

Flint axe-head Found in the corner
of a ^{ploughed} field, on Carreg-wen Farm,

A.S. Mawll
2/3/1