caeau. Mae yna amrywiaeth o leoliadau wedi bod ond ers 1999 mae'r cyfarfod rasio wedi'i gynnal ar drac caled dros y mynydd o Langadog yn Nhairgwaith.

Hanes Diwydiannol:

Mae gan Langadog sawl traddodiad diwydiannol gwledig o arwyddocâd mawr. Mae'r rhain yn cynnwys y chwarel galch hanesyddol a'r diwydiant llosgi calch sydd wedi gadael ei farc yn barhaol ar dir comin y Mynydd Du. Enghraifft dda o hyn yw'r casgliad o safleoedd sy'n gysylltiedig gyda gwaith chwarel a llosgi calch ar Garn Cennen (PRNs 27608; 31826; 31828; 31829; 33433). Roedd yna felin wlân ar yr Afon Dulais yng Nghwm Dŵr (PRN 21904) a melin rawn, Melin Glansevin (PRN 18950), dwy filltir i'r dwyrain o Langadog.

Mae gefeiliau a gofaint megis gweithdy'r gof yn Felindre (PRN 21920) wedi'u cofnodi a hyd yn oed gweithfeydd plwm sydd wedi bod yn gweithio yn y gymuned. Gwelir gweddillion y diwydiant arian/plwm, a oedd yn ei anterth hanner olaf y bedwaredd ganrif ar bymtheg, wedi goroesi tair milltir i'r dwyrain-deddwyrain o Langadog a gwaith Cae Sara, Cofeb Hynafol Rhestredig. Mae'n bosib fod yna waith plwm wedi dechrau yng Nghae Sara yn y 18fed ganrif, er roedd yn rhaid aros tan 1851 cyn i unrhyw waith ar raddfa fawr ddechrau, yn wreiddiol o dan reolaeth Henry Gibson ac o dan yr enw 'Great Welsh Silver Lead Mine'. Mae'r dystiolaeth sydd i'w gweld yno heddiw yn cyfeirio at gyfnod byr, ond prysur rhwng 1851 ac 1870. Mae'r tŷ injan sy'n nodweddiadol o rai a geir yng Nghernyw (PRN 47659, Plât 7.), gyda'i simnai uchel yn dominyddu'r awyr uwchben yr hen adeiladau cloddio sydd wedi goroesi oherwydd eu bod mor gadarn, ond roedd hyn yn angenrheidiol er mwyn cynnal y trawstiau trwm oedd yn trosglwyddo'r symud o silindrau injan i'r llinell o bympiau sy'n rhedeg i lawr siafft yr injan. Mae adfeilion sawl adeilad wedi goroesi o fewn yr ardal dwy erw a hanner, tra bod rhai eraill

wedi'u colli'n llwyr. Yr adeilad gorau o'r adeiladau perthynol yw adeilad mawr (PRN 47663) i'r de-deorllewin o'r tŷ injan.

Yr hufenfa sy'n cynrychioli'r gweithgarwch diwydiannol diweddarach (PRN 51419) sydd ar ymylon Llangadog. Mae'r hufenfa hon yn dathlu ei hanner can mlwyddiant eleni ac mae'n sefyll fel tyst i bwysigrwydd amaethu llaeth yn yr ardal.

Hanes Amaethyddol:

Mae cymeriad amaethyddol y gymuned wrth gwrs yn ganlyniad i filoedd o flynyddoedd o amaethu a rheoli tir. Mae'r dirwedd yn un o ffermydd gwasgaredig, caeau pori bach a choedwigoedd bychain. I fwrdd oddi wrth y pentrefi, ffermydd a thai gwasgaredig a geir yn bennaf fel y patrwm anheddu. Cerrig yw'r rhan fwyaf o'r adeiladau sy'n dyddio o'r 19eg ganrif a'r 20fed ganrif. Mae yna amrywiaeth o fathau o ffermdai, ond adeiladau deulawr sy'n dair rhan yn y traddodiad brodorol neu'r arddull mwy 'Sioraidd' o ddechrau a chanol y 19eg ganrif. Mae yna anheddiadau mwy o faint, yn ogystal â thai llai a bythynnod. Mae gan y rhan fwyaf o ffermydd adeiladau sylweddol, yn aml iawn wedi'u trefnu o amgylch iard, er bod yna adeiladau sengl a llai o faint ar ffermydd llai. Bellach mae gan fwy neu lai pob fferm adeiladau amaethyddol modern. Wedi'u hadeiladu wrth ymyl y patrwm hwn o ffermydd gwasgaredig ceir dyrnaid o anheddiadau diweddarach yn y dyddio o'r 19eg ganrif a'r 20fed ganrif, mewn amrywiaeth o arddulliau a deunyddiau.

Mae hanes a thraddodiadau'r rheini sydd wedi bod yn gweithio ar y tir yn elfen bwysig yn nhreftadaeth y gymuned, pun ai ei fod mewn perthynas â materion megis gweinyddu Cwrt Lît y plwyf, neu draddodiadau bugeilio ac amaethu llaeth yr ardal.

Chwedlau ac Hanesion: Ychydig iawn o chwedlau ac hanesion sy'n gysylltiedig â'r gymuned. Methodd y gymuned â chofio'r un ar y noson treftadaeth nac ar y taflenni casglu gwybodaeth.

Plât 7. Y tŷ injan Cernyweg yng Nghae Sara (PRN 47659)

4. PRIF THEMÂU

Mae'r rhestr hon yn amlinellu'r prif themâu hanesyddol y gellir eu dynodi o'r wybodaeth a gedwir yn y Cofnod o Safleoedd a Henebion.

1. Y dirwedd. Mae'n bwysig edrych ar y dirwedd hanesyddol yn ei chyfanrwydd ac fel nodwedd archaeolegol. Mae'r dirwedd yn cynnwys tystiolaeth o weithgarwch dyn sydd wedi bod yn digwydd yn y gymuned ers miloedd o flynyddoedd – o domenni claddu o'r Oes Efydd i'r gwaith calch sy'n nodweddu'r ardal yn fwy diweddar – ac yn elfen bwysig o'r amgylchedd hanesyddol.
2. Bywyd crefyddol. Roedd Llangadog yn ystod y canoloesoedd yn ganolfan bwysig o ran gweithgarwch crefyddol, yn canolbwyntio ar eglwys y plwyf sef Sant Cadog, a fu am gyfnod byr yn eglwys golegaid Esgobol. Mae nifer y capeli anghydfurfiol sydd yn yr ardal, a'r ffaith eu bod wedi goroesi i'w defnyddio fel capeli heddiw yn dangos eu pwysigrwydd o ran eu rôl crefyddol sydd wedi parhau i chwarae rhan ym mywydau a thraddodiadau'r gymuned.
3. Gweithgarwch diwydiannol. Mae yna sawl nodwedd archaeolegol yn yr ardal sy'n ymwneud â diwydiant, yn amrywio o weithdai gofaint i'r gweithfeydd cloddio sydd yng Nghae Sara sydd o bwysigrwydd cenedlaethol. Felly mae diwydiant yn agwedd arwyddocaol arall o dreftadaeth y gymuned leol. Mae'r hufenfa fodern yn un o gyflogwyr mwyaf yr ardal o ran canol a rhan uchaf dyffryn Tywi gan dynnu sylw at bwysigrwydd y diwydiant ym mywydau'r boblogaeth leol.
4. Garn Goch. Mae'r bryngaer trawiadol yn Ngarn Goch yn haeddu sylw unigol. Mae'r safle hwn o bwysigrwydd cenedlaethol ac mae'n dominyddu tirwedd cynhanesyddol diweddarach dyffryn Tywi.

<i>Site Type</i>	CHAPEL;CEMETERY?	<i>Period</i>	Medieval
Enw			
<i>Name</i>	CAPEL TYDIST;CAPEL TYDYSTYL		

Site of medieval chapelry to Llangadog parish, in Maenor Vabon (Rees 1932; RCAHM 1917, 147-8). It was mentioned, as 'Llan Dydystyl', in the late 16th century (ibid.). Remains were apparently visible in the late 19th century, along with a yew-tree and possible burials (ibid.), while the site is marked on all editions of the Ordnance Survey 1:10560 maps (but with no recognisable enclosure), but it was not mentioned by Samuel Lewis in 1833. It was dedicated to the 'Celtic' St Tydystl, there is no current evidence for an early medieval date. ^NDL 2003

Enw <i>Name</i>	CARN CENNEN		

Close to the E edge of the Cennen gorge is a series of small quarries linked by zig-zag roads. The roads presumably linked to others on the opposite W side of the gorge either via a chain-link bridge or some form of breeches buoy apparatus. On the western side I observed a piece of iron tram rail used to stake the fixtures of the bridge/apparatus. On the W side a made roadway can be seen rising up along the contour and then turning tightly back on itself suddenly finishing some distance from the summit. Another branch of the roadway runs towards Carn Fawr around Llwyn du Isaf. (TAJ 16-2-89)

Site Type VILLAGE

Cyfnod
Period Medieval?

Enw
Name FELINDRE

The village of Felindre has a remarkably unusual plan. It is nearly square formed by a road that encircles gardens with houses fronting the road. Within the area enclosed gardens run radially from the properties on the street front but there are also properties within the interior set obliquely to the principal alignments. The latter are almost certainly later. On the outer side of the encircling road are other properties with their own gardens and fields. Beyond the village are strip fields with hedge banks that appear to sit on lynchets. The whole appears to be carved out of an openfield? By association it seems possible that the village is mediaeval in origin and thus represents a unique plan form. (TAJ 17-2-89)

<i>Site Type</i>	CHAPEL	<i>Period</i>	Medieval?;Post Med
Enw	CAPEL GWYNFE		
<i>Name</i>			

Former chapelry to Llangadog parish; now used as a Church Hall (PRN 29610). A chapel has been present at Gwynfe since at least the late 16th century when it was depicted on Saxton's map as 'Capel Gwenvyve', but the present structure can be dated to the period 1812-18 and appears to contain no earlier fabric (Ludlow 2000). It is said to have been the successor of a building of c.1710, which was of much the same plan and dimensions (ibid.). In 1898-9 a new chapel (or church), dedicated to All Saints (PRN 35363), was constructed immediately northeast of the old chapel, in an extension of the churchyard, and the old chapel became disused, ultimately becoming the Church Hall. See churchyard PRN 49287 for description of site, discussion and management recommendations. ^NDL 2003

Record Number	5520	Grid Reference	SN758206
Math o safle		Cyfnod	
Site Type	BARROW CEMETERY?	Period	Bronze Age
Enw			
Name	TIR Y BEDDAU		

The place name, Tir y Beddau (land of the graves) has lead to the suggestion of a barrow cemetery. No identifiable features have been recorded at this point, which is an area of little or no stone. The Ordnance Survey suggested cairns lying 300m to the north may have given rise to the name. (PP 2004, based on NC 2002)

D-shaped enclosure adjoining 2 rect buildings, built end-to-end, forming a P-shaped complex aligned NS. Enclosure measures 10.8 x 8.8 with walls .85m wide. Adjoining to N is larger rectangular building 8.6 x 4.1m. Walls 0.8m wide. Single entrance on W side. Partitioned by cross wall in ratio 3:2. On same alignment, further N is another more ruined rectangular building 6.0 x 3.7m. Walls 0.7m wide (EM 1988). ^^ A sheepfold at the confluence of the Sawdde & Sawrg SN764193. The fold is irregular and sub-circular in shape. It runs parallel to the stream on a N-S axis and measures 11m x 8m. There is a rectangular compartment at the N end with an entrance in the W side. The walls stand up to 1.5m high. The southern end is the more ruinous. Rectangular compartment is 8m long E-W with another ruined cell abutting its N side extending for another 5m and being 4m wide. This compartment seems to be sub-divided into two smaller cells but the detail is obscured by collapse. ^RSR March 1999^

Rectangular building 11.0m x 4.0m in a similar situation to PRN 13412. Partitioned equally in two by a cross-wall. Walls are 0.8m wide. Adjoining to W on same alignment a square building of side 4.5m. EM 1988?^^The description of this structure is at odds with the observations of the 1998 visit - it seems that what is^ interpreted by EM as two or three separate structures was^seen as a single, multi-celled building in 1998 - described ^ thus -^^Long building at foot of scree covered slope beneath limestone crag and therefore well sheltered. Has good prospect to NW. Grassy area, nettle growth to E end of structure. Damp, reedy ground to N. Marked as 2 separate features on SMR base map but arguably a single structure, the SE wall being continuous. Generally 4m wide x 24m long on its E-W axis. There are certainly 5 compartments or rooms. E compartment is largest, with walls standing up to 1.5m high, the N wall showing good coursing in the drystone wall. There may be a sixth compartment, 4m square, appended to E end, but the identification of this was uncertain due to tumbled stone and vegetation. There may possibly be a small yard on S side at E end. In view of postulated relationship with the nearby limestone quarries and limekilns on Blaen Cylchau, this may be seen as a temporary dwelling for workers seasonally employed at the quarries. (see also PRN 13414). RPS July 1998

<i>Site Type</i>	LIME WORKINGS	<i>Period</i>	Post Med
Enw			
<i>Name</i>	BREST CWM LLWYD		

An extensive area of intense limestone quarrying and lime burning - as witnessed by the remains of numerous lime kilns and their attendant spoil tips spread downslope. A disused Post Mediaeval settlement (field system A Buildings) exists adjacent to the west of the area of most intense activity. See RAF APs (PRN for PM settlement=24457) E Morgan Dec 1987^According to the NAS report there are at least 29 kilns here.

<i>Site Type</i>	LIME WORKINGS	<i>Period</i>	Post Med
Enw			
<i>Name</i>	BLAEN SAWDDE FECHAN;BLAEN Y CYLCHAU		

A region of limestone quarrying and burning for the manufacture of lime - as witnessed by the many lime kilns. A large number of rectangular and sub-rectangular buildings exist close by at SN763188 PRN 13266 and some of these presumably housed at least temporarily the workers at this remote location.

<i>Name</i>	CWM SAWDDE FECHAN		

A rectilinear long hut measuring 7m x 4m on a NE-SW axis. There is an entrance in the north side of this two-celled structure. The smaller compartment is at the SE end and is 1.5m wide. The walls are in part defined by edge-set stone slabs and measure 0.9m wide and 0.3m high. This building is set on a dry promontory overlooking a bend in the stream and is 100m S of the ford crossing. RSR March 1999.

Enw
Name CWMLLWYD

A sheepfold measuring 36m North to south and 23m east to west. It consists of fourteen compartments of varying sizes set round a central larger rectangular enclosure. Each compartment was for a different farm. A local farmer stated that the fold went out of use in the 1950's but before that it was used whenever the flocks were brought off the hill pasture and required sorting. It was especially important during compulsory dipping of the sheep in late August when all the flocks would be gathered together and the sheep dipped under scrutiny from the local police constable. Period Neolithic?

Enw
Name CAE'R GANFA;CIL Y GANFA

CROMLECH?: An unusual arrangement of stones in the corner of the field known on the 1881 Direlton estate map as Cil y Ganfa. This corner has clearly been used in the past as a dumping area for stones disturbed by ploughing. However, there are a number of large edge set slabs of stone which form a rectangular feature c2.5m x 5m in size (although this is probably not the whole of the feature, which has been disturbed by both stone removal and dumping). Some 10m to the west, more edge set slabs run at right angles to this rectangular feature and may be part of a larger structure. It may indeed be a ruined neolithic burial chamber or Cromlech. However, the degree of interference of the area over a very long period makes it difficult to interpret the site from surface evidence. P. Sambrook, 1997.

Period Modern

Enw
Name GARN GOCH

The common of Garn Goch was selected for survey in 1994/5 by the National Park as part of the implementation of a proactive management plan. The National Park's APs were examined, a set of vertical colour prints at 1:7000 and stereo pairs of the flight at 1:20000. The 1:10000 map cover was also consulted. The fieldwork element consisted of fieldwalking at 30-50m intervals depending on the vegetation and topography. Each site was recorded on a NP site visit proforma and if appropriate sketch planned and/or photographed. The sites were entered onto a GIS as points, lines or areas with a small amount of data. The detailed record was held on a Microsoft Access database including management recommendations. JH based on Dorling,P & Evans,M 1995

Period Modern

The Black Mountain Graziers Association wished to repair and reuse the ruins of Cwmllywd sheepfold on the northern fringes of the Black Mountain, Llangadog, Carm. The work was undertaken through the agency of the Meithrin Mynydd project. A planning application was submitted to Brecon Beacon National Park Authority and a brief for the archaeological recording of the fold was written by the curatorial section of Dyfed Archaeological Trust in consultation with the BBNP Authority's archaeologist. Archaeoleg Cambria Archaeology were commissioned to undertake the recording of the fold. ^Documentary and cartographic sources were consulted and oral evidence recorded. The structure and its surroundings were recorded as an EDM survey and a watching brief was kept as the reconstruction work progressed. The Project Officer was K Murphy. <i>Site Type</i>	TRACKWAY	<i>Period</i>	Post Med
Enw			
<i>Name</i>	CWM LLWYD		

This very distinct causeway, c.4m wide, 1m high, continues the line of the current public road 3337. This causeway has been breached by several streams, and at the NW end of the survey area has been removed completely by erosion. On aerial photographs its line can be traced further, curving round to the north and eventually continuing as track 35477. It seems likely that this now abandoned track was the original line of the turnpike road 3337 before its replacement with the current tarmac road. The line of this track is cut across by track 35476. KM 1997

Cyfeirnod <i>Record Number</i>	35476	Cyfeirnod Grid <i>Grid Reference</i>	SN70701995

Math o safle <i>Site Type</i>	CHURCHYARD	Cyfnod <i>Period</i>	Early Medieval
Enw <i>Name</i>	LLANGADOG PARISH CHURCH;ST CADOG'S;ST DAVID'S		

Early medieval C site, ie. low-probability early medieval origins. Churchyard occupied by the medieval Llangadog parish church PRN 4049, which was a possession of the Bishops of St Davids by the 13th century, constituted as episcopal collegiate church from 1283 to 1287 (PRN 8330). It was already dedicated to Cadog by the 1130s but Cadog may just have been a lay benefactor, the church having originally been dedicated to St David, cf. the Dewi church at Llanarthne). The small, suboval churchyard was formerly circular, and it has been suggested that it may have lain at the north end of a very large, oval ecclesiastical enclosure. The churchyard lies within 1.3km of the main Brecon-Llandovery-Carmarthen Roman Road line. Castell Meurig motte-and-bailey PRN 5515 lies 840m to the south suggesting that they are not contemporary. ^NDL 2003

Name CAPEL GWYNFE

Early medieval D site, ie. possible early medieval origins. Former chapelry to Llangadog parish; now used as a Church Hall (PRN 29610). A chapel has been present at Gwynfe since at least the late 16th century, but the present structure can be dated to the period 1812-18. In 1898-9 a new chapel (or church), dedicated to All Saints (PRN 35363), was constructed immediately northeast of the old chapel, in an extension of the churchyard, and the old chapel became the Church Hall. The churchyard was originally small and polygonal. Sambrook has suggested that it formerly occupied a large, polygonal (outer) enclosure, now represented by field boundaries. ^NDL 2003

Name CAPEL SEION

Seion Baptist chapel was first built in 1807 and rebuilt or modified in 1829 and 1886. According to the records of the Royal Commission for Ancient and Historic Monuments (Wales), a new chapel was built in 1909 to replace the original Seion chapel, but this had been demolished before 1997 (PRN 18936). The congregation appear to have moved to a new chapel at this site in The Backway (Walters Road) on the basis of modern map evidence. RPS 2004.

Cymeriadaeth y Dirwedd Hanesyddol

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 196 YSTRAD TYWI: LLANDEILO - LLANGADOG

GRID REFERENCE: SN 662250

AREA IN HECTARES: 769.40

Historic Background

A long, narrow area stretching from Llandeilo in the west to Llangadog in the east, which lies in the fertile alluvial floodplain of the River Tywi and includes a short stretch of one of its tributaries, the Afon Dulais. The valley was the major historic route corridor into West Wales and the Roman road from Carmarthen to Llandovery, which forms the north-western edge of this character area, was constructed along the interface between the alluvium and the solid geology of the north side of the Tywi, and was more-or-less followed by a later turnpike and the present A40(T) - see also Area 182. The River Tywi in this area is particularly active and subject to constant and radical course change across its valley floor, cutting and re-cutting its way through the alluvium and leaving behind a complex of meanders and ox-bow lakes (Ludlow 1999, 21). Evidence from maps, documents and aerial photography suggests that the course has changed greatly even since the Post-Medieval period. The Roman road was therefore directed along the higher ground just off of the valley floor, and settlement on the floodplain itself has always been minimal; there are now no farms or dwellings within the area. However, the landscape had been enclosed, in the present pattern of regular fields, by the time the tithe surveys were conducted in the second quarter of the 19th century; the process was probably undertaken during the 18th century. Earlier and prehistoric environments and settlement patterns of the Tywi Valley are among 'the least known' (Cadw/ICOMOS 1998, 28), but the interface between the floodplain and higher ground would have been an important area of activity for early human communities in the region, providing easy access to the resources of the river and its associated wetlands whilst providing a dry occupation site. *Ad hoc* archaeological work has suggested that there are glacially deposited raised areas of ground on the valley floor (*ibid.*), and peat deposits have been noted between the alluvium and the underlying geology elsewhere within the Tywi Valley, for example at Abergwili and Pensarn, near Carmarthen (Page 1994, 4,9). Here they were thought either to represent 'islands' in the floodplain, or a drying of the floodplain, while Bronze Age stray find sites, and possible round barrows, testify to prehistoric activity within the area. During the Medieval period the river formed one of the major boundaries of Carmarthenshire, separating Cantref Mawr on the north bank from Cantref Bychan on the south bank (Rees, 1932). As such, the landscape area has experienced a chequered history of tenure and was troubled by warfare until the end of the 13th century. Cantref Mawr, unlike Cantref Bychan which was subject to 12th century conquest and reconquest, remained an independent Welsh lordship until 1284 (Rees 1953, xv). There never appears to have been a bridge across the Tywi between Llandeilo and Llangadog, but a possible ford, and perhaps a Medieval battle site, are suggested by the name 'Rhyd-y-Saeson' near Llangadog. A turnpike, established in 1763-71 (Lewis, 1971, 43) more-or-less followed the line of the Roman road although the course through Cwm-Ifor was straightened under Thomas Telford in the 1820s (Carmarthenshire Record Office, Cawdor Maps 172) with the subsequent development of the village. The entire area is crossed by the former LNWR main West Wales railway line which was opened, as the 'Vale of Towy Line', by the Llanelly Railway and Dock Company in 1858 (Gabb, 1977, 76).

Description and essential historic landscape components

The flood plain of the River Tywi between Llandeilo and Llangadog rises a little over 20 m over 9 km. It averages 1.5 km in width. This stretch of the Tywi, unlike the lower section between Carmarthen and Llandeilo (Area 182), has an active erosion and deposition cycle over long stretches of its course, with shifting meanders. In these locations the marshy, scrubby and rough ground is present. Elsewhere the floodplain has been divided into a rather loose pattern of medium- to large-sized irregular and regular fields of improved pasture by hedges without banks and earth banks topped with hedges. The former are planted on the valley floor presumably to facilitate flood-water drainage. The condition of these enclosures varies considerably. In certain locations, particularly close to the river, hedges are virtually redundant and wire fences run along the earth banks. In other areas hedges are well maintained and in good condition. Many hedges possess distinctive hedgerow trees. There is no woodland and no

settlement in this character area. The wooded nature of the valley, however, was commented upon by early writers including Leland in the 1530s (Smith 1906), who appears to be describing the floodplain. The railway line which runs along the floodplain on a low embankment is a distinctive landscape element.

Recorded archaeology is limited but includes Bronze Age finds and possible round barrow sites near Llandeilo and Cwm-Ifor. Other later features include road and rail bridges, stations and other railway furniture. The importance of buried deposits within the floodplain cannot, however, be overstressed.

There are no distinctive buildings.

The loose field systems and lack of settlement and woodland on the flood plain of the Tywi provides a distinct character area and stands in contrast to the surrounding area of occupied land (Areas 191, 201, 202, 204, 205 and 225).

Conservation priorities

There are few historic landscape conservation priorities in this character area, but some consideration should be given to the management of hedgerows, the decay of which is beginning to affect the character of this area.

Aerial photographs: 29, 30

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 198 UPPER CENNEN

GRID REFERENCE: SN 683193
AREA IN HECTARES: 246.20

Historic Background

A small character area occupying the upper valley of the Afon Cennen within the foothills of the Black Mountain, once part of Maenor Llys which occupied the eastern part of Iscennen commote. Iscennen, unlike the rest of Cantref Bychan within which it lay, remained nominally independent of Anglo-Norman rule and held under native tenurial systems until 1284 when it was acquired by John Giffard. In 1340 it became a member of the Duchy of Lancaster (Rees 1953, xv-xvi). Area 198 lies at the political centre of the commote, represented by the farm-names *Ferdre Fawr* and *Fach*, which represent the former *maerdref* estates of Carreg Cennen Castle and *llys* (Area 256). Here, by 1284 at least, a small estate was worked by 13 bond tenants who were in the charge of a reeve, subject to its own legal court and responsible for the maintenance of the lord's mill, labour and the carriage of produce. They held their land by inheritance, with perpetual right to their holdings (Rees, 1924, 200), while they also paid rent on Pedol (Area 240) and other holdings within the Black Mountains which may indicate that they were responsible for the summer pasturing of the lord's livestock (Sambrook and Page 1995, 14). The adjacent farm-name 'Rhandir' records the shareland process. After 1284, the bondmen petitioned the crown for maintenance of their rights to farm their hereditary lands. The estate may, nevertheless, have contracted into the present pair of farms at an early date. The pattern of enclosures presumably belongs to a post-shareland transitional phase; the irregular nature of the fields and their small size suggests, however, that they are not late creations. The present landscape was in place by at least 1839, when the tithe map for Llangadog parish was drawn up.

Description and essential historic landscape components

The Upper Cennen character area consists of the deeply incised Cennen valley and its tributaries. The valley bottom lies at approximately 150 m, the sides rise to over 200 m. On the south side the valley sides are steep, parts of those on the northern side are precipitous. The valley sides are heavily cloaked in deciduous woodland. The land lies under improved pasture which has been divided into small irregular fields by earth banks and hedges. Hedges are generally in good condition, and well maintained, though there is some neglect and dereliction; wire fences supplement all hedged boundaries. Farmsteads dispersed across the landscape provide the settlement pattern and are generally 19th century in date, vernacular and informal.

There is very little recorded archaeology in what is a small character area, being restricted to two earthworks of unknown nature, a Bronze Age findspot and a possible well site.

There are no distinctive buildings. Farmhouses are generally 19th century in date, stone-built with slate roofs, of two-storeys and three bays, and in the vernacular tradition. Associated old farm buildings are stone-built and again of 19th century date, relatively small and usually in an informal arrangement with the farmhouse.

Though this is geographically a distinct area, its historic components are shared with neighbouring areas (Areas 197, 200, 254 and 255) and therefore its boundaries tend to be a zone of transition, rather than a hard-edged border. Carreg Cennen Castle character area (Area 256) is an exception as a clear boundary exists here.

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). There are, however, few historic landscape conservation priorities in this character area. The decay evident in some of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Otherwise maintain as existing.

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 200 DAFADFA

GRID REFERENCE: SN 690209
AREA IN HECTARES: 339.00

Historic Background

A discrete character area lying on the northwest facing lower slopes of the Black Mountain, once part of Perfedd commote of Cantref Bychan, which was invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon but was subject to episodes of Welsh rule until 1276 when it was granted to the Gloucestershire knight John Giffard (Rees 1953, xv). It retained native tenurial customs until the end of the Medieval period by which time, at least, Perfedd was divided into two *maenorau*, this character area lying within Maenor Gwynfe. The area appears to have comprised unenclosed moorland, probably held as common or 'waste', until the Post-Medieval period when the present pattern of relatively large, regular enclosures was established. A sheepfold, in the north of the area, has given the two farms Dafadfa Uchaf and Dafadfa Isaf their names and can therefore be assumed to pre-date them; the farms were present by the early 19th-century and are marked on the Ordnance Survey 1" Old Series. The landscape had assumed its present form by 1839 (Llangadog tithe map) and there has been little subsequent change.

Description and essential historic landscape components

Dafadfa is a roughly rectangular character area which lies on a hilly and undulating south-facing slope between the heights of 250m and 320m. The land is entirely enclosed in a system of medium-sized fairly regular enclosures. On lower slopes fields are small and tend to be irregular rather than the regular; at higher levels they are larger and more regular. Fields are divided by earth banks topped with hedges. At higher levels hedges are becoming overgrown and neglected, with gaps opening in them, but at lower levels they are generally well managed. Wire fences supplement all hedges. Distinctive hedgerow trees are rare, and woodland is confined to a couple of small secondary copses and plantations on the lower slopes. Land-use is almost entirely improved pasture, with a little rougher, rushy ground. The settlement pattern is of widely dispersed farms and, overall, the enclosure- and settlement pattern indicates a landscape that has only been colonised in relatively recent times, perhaps the 18th century.

Recorded archaeology is limited to the sheepfold and a Bronze Age burnt mound.

Farmhouses are stone-built with slate roofs, date to the 19th century and are in the vernacular tradition. Stone outbuildings are also 19th century and are relatively small. Most farms have large modern agricultural buildings associated with them. There is also a 19th century chapel.

This is a distinct character area. It contrasts with the areas to the south, west and east (Areas 198, 233 and 255) which contain smaller irregular fields, woodland and a denser but nevertheless dispersed settlement pattern, and with the areas to the north, northeast and northwest (Areas 231 and 254) which have a looser enclosure and settlement pattern.

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). However, there are few historic landscape conservation priorities in this character area. The decay evident in some of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Otherwise maintain as existing.

Ground photograph: 66

Aerial photographs: 22, 56

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 203 ALLT TREGYB

GRID REFERENCE: SN 657214
AREA IN HECTARES: 913.10

Historic Background

A large area occupying the south-east side of the Tywi Valley east of Llandeilo. It lay within Iscennen commote, specifically within Maenor Llys, of which Nant Breinant - which partly forms the northern edge of this area - was a named boundary in the 16th century (Rees 1953). Iscennen, unlike the rest of Cantref Bychan within which it lay, remained nominally independent of Anglo-Norman rule until 1284 when it was acquired by John Giffard. In 1340 it became a member of the Duchy of Lancaster (Rees 1953, xv-xvi). The eastern half of the character area is marked as 'Brenaye Forest' on Rees' map of South Wales in the 14th century (Rees 1932), but the medium-sized irregular enclosures in this area contrast with the larger, regular enclosures to the north, south and further east - some of which are 19th century enclosure of former common - and are probably earlier, though possibly still Post-Medieval. Rees' map also shows a straightish, intermittent unclassified road running WSW-ENE across the spine of the area. The western end of the area belonged to the vill (later estate) of Tregyb (Area 202) and although there is little difference in the landscape here, it is more wooded and features the name Tregyb Warren. The later history of the area is overwhelmingly pastoral although a factory near Tregyb is marked on 19th century maps.

Description and essential historic landscape components

Allt Tregyb character area lies on north-facing undulating and hilly slopes of the Tywi Valley between 30m and 220m. The valley side has a heavily wooded appearance, but this is more apparent than real, for although there are considerable stands of ancient deciduous woodland, and recent more scrubby woods and small conifer plantations, the overall characteristic of the area is one of small irregular fields and widely dispersed farms. Improved pasture is common, but there are many fields of rougher- and rushy-ground, reflecting the pockets of poorer land on the north-facing slopes. Some fields have recently been invaded with scrubby woodland. Fields are usually divided by earth banks topped with hedges, but some stony banks and stone-faced banks lie at higher altitudes. Hedges are in a variety of states of management, but are usually either well-maintained and trimmed or overgrown with distinctive hedgerow trees. Farmhouses and cottages in the vernacular style of 19th century date are the chief types of dwellings. Larger farmsteads are present, but most are relatively small for Carmarthenshire and consist of a limited range of stone-built farm buildings, sometimes compacted into a single range. Some farms have large modern agricultural buildings associated with them. Stone-built, single storey 19th century cottages at Gurnos-Cwmdu suggest squatter settlement-encroachment onto common land that fringed part of this area.

Recorded archaeology is limited to a scheduled standing stone, a Bronze Age findspot and a possible enclosure (undated).

There are no distinctive buildings.

This is a fairly well defined area and contrasts with the less wooded, richer land and larger farms of areas that lie to the north, east and west (Areas 190, 197, 225, 226), and with the higher less strongly enclosed land to the south (Area 231).

Conservation priorities

Part of this area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). Decay evident in some of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Consideration should also be given to the maintenance of other boundary types and to the management of the ancient broadleaf woodland. Historic farm buildings form an important component in this landscape. Although most are in use and in

a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations.

Aerial photographs: 30

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 204 FELINDRE

GRID REFERENCE: SN 699275

AREA IN HECTARES: 69.86

Historic Background

A small area to the south-east of the River Tywi lying immediately to the west of Carreg-Sawdde Common (Area 205). It was once part of Perfedd commote of Cantref Bychan, which was, with the exception of Iscennen, invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, Cantref Bychan was subject to episodes of Welsh rule until 1276 when it was granted - to be reunited with Iscennen - to the Gloucestershire knight John Giffard (Rees 1953, xv) and retained native tenurial customs until the end of the Medieval period. Carreg-Sawdde represents an area of remnant common within what may formerly have been an extensive tract of unenclosed grazing. However, by the 14th century Felindre was a demesne estate of the Lordship of Llandovery (Rees 1924, 100), presumably named from a pre-existing corn mill, and within which agriculture was practised; 15 bond men - the only bond tenants of the lordship - farmed 18 acres in 1317 (*ibid.*). Like the *maerdref* at Ferdre, Carreg Cennen (Area 198), Felindre had its own court and was administered by a reeve. In 1383 it was granted an annual fair by the successor to the Gifford Lords of Llandovery, Nicholas d'Audley (*ibid.*), which was still being held in 1601 (Sambrook and Page 1995, 22). However, the system of small, axial, regular rectangular fields which form a distinctive block to the west of the village may result from 18th century squatting on the edge of the common, rather than a fossilisation of Medieval strip fields; moreover the fields occupy a total of 172.60 acres. The system was in place - and Felindre was a nucleated settlement - by 1839 when the tithe map of Llangadog parish shows a landscape identical to the present.

Description and essential historic landscape components

Felindre is a small character area that lies on a terrace on the south side of the Tywi and west of the Sawdde at approximately 45 m OD, a few metres above the flood plains of the rivers. It consists of a small nucleation of dwellings at Felindre, and several dispersed small-holdings/farms. Felindre is a mixture of 19th- and 20th-century dwellings. Several stone-built small-holdings, in the vernacular tradition, are dispersed outside the nucleation and most have a small range of outbuildings associated with them. A distinctive but small enclosed strip field system is associated with the settlement. Earth banks with hedges comprise the boundaries to these fields. Hedges are generally well maintained and some have distinctive trees, but a few have gaps opening up in them. Wire fences support all hedges. There is no woodland in this area, and almost all ground is under improved pasture.

Recorded archaeology relates to the settlement and includes the present Post-Medieval watermill and the village with a pigsty and a smithy.

There are no distinctive buildings. Felindre itself has 19th century stone-built dwellings, in the vernacular style, intermixed with 20th century dwellings in a variety of styles and materials. The farmhouses of the several small-holdings dispersed outside the nucleation are stone-built, of 19th century date, in the vernacular tradition and generally of two storeys with slate roofs.

The strip field system and nucleated settlement make this a very distinctive character area. It stands in contrast to unenclosed common to the east (Area 205), the Tywi flood plain to the north (Area 196), and areas of dispersed farms and irregular fields to the south and west (Area 225).

Conservation priorities

There are few historic landscape conservation priorities in this character area as most of the historic landscape components are in a reasonable state of preservation. However, the decay evident in some of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations.

Aerial photographs: 24, 58, 59

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 205 CARREG-SAWDDE COMMON

GRID REFERENCE: SN 702279

AREA IN HECTARES: 78.59

Historic Background

Carreg-Sawdde represents an area of remnant common within what may formerly have been a more extensive tract of unenclosed grazing. It lay within Perfedd commote of Cantref Bychan, which was, with the exception of Iscennen, invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.); it was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, there were many episodes of Welsh rule, and the area retained native tenurial customs until the end of the Medieval period. The common appears to have become part of the *patria* of Llangadog when the area was acquired by the Bishops of St Davids in the later 13th century (Rees 1932), from which point the right of pasture appears to have belonged to the burgesses of Llangadog (Area 206). The common occupied more-or-less its present extent by at least 1839, when the tithe map of Llangadog parish recorded a landscape very similar to the present. There has been some limited subsequent encroachment particularly at the south-east end adjacent to Area 235 (Castell Meurig) and as 'islands' within the common, while some of the trackways depicted on early maps appear to have become disused.

Description and essential historic landscape components

Carreg-Sawdde Common lies on the flood plain of the Afon Sawdde at approximately 45m. The A4069 (turnpike) road crosses part of the south-east side of the common. A B-road from Llangadog to Felindre crosses the common towards its southern end, and the Afon Sawdde over a 20th century bridge (occupying the site of an earlier crossing). The common is open, rough grazing land apart from a small 'island' of tightly-packed buildings in the centre, and a modern sewage treatment works. The buildings are encroachments on to the common and comprise late 19th century two-storey houses through to late 20th century bungalows.

Recorded archaeology is limited to a findspot of uncertain date.

There are no distinctive buildings

This open common contrasts to the nucleated settlement and associated fields of Felindre (Area 204) to the west, with Llangadog urban character area (206) to the east, and with enclosed farmland and dispersed farms on other sides (Areas 208, 235).

Conservation priorities

There are no historic landscape conservation priorities in this area.

Ground photograph: 71

Aerial photographs: 24, 58

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 206 LLANGADOG

GRID REFERENCE: SN 698283

AREA IN HECTARES: 35.32

Historic Background

A small area corresponding with the built-up area of Llangadog, a settlement with Medieval origins. It is the site of a possible pre-Conquest ecclesiastical community which probably occupied the site of the present church of St Cadog. The church may be referred to in the pre-conquest Book of Llandaff (Soulsby, 1983, 169). However, doubt has been cast on Cadog representing the original dedication, being a secular figure whose name has supplanted that of the original dedication to St David (Yates 1973, 58), suggesting a link with St Davids Cathedral that had become cemented by the later 13th century when the Bishops were in possession of the *patria* of Llangadog. Llangadog also lies just two miles north of Llys Brychan (Area 225), one of only three suggested Roman villa sites in Carmarthenshire (Jarrett 1962), and the importance which must have been attached to the site and the locality may have remained undiminished into the post-Roman period. A system of boundaries around the parish church, moreover, may perpetuate the line of a large *llan* (Sambrook and Page 1995, 5). The area became part of Perfedd commote of Cantref Bychan, which was, with the exception of Iscennen, invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery but was subject to episodes of Welsh rule throughout the 12th- and 13th-century. A motte-and-bailey castle was established, probably as part of the initial Anglo-Norman campaign, at Castell Meurig (Area 235) some 1.5 km southeast of the church. It was captured 'by catapults and slings' by Prince Maelgwn ap Rhys in 1203 (Jones 1952, 82) after which it may have become disused; at any rate, it appears not have influenced any civil settlement, the origins of the town lying with the presumed small ecclesiastical community. Its development was encouraged by the Bishops of St Davids who in 1281 granted a market and annual fair, and in 1283 founded a college at the church for a precentor and 21 canons (Soulsby 1983, 169). The latter was however short-lived, being transferred to Abergwili in 1287, and doubt has been expressed as to whether the intention was ever carried out (Knight 1919, 12-13), though the remains of buildings to the north of the church seen in 1855 were said to belong to the college, and canons were recorded in 1289 (Lewis 1937, 237). 33 burgesses and 8 other tenants were recorded in 1326 (Soulsby 1983, 169). At its height Llangadog held a weekly market and seven annual fairs, held in the churchyard according to George Owen in 1601 (Sambrook and Page 1995, 22). However, it has very little subsequent recorded history and appears to have functioned as a small local centre, albeit with a coaching inn, not expanding beyond its Medieval limits. Recent developments include the construction in c.1839 of a terrace, Ashfield Row, on the A40(T)/former turnpike west of the Tywi, linked to the town by a bridge (Bont-ar-Towy), rebuilt in 1819, and by intermittent development including the railway station, opened by the Llanelly Railway and Dock Company in 1858 and later part of the LNWR West Wales line (Gabb, 1977, 76), and also the later 20th century creamery which is now the main economic resource of the community.

Description and essential historic landscape components

Llangadog character is essentially urban in character and consists of the historic core of the settlement, which lies on a terrace between the rivers Bran and Sawdde just upstream of their confluence with the Tywi, together with linear development to the south of Bont-ar-Towy bridge. Two limbs of the A4069, leading from the Black Mountain to Llandovery, meet in the town. The A40(T) runs east-west on the opposite side of the Tywi. Centred on the Medieval St Cadog's Church, Church Street and a small 'square', Llangadog is little more than a village in size. Burgage plots, however, are traceable either side of Church Street on the Llangadog tithe map of 1839. Imposing three-storey dwellings in the Georgian tradition, and the coaching inn on the square, now provide urban character. Dwellings on Church Street are mostly two storey, stone-built, 19th century terraced cottages. Later 19th-century 'villas' and chapels occupy the fringes of the historic core in dispersed linear development along the A4069 to the north, south and east. A small secondary settlement of 19th century date lies west of the town centred on a public house, the railway station, and Ashfield Row on the A40(T). Land from the

historic core to the railway station is now almost fully occupied by the large post-Second World War creamery and more recent light industrial units. 20th century housing is mostly confined to small estate development, and individual units to the east and southeast of the historic core. This modern development is in brick or concrete and is in contrast to the stone-built houses of the historic core and 19th century linear development.

Recorded archaeology is confined to the church and churchyard and a possible Bronze Age round barrow, while a battle-site may be recorded in a place-name.

There are 8 listed buildings within the town including the Medieval St Cadocs Church (Grade B listed) with a landmark tower. The rest are mainly Post-Medieval, Grade II listed and include the vicarage, coaching inn, Bont-ar-Towy and private houses. Other buildings include nonconformist chapels, a tollgate on the A40(T) and a former smithy.

Llangadog is a distinctive character area, and stands in sharp contrast with neighbouring enclosed farmland (Areas 207, 208, 225, 235), and with unenclosed common (Area 205) which lies to the east.

Conservation priorities

Conservation priorities centre on the Conservation Area and individual listed buildings. Other than these it is important to maintain the nucleated coherence of the town by discouraging ribbon- and dispersed-development at the settlement fringes

Ground photographs: 72

Aerial photographs: 24, 58

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 207 CEFNGORNOETH

GRID REFERENCE: SN 716299

AREA IN HECTARES: 308.50

Historic Background

An area southeast of the Tywi, once part of Perfedd commote of Cantref Bychan, which was invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons, who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, there were many episodes of Welsh rule and the area retained native tenurial customs until the end of the Medieval period when it was incorporated into modern Carmarthenshire. Most of this character area formed part of the *patria* of Llangadog which was acquired by the Bishops of St Davids in the late 13th century (Rees 1932). A 'Tyddyn' farm name suggests Medieval settlement and formalised land-division, and the area is characterised by small irregular enclosures which may be at least late Medieval in origin. The present farm Wernfrena appears to represent the site of an early Post-Medieval house which has now been rebuilt (Jones 1987, 89).

Description and essential historic landscape components

Cefngornoeth character area lies over a low hilly ridge on the south side of the Afon Tywi, between the valleys of the Tywi and the Bran. The ridge rises from approximately 45m on the Tywi valley floor to over 110 m on the low rounded hills. This is essentially a landscape of small irregular fields, small stands of deciduous woodland, some of which may be ancient, and dispersed farms. Farmland is almost totally under improved pasture. Field boundaries are earth banks topped with hedges. Hedges are generally in good condition, with very few overgrown or derelict. Some possess distinctive hedgerow trees. Close to Cefngornoeth house a small area of parkland merges with the surrounding landscape. The stands of trees on the valley side of the Tywi lend a wooded aspect to this side of the character area. Farmsteads are mostly 19th century date and vernacular, with informal farm buildings that include some modern buildings.

Recorded archaeology is limited to a Bronze Age findspot.

There are few distinctive buildings. Farmsteads are mostly of 19th century date, stone-built and in the vernacular tradition; associated old farm buildings are similarly stone-built and generally have an informal arrangement with the farmhouse, while most farms have a range of modern agricultural buildings. There is the usual scatter of Post-Medieval cottages and dwellings. Wernfrena and Cefngornoeth are more substantial houses in a more polite tradition.

This character area is not easy to define as it possess many historic components that are also possessed by its neighbours. To the north, where it meets the Tywi valley there is a fairly distinct border between it and the rather less intensely enclosed land of the flood plain (Area 208). There is also good definition to the west against the urban unit of Llangadog (Area 206). To the south and east there is a zone of change, rather than a clear-cut border, between this area and Area 235.

Conservation priorities

There are few historic landscape conservation priorities in this character area as most of the historic landscape components in this character area are in a reasonable state of preservation. However, the decay evident in a few of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Consideration should be given to the management of the ancient broadleaf woodland. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations.

Ground photograph: 73

Aerial photographs:

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 208 YSTRAD TYWI: LLANGADOG - LLANDOVERY

GRID REFERENCE: SN 723316

AREA IN HECTARES: 925.40

Historic Background

A large, narrow area stretching from Llangadog in the southwest to Llandoverly in the northeast, which lies in the fertile alluvial floodplain of the River Tywi. The valley was the major historic route corridor into West Wales and the Roman road from Carmarthen to Llandoverly, which lies just within the northwest edge of this character area, followed the interface between the alluvium and the solid geology of the north side of the Tywi. A later turnpike more-or-less followed the course of this Roman road, as does the present A40(T) - see Areas 182 and 196. The River Tywi in this area is active and subject to course changes across the valley floor, and the wooded nature of the valley was commented upon by early writers including Leland in the 1530s (Smith 1906), who appear to be describing the floodplain. Therefore, the present pattern of regular fields is probably of later date, while enclosure may have been undertaken during the 18th century, but had definitely taken place by the time the tithe surveys were conducted in the second quarter of the 19th century. In addition, settlement on the floodplain has always been minimal. There are, however, a few farms and dwellings in the area, also occupying the interface or situated upon glacially derived 'islands' within the floodplain; one of these, Pentremeurig, has 16th century origins and was assessed for 7 hearths in 1670 (Jones 1987, 155). The disposition of these habitations may then reflect earlier settlement patterns. Peat deposits have been noted between the alluvium and the underlying geology elsewhere within the Tywi Valley (Page 1994, 4.9), where they were thought either to represent such 'islands' in the floodplain, or a drying of the floodplain (see also Area 196) and while no prehistoric sites have been recorded within the area it must be stressed that within the Tywi Valley, this period is among 'the least known' (Cadw/ICOMOS, 1998, 28). During the Medieval period the river formed one of the major boundaries of Carmarthenshire, separating Cantref Mawr on the north bank from Cantref Bychan on the south bank (Rees, 1932). As such, the landscape area has experienced a chequered history of tenure and was troubled by warfare until the end of the 13th century; Cantref Mawr, unlike Cantref Bychan which was subject to 12th century conquest and reconquest, remained an independent Welsh lordship until 1284 (Rees 1953, xv) and the Post-Medieval house at Ystrad may be the site of the Medieval *llys* of Gwestfa Ystradmynys within which this area partly lay. There does not appear to have ever been a bridge across the Tywi between Llangadog and Llandoverly but there were at least two, possibly three historic fords. The turnpike, established in 1763-71 (Lewis 1971, 43) more-or-less followed the line of the Roman road and is now represented by the A40(T). The A4069 on dry ground between Llangadog and Llandoverly on the south side of the valley also follows the line of a turnpike begun in 1779 (*ibid.*). The floodplain, meanwhile, is crossed by the former LNWR main West Wales railway line which was opened, as the 'Vale of Towy Line', by the Llanelly Railway and Dock Company in 1858 (Gabb, 1977, 76). Little industry has developed in this area although a woollen factory possibly operated at Pentremeurig.

Description and essential historic landscape components

This area comprises the flood plain of the Tywi together with the lower, gently sloping valley sides. Within this area the flood plain of the Tywi rises some 20 m, from 40 m OD at the west end to 60 m OD at the east end, over a distance of 7 km. The lower valley sides rise up to a maximum of 60 m to 70 m. Above these lower slopes valley sides rise steeply, particularly on the northern side towards Llandoverly, to over 150 m. This part of the Tywi valley provides a natural route-corridor. The Romans utilised the route for the Llandoverly-Carmarthen road, and in more recent times turnpike roads were constructed on both sides of the valley. The course of the turnpike on the northern side is now followed by the A40(T), that on the south side by the A4069. The railway that runs along the flood plain on a low embankment also uses this route corridor. Where areas of deposition and erosion are evident on the Tywi there is no strong field patterning, and scrubby, rushy ground prevails. These areas are, however, fairly restricted and most of the area is divided into reasonably regular, medium-sized fields. Field boundaries are hedges without banks and earth banks topped with hedges. The former are planted on the valley floor presumably to facilitate flood-water drainage. Some hedges are accompanied by

ditches. Most hedges are well maintained, though a significant number are becoming derelict. Wire fences supplement most hedges. Many hedges possess distinctive hedgerow trees, and these, together with isolated trees and small copses lend a parkland aspect to the area. This may be a planned effect, designed to merge with the parks on the north side of the valley associated with gentry houses. Settlements are confined to low terraces which lie slightly above the flood plain and to the valley sides. A wide range of economic and social classes are represented by the buildings of the area from the gentry house of Ystrad, with an area of parkland, through to small roadside cottages. However, the settlement pattern is dominated by farms dispersed along a river terrace to the south of Llanwrda, on the lower slopes of both sides of the river. Farmhouses are quite substantial and tend towards the 'polite' with extensive, large semi-formal outbuildings, mainly supplemented with modern agricultural buildings.

Recorded archaeology is confined to buildings and the ford sites.

There are many distinctive buildings but none are listed. They include the gentry house at Glan-Dulais, the 18th- and 19th-century Ystrad house and park, and Pentremeurig with 16th century origins. Farmhouses are generally quite substantial - more so than the simple two storey, three-bay structures common elsewhere - and generally of 18th- or 19th-century date, stone built and polite, rather than vernacular. 20th century brick-built farmhouses are also present. Farm buildings are also large and are often arranged in a semi-formal setting with the farmhouse. 19th century stone-built examples and 20th century brick outbuildings are represented, and most farms possess large assemblages of modern agricultural buildings

This is a fairly distinct character area, and contrasts with the character areas of enclosed farmland with smaller farmsteads that bound it to the north and south (Areas 201, 207, 210, 214, 228, 257), with the urban areas of Llangadog and Llandovery (Areas 206, 212), and with former parkland to the northeast (Area 209).

Conservation priorities

Most of the historic landscape components in this character area are in a reasonable state of preservation. However, the decay evident in some of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations. Otherwise maintain as existing.

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 222 CARN GOCH

GRID REFERENCE: SN 690245

AREA IN HECTARES: 129.70

Historic Background

A small area southeast of the Tywi dominated by Carn Goch, a craggy hill on which lie the substantial remains of Carmarthenshire's largest Iron Age hillfort. At 15 ha, and associated with a satellite fort, Carn Goch fort may have approached *oppidum* status and have been the centre of a large territory taking in most of the area south of the Tywi. There is evidence for earlier occupation of the site, possibly into the Neolithic, and the significance of the site may have persisted after its abandonment under Roman rule - the most plausible villa site in southwest Wales, Llys Brychan (Jarrett 1962), lies only 1.6 km to the northeast (Area 225). During the historic period the area lay within Cwmwd Perfedd, specifically Maenor Vabon, of Cantref Bychan, which was, with the exception of Iscennen, invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, there were many episodes of Welsh rule and the area retained native tenurial customs until the end of the Medieval period when it was incorporated into modern Carmarthenshire. There is currently no evidence for the continued occupation of the hillfort(s) and the area appears to have been open common land during the Medieval period and into the Post-Medieval period; however it contains the remains of longhuts and associated enclosures, which are characteristic of early Post-Medieval settlement in upland southwest Wales (Sambrook and Ramsey 199). Such settlement may represent squatting, however, and there appears to have been little subsequent settlement; apart from some 18th- and early 19th-century encroachments along the northern fringe, the area is still largely unenclosed, as it is on historic maps.

Description and essential historic landscape components

Carn Goch is a rounded bracken-covered hill on the south side of the Tywi valley. From the floor of the Nant Geidrych valley on the north at approximately 100 m, craggy scree slopes rise to over 230m. Southern, western and northern flanks have less elevation, and are less precipitous and less craggy. Parts of the more gently-sloping northeastern slopes were formerly enclosed by earth banks and dry-stone walls, associated with the longhuts, but these have broken down. Recent land improvement has taken place in the area of old enclosures. The major defining historic landscape element of this character area are the remains of Carn Goch Iron Age fort and satellite fort. The remains are massive, and comprise rubble-built ramparts, several metres high and many hundreds of metres in length.

The recorded archaeology is dominated by the Iron Age hillfort and its satellite fort represented by ramparts, ditches and hut platforms. Earlier occupation is suggested by Bronze Age finds, a round barrow and a possible burnt mound, as well as a possible Neolithic site. There are also early Post-Medieval longhuts and field systems. Most of these sites are scheduled.

There are no standing buildings.

Carn Goch character area is very distinctive and stands in sharp contrast with the surrounding enclosed farmland (Areas 225 and 226).

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). There are, however, few historic landscape conservation priorities in this character area. Some consideration should be given to the restoration of old boundaries. The main thrust of any conservation work must involve the maintenance of the ramparts and interiors of the Iron Age forts.

Aerial photographs: 23

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 225 BETHLEHEM

GRID REFERENCE: SN 690251
AREA IN HECTARES: 1737.00

Historic Background

A very large character area on the southeast side of the Tywi valley between Llandeilo and Llangadog, including part of the lower Sawdde valley. During the historic period the area lay within Cwmwd Perfedd of Cantref Bychan, which was invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, there were many episodes of Welsh rule and the area retained native tenurial customs until the end of the Medieval period when it was incorporated into modern Carmarthenshire. The eastern section of this character area formed part of the *patria* of Llangadog which was acquired by the Bishops of St Davids by the late 13th-century (Rees 1932). The area may have been a focus for human settlement with status and/or ritual associations from an early date. A Neolithic chambered tomb and a Bronze Age standing stone lie centrally within the area. The large Iron Age hillfort of Carn Goch, Area 222, intrudes into, and dominates Area 225, and was probably the centre of a large territory taking in most of the area south of the Tywi. There is evidence for early occupation of this site, possibly into the Neolithic, and the significance it gave to the area may have persisted after its abandonment under Roman rule - the most plausible villa site in southwest Wales, Llys Brychan, lies within Area 225 only 1.6km to the northeast of the fort (Jarrett 1962). Its name suggests that Llys Brychan was (re)occupied during the Medieval period as an administrative centre or *llys*, with connections - putative or otherwise - with Brychan, a dominant figure in early Medieval tradition. It is still the site of a dwelling. By the post-Conquest period, however, the majority of this area west of the Sawdde was administered within Cwmwd Perfedd as Maenor Vabon, from a centre, Llys Hendy, now represented by the Post-Medieval house at Manoravon/Crymlyn Manor (Rees 1932) recorded since the 18th century (Jones 1987, 130). The continuing status of this area is demonstrated by the perceived importance of the neighbouring Llangadog (Area 206) during the Medieval period, with a chapel-of-ease to Llangadog parish at Capel Tydist, the site of a house since at least the early 19th-century (Jones 1987, 21), and a further possible chapel site. Gentry houses are numerous within the area, and many of them were acquired by the Dynevor estate including Mandinam, established by the 17th century and said to have been the residence of Jeremy Taylor following his chaplainship to the Earl of Carbery at Golden Grove (Jones 1987, 7), and Tygwyn which was the residence of the Vaughans of Derwydd in c.1650 with a demesne which comprised 214 acres in 1879 (Jones 1987, 190). Llwynymendy has origins within the 17th century at the latest (Jones 1987, 121) as do Pentre Parr and Beili-Dyffryn (Jones 1987, 7, 153), which later became part of the Dirleton estate. Nevertheless the present pattern of enclosures, which was in place by the early 19th-century (Llandeilo Fawr and Llangadog tithe maps), may have been established by the Medieval period - they are very irregular with many stands of ancient deciduous woodland. The steep-sided valley of the Afon Sawdde is a natural line of communication and the A4069 was a major Post-Medieval droving route, turnpiked from 1779 (Lewis 1971, 43). Typical 19th century rural development is exemplified by Bethlehem which is a nucleation around Bethlehem chapel on the present Llandeilo-Llangadog road - also a turnpike - and shown as a cluster of cottages in 1839, to which a post office and school were added later in the 19th century (Sambrook and Page 1995, 40). A 20th century housing estate has been added but overall there has been little recent development.

Description and essential historic landscape components

Bethlehem is a very large character area. It runs along the south side of the Tywi valley from just southeast of Llandeilo upstream past Llangadog and across the Sawdde valley. It rises in a series of low, rounded hills from 30 m on the Tywi floodplain to over 130 m on the southeastern flanks of the area. Dissecting the landscape are numerous small, steep-sided valleys. Essentially this is a landscape of dispersed farms, small pasture fields and small woods. Boundaries to the fields consist almost entirely of earth banks topped with hedges, but a few stone-faced banks lie on higher ground. Hedges are generally in good condition and are well maintained; many have distinctive hedgerow trees. Land-use is

predominantly improved pasture, with very little rough and rushy land. Deciduous woodland is mostly confined to the steep valley sides, where it provides a distinctive landscape component. Close to the Tywi valley the landscape has a parkland character; this is emphasised close to Crymlyn Manor by single trees and small clumps which indicate old park planting. There are numerous small, and one medium-sized conifer plantations in the area, mostly on higher ground. There are no nucleated settlements, the loose cluster of houses, a school and post office at Bethlehem is the only aggregate settlement of note. Dispersed farms and other houses dominate the settlement pattern. Most buildings are of 19th- and 20th-century date and stone built. There is a range of farmhouse types, but the majority are two-storeys and three-bays and in the vernacular tradition or more polite 'Georgian' style of the early- to mid-19th century. Larger dwellings are present, and smaller houses and cottages. The range of old, stone-built, 19th century farm buildings also reflects prevailing social and economic class; most are substantial ranges, often semi-formally arranged around a yard, though single ranges of smaller buildings are present on the smaller farms. Nearly all farms have modern agricultural buildings. Superimposed onto the old-established pattern of dispersed farms is a scattering of a small number of later 19th- 20th-century dwellings, in a variety of styles and materials.

Recorded archaeology is rich and diverse, comprising one definite and one possible Neolithic chambered tomb/Bronze Age long barrow, a Bronze Age standing stone and a possible round barrow. Also there is a further Iron Age hillfort on the western slope of Carn Goch (Area 222), and another hillfort to the west. Llys Brychan was excavated in 1961 when it was concluded to be a probable Roman villa site (Jarrett 1961). From the Medieval period are a chapel site and possible chapel site, while from the early Post-Medieval period are possible pillow-mounds, a well and a rubbing stone, in addition to enclosures of unknown date.

There are many distinctive buildings, and high-quality farmhouses. Mandinam house is Grade II listed and mainly from the 18th- and 19th-century, with double-saddle roofs. The contemporary houses at Tygwyn, Llwynymendy, Pentre Parr with its lodge and park, and Beili-Dyffryn are unlisted. The present farmstead at Llyshendy was built for the Dynevor estate (Judith Alfrey, *pers. comm.*). The chapel, school and post office at Bethlehem should be noted, in addition to mills, cottages and dwellings, bridges and a smithy site.

To the north this character area is well defined by the flood plain of the Tywi valley (Area 196) and by Felindre character area (Area 204). Where this area borders higher ground boundary definition is also good - to the south against Carn Goch (Area 222), Garn-wen (Area 226) and others (Areas 229, 230), but elsewhere (bounding Areas 203, 228 and 235) there is a zone of change rather than a hard-edged border.

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). Most of the historic landscape components in this character area are in a reasonable state of preservation and therefore there are few historic landscape conservation priorities. However, the decay evident in a few of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Consideration should be given to the management of the ancient broadleaf woodland. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations.

CARMARTHENSHIRE: TYWI VALLEY

HISTORIC LANDSCAPE CHARACTER AREA: 226 GARN-WEN

GRID REFERENCE: SN 700240
AREA IN HECTARES: 218.60

Historic Background

A small character area on the southeast side of the Tywi Valley between Llandeilo and Llangadog, dominated by the large Iron Age hillfort of Carn Goch (Area 222) which rises just beyond the northern edge of Area 226 and was probably the centre of a large territory taking in most of the area south of the Tywi. During the historic period the area lay within Cwmwd Perfedd - specifically Maenor Vabon - of Cantref Bychan, which was invaded by the Anglo-Normans under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, there were many episodes of Welsh rule and the area retained native tenurial customs until the end of the Medieval period when it was incorporated into modern Carmarthenshire. The medium-sized irregular enclosures in this area contrast with the larger, regular enclosures to the southeast - which are 19th century enclosure of former common - and are probably earlier, though possibly Post-Medieval. The area contains just three farmsteads, all of Post-Medieval date. There has been little recent development but there are pockets of later 20th century conifer plantation.

Description and essential historic landscape components

Garn-wen character area is relatively small but quite complex as it lies between lower-lying farmland and a high unenclosed ridge. It has an 'upland farm' character feel to it. It lies on northwest-facing slopes between 190 m and 200 m. All the land has been enclosed, but fields at higher elevations are now breaking down. Three farms, Gurnos, Garn-wen and Tan-y-lan, lie within the area. The fields, though tending towards the irregular, have a definite northwest-southeast trend to their axes, perhaps indicating a single major episode of enclosure. Field boundaries exhibit a variety of types; dry-stone walls, earth banks and stony banks. The latter two are topped with hedges, which are in various stages of decay; at higher levels they have virtually gone, at lower levels they tend to be overgrown with distinctive hedgerow trees. Dry-stone walls are mostly derelict. Wire fences provide stock-proof barriers. Most land is improved pasture, but a medium-sized conifer plantation has been established over some former fields. Farmhouses are stone-built, probably 19th century, and have a substantial range of 19th century stone-built farm buildings associated with them, as well as very extensive modern agricultural buildings.

Only one archaeological site - a palaeolithic findspot - has been recorded, but is important and provides great time-depth.

There are no distinctive buildings.

Garn-wen is a well defined character area. To the northwest lies either the unenclosed moorland of Carn Goch (Area 222) or lower-lying farmland (Area 225), while on other sides is a high ridge (Area 231) of unenclosed land, or conifer plantations (Area 230).

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). The decay evident in some of the hedgerows, walls and other boundary types is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Otherwise maintain as existing.

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 229 RHIWIAU

GRID REFERENCE: SN 742261

AREA IN HECTARES: 406.40

Historic Background

A small character area on the northwestern flank of the Black Mountain. It once formed part of Cwmwd Perfedd of the former Cantref Bychan which was invaded by the Anglo-Normans under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery but retained native tenurial customs until the end of the Medieval period when it was incorporated within modern Carmarthenshire. The area lay in the further division of Maenor Llanddeusant, which may have been coterminous with the ecclesiastical parish of Llanddeusant. There is at present no settlement which may reflect the general situation at least within the historic period, when the area probably comprised unenclosed pasture. The present pattern of large, rectangular enclosures was in place by 1841 (Llanddeusant tithe map) but was probably the result of a fairly recent process possibly undertaken by one of the larger local landowners. The presence of a possible sheepfold suggests that the former landscape was unenclosed and pastoral. Evidence for earlier settlement, and time-depth, is provided by two Bronze Age round barrows. Small-scale mining activity is represented by Rhiw, a small, Post-Medieval lead shaft in the north of the area. There has been little recent development.

Description and essential historic landscape components

Rhiwiau character area lies across a southwest-northeast ridge which achieves heights of over 350m. There are no settlements. The ridge has been divided into medium- to large-sized fairly regular enclosures by earth banks and hedges. On the ridge crest these enclosures are now mostly redundant; the hedges have gone, and apart from wire fences it is an open area. On the flanks of the ridge hedges consist of straggling lines of overgrown bushes with occasional distinctive trees. Again wire fences provide stock-proof boundaries. The whole area is improved pasture with a little rough grazing on the highest areas and some steep slopes, and scrubby deciduous woodland on the steepest slopes. Because of the dereliction of the old boundaries, the ridge crest of Rhiwiau has an open unenclosed appearance.

Recorded archaeology comprises two Bronze Age round barrows, two *llan* place-names, Rhiw Post-Medieval lead mine, and a possible sheepfold.

There are no standing buildings.

Although Rhiwiau is a distinctive character area its boundaries are not hard-edged. There is a merging of this area with the neighbouring areas of enclosed farmland (Area 223). Only to the west against a forestry plantation (Area 230) is there a distinct boundary.

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). There are few historic landscape conservation priorities in this character area. Derelict boundaries should remain in their current condition, allowing the landscape to revert to its former open character. Consideration should be given to the management of the ancient broadleaf woodland.

Aerial photographs: 16, 19

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 230 PEN-ARTHUR PLANTATION

GRID REFERENCE: SN 717241
AREA IN HECTARES: 281.10

Historic Background

A small character area on the northwestern flank of the Black Mountain in the valley of the Afon Sawdde. It was once part of Cwmwd Perfedd of Cantref Bychan which was invaded by the Anglo-Normans under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery but retained native tenurial customs until the end of the Medieval period when it was incorporated within the modern Carmarthenshire. The area lay in the further division of Maenor Gwynfe, and within the ecclesiastical parish of Llangadog. The medium-sized irregular enclosures contrast with the larger, regular enclosures to the west - which are 19th century enclosure of former common - and are probably earlier, though possibly Post-Medieval. The area contains two farmsteads, Pen-Arthur and Pen-Arthur-isaf, a subdivision of a larger holding with an interesting name. In addition are two *Lletty* place-names; the steep-sided valley of the Afon Sawdde is a natural line of communication and the present A4069 was a major Post-Medieval droving route. A pound, and a possible fold, were established around the bridge over the Sawdde at Pont-ar-llechau, which became a place of some importance and occasional venue of the court leets of Myddfai (James n.d., 87). The road was turnpiked from 1779 (Lewis 1971, 43) encouraging further, commercial settlement at Pont-ar-llechau with the establishment of two public houses (both now closed), a tile quarry and a former woollen factory. A second woollen factory formerly lay at the west end of the area at Glandwr. There has been no recent development and the entire area is given over to later 20th century conifer plantation.

Description and essential historic landscape components

Pen-Arthur plantation lies over the eastern end of a ridge, which achieves heights of over 300 m, and covers the steep valley sides of the Afon Sawdde. Prior to afforestation several widely dispersed settlements were present and the whole of the area had been enclosed into medium- and large-sized enclosures. Earth and earth and stone banks of these enclosures survive under the plantation. Map evidence indicates that several dwellings survive in small clearings in the forestry - these were not examined in this study. The A4069/former turnpike runs down the Sawdde valley and so passes through this area. Apart from these early landscape elements, most of the historic components comprise tracks, drives and other features associated with the forestry.

Recorded archaeology provides the landscape with great time-depth comprising a possible Neolithic chambered tomb and an Iron Age hillfort, in addition to the Post-Medieval woollen factory sites and tile quarry.

There are no distinctive buildings but the former Three Horseshoes and Coopers Arms public houses at Pont-ar-llechau, adjacent to the former turnpike toll house, bridge, pound (and a sheepfold?), should be noted for historical value.

This area of forestry plantation is well defined by the neighbouring enclosed farmland (Areas 225, 226 and 233) and by semi-open high ground (Areas 229 and 231).

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995).

Ground photographs: 97

Aerial photographs:

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 232 MYDDFAI

GRID REFERENCE: SN 774304

AREA IN HECTARES: 910.9

Historic Background

An area around, and including, the present village of Myddfai. It formed the core of Maenor Myddfai, Cwmwd Perfedd, of the former Cantref Bychan which was invaded by the Anglo-Normans under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery but reverted to Welsh rule until 1282, and retained native tenurial customs until the end of the Medieval period when it was incorporated within modern Carmarthenshire. The village nucleus is represented by the parish church of St Michael which appears to be the primary component, lying centrally in a circular churchyard. The dedication may be pre-Conquest and the area is the site of a lost ECM (Sambrook and Page 1995, 4), but the church is not mentioned until 1284, when the advowson fell to King Edward I to be subsequently granted to the Bishop of St Davids (Ludlow 1998). Talley Abbey also possessed land around the village. In 1282 Maenor Myddfai, which may have been administered from Myddfai itself, became the Manor of Myddfai under the Lord of Llandovery, John Giffard (James n.d., 87). This event may be represented by the establishment of the moated site just south of the present village, which in turn may suggest that settlement around the church had already taken place. The manor, and the Lordship of Llandovery, were later held by the Audleys, and in the Post-Medieval period by the Vaughans of Golden Grove and the Earls of Cawdor (James n.d., 87). Of greater influence on the landscape history, however, were the resident gentry families of Cwm Ydw, the Bowens, resident since the 18th century (Jones 1987, 50) and Gorllwyn, home of the Prices since the 17th century (Jones 1987, 86), and also the nearby Cilgwyn Mansion and Llwynwormwood (Area 228). At any rate, the landscape within Area 232 was undoubtedly settled by the 17th century and the present pattern of medium-large enclosures was in place by 1840 (Myddfai tithe map). Small-scale mineral extraction in the area is represented by a Post-Medieval lead shaft, and a quarry. The village of Myddfai became a centre of droving activity during the 18th century with at least two inns (Sambrook and Page 1995, 23), and was sufficiently important - as the head of the parish - by the late 19th-century, to feature two chapels, a school and a post office. The present terraced housing was also constructed during the late 19th-century, replacing most of the earlier buildings. There has been some limited 20th century development which includes a sewage works just southeast of the village.

Description and essential historic landscape components

This character area is centred on the village of Myddfai which lies in the open bowl-like valley of the Afon Brân. The valley floor lies at approximately 100 m to 130 m, the valley sides rise to over 200 m. Essentially this is an area of dispersed farms and small fields. The whole landscape is enclosed into small- and medium-sized fields that tend towards the regular rather than the irregular. Boundaries are universally of earth banks topped with hedges. Hedges are in good condition, but with some dereliction, particularly at higher levels. Some hedges have distinctive hedgerow trees. Wire fences supplement most hedges. Farmland is almost entirely improved pasture. Small stands of deciduous woodland lie on some of the steeper valley sides, but these are few compared with the highly wooded appearance of neighbouring areas. The small nucleated village of Myddfai is centred on the Medieval church of St Michael. Several terraces of late 18th- and early 19th-century two-storey, stone-built (mostly rendered) cottages cluster around the church, with a little later 19th- and 20th-century residential development on the fringes of the village. Dispersed farms are the main settlement type of the area. Farmhouses are mostly 19th century in date, stone-built, two-storey, three-bays and generally in the vernacular tradition. Most farms have 19th century stone-built farm buildings as well as modern agricultural structures. The older buildings tend to be of one or two ranges, which are rarely arranged formally around a yard.

The recorded archaeology is from many periods and comprises a Bronze Age hoard, standing stone and ?round barrow, a lost ECM site from the early Medieval period, the church, a post-Conquest

moated site, and a lead mine and quarry from the Post-Medieval period. In addition are an unknown earthwork and cropmark site.

There are some distinctive buildings but few are listed. The landmark Medieval church, without a tower, is Grade B listed. A K6 telephone box in centre of the village is Grade II listed. There are a number of gentry houses including Llwynmeredydd, Cwm Ydw and Gorllwyn, rebuilt in the 18th- and 19th-century. The area also contains four chapels, a school, a public houses, post office and bridge.

Myddfai is not an easy character area to define as neighbouring areas (Areas 228, 233, 234) possess similar historic landscape components. However, it does have a more regular field pattern than its neighbours, is less wooded, and has a small nucleated village at its core.

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). Most of the historic landscape components in this character area are in a reasonable state of preservation. However, the decay evident in some of the boundary hedges is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Consideration should be given to the management of the ancient broadleaf woodland. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations. Ribbon- and dispersed-settlement on the fringes of Myddfai should be discouraged. Otherwise maintain as existing

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 233 LLANDDEUSANT - CAPEL-GWYNFE

GRID REFERENCE: SN 761261
AREA IN HECTARES: 4778.00

Historic Background

A very large character area on the northwest fringes of the Black Mountain/Mynydd Myddfai, lying within the former Cwmwd Perfedd of Cantref Bychan which was invaded by the Anglo-Normans under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery but later reverted to Welsh rule. In 1282 the Lordship was acquired by John Giffard and thereafter remained under English rule (James n.d., 87) but retained native tenurial customs until the end of the Medieval period when it was incorporated within modern Carmarthenshire. The area has strong 'Celtic' traditions - hagiographies suggest that St Paulinus, the reputed teacher of St David established a monastic college in the general area, dedicated to two saints (Sambrook and Page 1995, 4); the present dedication of Llanddeusant parish church is to SS Simon & Jude but may reflect an earlier joint dedication (Ludlow 1998). Capel Gwynfe has historically been a chapel-of-ease to Llangadog parish, but a system of boundaries adjacent to the church may perpetuate the line of a *llan* (Sambrook and Page 1995, 5). By the post-Conquest period Area 233 was divided between the Medieval Maenor Llanddeusant, coterminous with the ecclesiastical parish, and Maenor Gwynfe. The present pattern of small, irregular fields may well be early in date, and represent a system of small dispersed holdings that were well-established by the time of the tithe surveys of the early 19th-century. Indeed, the physical boundary between this area and the unenclosed moorland of Areas 239 and 240 to the south is well-defined as a masonry wall, suggesting a long period of stability without evidence for *ad hoc* encroachments. During the later Middle Ages the Lordship of Llandovery was held by the Audleys, and in the Post-Medieval period by the Vaughans of Golden Grove and the Earls of Cawdor (James n.d., 87). Both Coed Mawr and Llwynfron were recorded as dwellings of the Aubrey family in the 16th century (Jones 1987, 40, 121), Pant Hywel, Penrhiw and Penycrug were residences of the Lewis family (Jones 1987, 142) while the Lewis family of Gwynfe styled themselves 'Lords of Gwynfe' (Jones 1987, 89-90). Nevertheless, the effects of gentrification have been less extensive within this character area than is general within the region and there is little parkland or 'polite' architecture. The area includes a network of Post-Medieval drovers routes, the most important of which followed the Sawdde Valley down from the Black Mountain to Llangadog; the current A4069 partly follows a drovers road, the 'Bryn Road', turnpiked from 1779 (DAT & CPAT, 1997, 5). The present nucleations are all late; the development of Capel Gwynfe, for example, was concomitant on the establishment of the turnpike running past the church which was rebuilt in c.1800 and again in 1898 (Ludlow 1998). Llanddeusant Church never became a focus for settlement, which instead developed around routeways, particularly the crossroads at Twyn-Illan and at Cross Inn (the latter with an inn). However, in all cases settlement is slight, and dispersed.

Description and essential historic landscape components

This is an extremely large character area. It runs for some 17 km southwest to northeast along the northern side of the Black Mountain, and is up to 5 km wide, southeast to northwest. It consists of rolling hills and deeply incised narrow valleys, ranging in height from 120 m in the valley bottoms to over 300 m on the summits of the higher hills and along the fringes of the Black Mountain. The historic landscape comprises small irregular fields, dispersed small farms and scattered woodland. The whole area has been enclosed into a patchwork of small fields by earth banks and hedges. Over such an extensive area there are clear differences of hedge management, but generally hedges are in good condition and well maintained, with derelict and overgrown examples usually occurring only at higher altitudes and along the fringes of the Black Mountain. A striking characteristic of this area is the very sharp boundary between it and the unenclosed land of the Black Mountain. On the ground this boundary is marked for at least part of its course by a dry-stone wall/stony bank. Other stony banks rather than earth banks were also noted close to the boundary of the Black Mountain, especially at the northeastern end of the area. Land-use varies across the area, but is predominantly improved pasture with pockets of rough grazing and rushy ground. Most of the steep valley sides are cloaked with

deciduous woodland. This together with distinctive hedgerow trees in areas of overgrown hedges lends a wooded aspect to parts of the landscape. A couple of small conifer plantations are present. Apart from the A4069, the old turnpike road which runs south to north across the area linking the south side of the Black Mountain with the Tywi valley, transport links are confined to numerous local minor roads, lanes and tracks. Settlement in the area comprises predominantly dispersed farms and other dwellings. Farmhouses are mostly 19th century, stone-built, two-storey, three-bays in the vernacular tradition. Traditional outbuildings associated with the farms are also 19th century and stone-built, and tend to be relatively small, often limited to just one range. Most farms have a collection of modern agricultural buildings. Early 19th-century buildings, including an old inn, in the polite 'Georgian' tradition are dispersed close to New Inn on the A4069 old turnpike road. Capel Gwynfe and Twynllanan are the only aggregate settlements in the area. Both are essentially hamlets, comprising a loose cluster of 19th century houses focused on chapels, with late 20th-century residential development in a variety of materials and styles. Other 19th century chapels in the area stand in isolated locations, as does the Medieval parish church of Llanddeusant. Outside the two hamlets, other late 20th-century development is limited to occasional isolated houses or bungalows.

Recorded archaeology from such a large landscape area takes in a range of sites from all periods. However, all features relate primarily to agricultural land-use.

There are a few distinctive buildings, but the older houses have mostly been rebuilt, and none are listed. Llwynfron, however, is a small gentry farmhouse with 17th century origins, Bedw-hirion is a similar house of 1796 and Ty Brych is a small farmhouse of the early 19th-century, all subject to consideration for relisting (Judith Alfrey, pers. comm.). SS Simon & Jude, Llanddeusant is a Grade B listed landmark Medieval church with a turret, while the unlisted Capel Gwynfe is from 1898-9, with a tower (Ludlow 1998) and an earlier 19th century church hall (formerly the church building). The boundary wall between this area and Area 240 is distinctive but now derelict.

The boundary of this area is very well defined against the Black Mountain to the south (Areas 239, 240), and against a forestry plantation to the north (Area 230). Elsewhere to the north between this area and its neighbours (Areas 229, 231, 232 and 234) there tends to be a zone of change rather than a hard-edged border. Definition is a little better to the west against the more regular field systems of Area 200.

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). Most of the historic landscape components in this character area are in a reasonable state of preservation. However, the decay evident in some of the boundary hedges, and in other boundary types is beginning to erode the historic character of parts of this area; this problem needs to be addressed. Consideration should be given to the management of the ancient broadleaf woodland. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations. Otherwise maintain as existing.

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 235 MAES-GWASTAD

GRID REFERENCE: SN 727290

AREA IN HECTARES: 500.30

Historic Background

An area southeast of the River Tywi which once formed part of Perfedd commote of Cantref Bychan, which was invaded by the Anglo-Normans advancing from the east under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, there were many episodes of Welsh rule and the area retained native tenurial customs until the end of the Medieval period when it was incorporated into modern Carmarthenshire. Most of this character area formed part of the *patria* of Llangadog which was acquired by the Bishops of St Davids in the later 13th century (Rees 1932). Medieval settlement and formalised land-division is suggested from place-name evidence in other areas that lay within the *patria* (eg. Area 207), and similarly the names within Area 235 suggest the presence of former open field strips, possibly belonging to the emerging borough of Llangadog (Area 206), and a quillet of such enclosed strips appears to lie at the north end of the area. The motte-and-bailey castle at Castell Meurig 1.5 km southeast of Llangadog appears to belong to the early, initial phase of Anglo-Norman campaign. It was captured 'by catapults and slings' by Prince Maelgwn ap Rhys in 1203 (Jones 1952, 82) after which it may have become disused; at any rate, it appears not to have influenced any subsequent settlement. The area's Post-Medieval history, during which the Lordship of Llandovery was held by the Vaughans of Golden Grove and later the Earls of Cawdor (James n.d., 87), was dominated by the gentry house at Glansevin which had been the home of the Lloyd family since the 16th century and was assessed at 8 hearths in 1670 (Jones 1987, 78). The dwelling itself, which is now a hotel, lies in Area 228 but the home farm and mill lie in this character area. Glansevin-issa, just to the north, is mentioned in 1634 when it was mortgaged for £100 to become part of the Dirleton estate in Area 201 (*ibid.*). The A4069 between Llangadog and Llandovery, which forms the northwestern edge of the character area, follows the line of a turnpike begun in 1779 (Lewis 1971, 43). Recent development, however, has been slight; a very small nucleation has developed around the 19th century non-conformist chapel at Sardis, off of the main route, whilst the northwest corner of the area, where it runs into Llangadog (Area 206), has seen some 20th century development.

Description and essential historic landscape components

Maes-gwastad character area occupies the wide valley floor of the Afon Brân to the east of Llangadog. It is relatively flat and lies between c. 60 m and 80 m above sea level. It is essentially a landscape of improved pasture fields and dispersed farms. Fields are medium- to large-sized and vary from the fairly regular to the irregular. Some are strip-shaped, indicating enclosure from an open field system. Boundaries are universally of earth banks topped with hedges. Hedges are very well maintained. The area has an open appearance owing to the fact that there are few hedgerow trees and very little woodland. The A4069 is a former turnpike; other routes are local lanes and tracks. The settlement pattern is one of dispersed farms. Farmhouses are stone-built, generally 19th century, two-storey and three-bays, with examples in the vernacular tradition as well as the more polite 'Georgian' style. 19th century outbuildings associated with the farms are substantial, as are modern agricultural buildings.

The recorded archaeology is dominated by the scheduled earthworks of the large, well preserved motte-and-bailey castle at Castell Meurig. There are also Iron Age or Roman finds, the enclosed Medieval open fields, and two unknown earthworks.

There are some distinctive buildings, but none are listed, including Glansevin Bridge, home farm and mill, Glansevin-issa, a Sunday school, and further mills and bridges.

This is not an easy area to define, as the neighbouring character areas share similar traits. However, the generally more wooded character and smaller field size of bordering areas (Areas 225, 228 and 207) provide sufficient differences to draw a reasonably hard-edged boundary to this area.

Conservation priorities

There are few historic landscape conservation priorities in this character area. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations.

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 239 BANC WERNWGAN - FOEL FRAITH QUARRIES

GRID REFERENCE: SN 721187

AREA IN HECTARES: 1378.00

Historic Background

An extremely large landscape area forming an east-west 'belt' on the northern flank of the Black Mountain. It once lay within Maenor Gwynfe, Cwmwd Perfedd, of Cantref Bychan which was invaded by the Anglo-Normans under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.). It was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery but later reverted to Welsh rule. From 1282 onwards the lordship remained under English rule but retained native tenurial customs until the end of the Medieval period when it was incorporated within modern Carmarthenshire. During the Post-Medieval period was held by the Vaughans of Golden Grove and the Earls of Cawdor (James n.d., 87). It is now unenclosed moorland and mountain. The boundary between this area and the enclosed Areas 233 and 255 to the north is long-established and defined by a masonry wall and/or bank, suggesting a long period of stability - since the 16th century in parts (Leighton 1997, 29) - with no evidence for *ad hoc* encroachments or later parliamentary enclosure. The main themes in the history of land-use within the area, dominated by former limestone quarrying and the continuous upland pasturing of sheep, are the removal of natural woodland - which reached altitudes of 800 m - from the Mesolithic period onwards; occupation and partial enclosure of the landscape in the prehistoric period with contemporary ritual activity; the informal occupation of the area, with longhuts, and its partial enclosure during the Post-Medieval period; and 19th- and 20th-century leisure activities including field sport (Leighton 1997). Limeworking, which had been undertaken since at least the Medieval period, intensified during the 18th- and early 19th-century and was joined by quarrying for silica sand. These activities received impetus when an existing mountain road and major Post-Medieval droving route was turnpiked from 1779. This was superseded by the present A4069 but still survives as a track, the 'Bryn Road' (DAT & CPAT, 1997, 5).

Description and essential historic landscape components

This area consists of that part of the Black Mountain which has Carboniferous limestone geology and has been subjected to quarrying. It comprises north-facing slopes on the northern fringes of the mountain between 300 m and 600 m. The area is entirely unenclosed and given over to rough pasture and open moorland, with blanket peats on higher ground and in hollows. The remains of the limestone quarrying industry are ubiquitous and are the most obvious elements of the historic landscape. Quarries and spoil heaps are the clearest remains, but there are also numerous limekilns scattered across the landscape. Also connected with the quarrying are the A4069 road and the 'Bryn Road', originally constructed to serve the limestone industry.

Recorded archaeology is extensive and relates to the land-use outlined above, including Bronze Age hut platforms, summit cairns and field systems, early Post-Medieval longhuts and informal enclosures, limeworking features such as quarries, kilns and an extensive network of trackways, and 19th- and 20th-century sporting and survey features.

There are no standing buildings.

To the north this area is very well defined as it borders the stone-walled Area 199, and enclosed farmland (Areas 197, 233 and 255). On other sides it merges with the larger portion of the Black Mountain (Area 240).

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). General recommendations of good historic landscape conservation practice and specific recommendations for the conservation of individual sites were made in reports on the Meithrin Mynydd Project for the Brecon Beacons National Park.

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 240 THE BLACK MOUNTAIN - Y MYNYDD DDU

GRID REFERENCE: SN 820228

AREA IN HECTARES: 14720.00

Historic Background

A character area which comprises the entire Black Mountain/Mynydd Myddfai/Mynydd Bach *massif*. The majority of the area lay within Cwmwd Perfedd, of Cantref Bychan, which retained native tenorial customs until the end of the Medieval period when it was incorporated within modern Carmarthenshire, while the easternmost section lay within the Lordship of Brycheiniog. It is now unenclosed moorland and mountain which generally exhibits a hard boundary with enclosed areas to the north, suggesting a long period of stability - since the 16th century in parts (Leighton 1997, 29). However, both *ad hoc* encroachment and parliamentary enclosure have occurred along its far western edge. Much of the area comprises mountain which has never been subject to intense human usage, but those areas of moorland which have been exploited exhibit five main themes of land-use. Dominated by the continuous upland pasturing of sheep, they include the removal of natural woodland, which reached altitudes of 800 m, from the Mesolithic period onwards; the occupation and partial enclosure of the landscape in the prehistoric period, and contemporary ritual activity; some informal occupation of the area, with longhuts, and its partial enclosure during the Post-Medieval period; and 19th- and 20th-century leisure activities including field sport (Leighton 1997). The northern part of the area exhibits a more complex history. Here, Mynydd Myddfai is crossed by the Roman road from Llandovery (*Alabum*) to Brecon (*Cicutio*), with the establishment of two successive, superimposed marching camps at Y Pigwn. The road was later abandoned in favour of the line of the present A40(T). A second marching camp site lies on the moorland plateau at Arosfa Garreg to the south. Much of Mynydd Myddfai once lay within Dôl Hywel grange, which had been granted to Talley Abbey by 1324 (Ludlow 1998). It was an upland grange, probably operated by tenant farmers primarily concerned with the mountain pasturing of animals, and appears to have been largely unenclosed during the historic period, as it is today. It was later exploited for tilestone and the line of quarries following the outcrop were mainly operational in the 18th- and 19th-century. Running from east-west alongside Arosfa Garreg is a drovers road from Llangadog to Trecastle, beside which is a large turbary (peat-cutting) from the Post-Medieval period. Further south, the existing mountain road from Brynamman to Llangadog, which was a major Post-Medieval droving route, was turnpiked from 1779. It was superseded by the present A4069 but still survives as a track, the 'Bryn Road' (DAT & CPAT, 1997, 5). The eastern edge of the area is characterised by a number of pillow-mounds which may have early Post-Medieval origins, although rabbit farming was practised in neighbouring areas to the east until the end of the 19th century.

Description and essential historic landscape components

This extremely large character area comprises all of the Black Mountain/Mynydd Myddfai/Mynydd Bach which lies outside Area 239. The whole area is unenclosed moorland. It includes the high escarpment above Llyn y Fan Fach/Llyn y Fan Fawr known as Bannau Sir Gar/Fan Brycheiniog which peaks at over 800 m. However, generally this area lies between 250 m and 600 m. The remains of past human exploitation are slight but nevertheless distinctive. Bronze Age burial mounds which cap the summits of most hills are the most obvious ancient elements of the landscape, but there are numerous abandoned settlements scattered across the mountain, mostly in valleys and at lower levels. Most are probably Post-Medieval, but some may be earlier. They are sometimes associated with old field systems and sheepfolds. Industrial remains are also present: quarries and tramways. The A4069 road, and old turnpike, crosses the mountain from north to south and links the industrial Amman valley with limestone workings and the Tywi valley. Despite all these remains, the landscape is one of open uninhabited moorland with rough grazing at lower levels and blanket peats at higher elevations. An unusual characteristic of this area is its very well-defined boundary with enclosed farmland to the north. This seems to be old established boundary and is marked on the ground for much of its course by a broken-down dry-stone wall or a stony bank. To the west and east the boundary between the open moorland of this area and enclosed farmland is not as hard-edged - former encroachments have blurred the border.

Recorded archaeology is extensive and relates to the land-use outlined above, including Bronze Age hut platforms, stone circles, summit cairns and field systems, the Roman road and camps, early Post-Medieval longhuts and informal enclosures, contemporary turbaries, pillow-mounds, the tilestone quarries, and 19th- and 20th-century sporting and survey features.

There are no standing buildings.

This is a very distinctive area as it is bordered by enclosed farmland (Areas 211, 233 and 255) and forestry (Area 238). Only to the north where it merges with a zone of industrial workings on the mountain (Area 239) are its boundaries indistinct.

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). General recommendations of good historic landscape conservation practice and specific recommendations for the conservation of individual sites were made in reports on the Meithrin Mynydd Project for the Brecon Beacons National Park.

CARMARTHENSHIRE: BLACK MOUNTAIN AND MYNYDD MYDDFAI

HISTORIC LANDSCAPE CHARACTER AREA: 255 BLAEN CENNEN

GRID REFERENCE: SN 686191

AREA IN HECTARES: 209.50

Historic Background

A narrow area on the lower northern slope of the Black Mountain. Evidence of early settlement occurs in the limestone area around Llygan Lluchwr, at the western end of this character area. Giving great time-depth to the landscape, a possible neolithic chambered tomb has been recorded adjacent to a prehistoric findspot, Bronze Age burnt mounds and an Iron Age/Romano-British settlement. During the historic period the area lay within Cantref Bychan, divided between two commotes. The western half lay within Iscennen commote, which remained nominally independent of Anglo-Norman rule until 1284 when it was acquired by John Giffard, and in 1340 it became a member of the Duchy of Lancaster (Rees 1953, xv-xvi). The remainder of Cantref Bychan, including Cwmwd Perfedd within which the eastern half of the area lay, was invaded by the Anglo-Normans under Richard Fitz Pons who established a *caput* at Llandovery in 1110-16 (Rees n.d.) and was acquired soon after by the Clifford lords of Brecon as the Lordship of Llandovery. However, there were many episodes of Welsh rule and the area retained native tenurial customs until the end of the Medieval period when it was incorporated into modern Carmarthenshire. The pattern of regular rectangular enclosures with straight boundaries suggests that the area comprised unenclosed pasture until the Post-Medieval period. Part of the area is recorded as formal common land, but fields around Blaencennen Farm are more irregular and it appears to be an earlier holding, while the physical boundary between this area and the unenclosed moorland of Area 239 to the south is well-defined as a masonry wall dating from the 16th century in places (Leighton 1997, 29). Early Post-Medieval hut platforms and pillow mounds have been recorded at Llygad Lluchwr, in association with a small limestone quarry and kiln site. Nevertheless, pastoralism was the mainstay of the economy and Cwmllywd sheepfold, at the eastern end of the area, which has recently been restored (Murphy 1998), served several farms which gave their names to the enclosures into which it was subdivided. There is a further sheepfold and a dip. The landscape had assumed its present form by c.1840 (Llandeilo Fawr and Llangadog tithe maps) and there has been little subsequent change or development.

Description and essential historic landscape components

The relatively small character area lies on north-facing slopes between the Cennen valley and the Black Mountain at heights of 220 m to 320 m. The whole of the area is enclosed. Fields are a mixture of fairly small regular and irregular enclosures which are interspersed with larger regular enclosures. There is a variety of boundary types. A dry-stone wall lies along the boundary with the Black Mountain, and other similar walls lie at these higher elevations close to the Black Mountain. Most walls are broken-down. Earth banks and/or stony banks are the other boundary types. These were formerly topped with hedges, but nearly all the hedges have now gone or are reduced to straggling lines of bushes. Wire fences provide stock-proof boundaries. There are very few trees. Land-use is a mixture of rough grazing, rushy, wet ground and improved pasture. Transport links are local and consist of lanes and tracks. The settlement pattern is of dispersed farms. Farmhouses are 19th century, two-storey, three-bayed and stone-built in the vernacular tradition. Outbuildings are of a similar date, stone built and generally of quite modest proportions. Often they comprise a single range. Most farms have modern agricultural buildings.

Recorded archaeology is relatively rich and diverse for a small area, comprising a Neolithic chambered tomb, two Bronze Age burnt mounds and a possible round barrow, a prehistoric findspot, an Iron Age/Romano-British open settlement, a possible Medieval holy well, and early Post-Medieval hut platforms, pillow mounds, quarry and limekilns.

There are some distinctive buildings but none are listed.

To the south this area is very well-defined at its border with the Black Mountain (Areas 199 and 239). Elsewhere definition is less good, and there tends to be a zone of change rather than a hard-edged boundary between this area and its neighbours (Areas 197, 198, 200 and 233)

Conservation priorities

This area lies within the Brecon Beacons National Park. Historic landscape conservation priorities must respect policies in the National Park Plan (1993) and the National Park Local Plan (1995). The decay evident in many of the hedgerows and other boundary types is eroding the historic character of this area; this problem needs to be addressed. Historic farm buildings form an important component in this landscape. Although most are in use and in a good state of repair, some consideration may have to be given as to how they can be best used/reused and maintained for future generations. Otherwise maintain as existing
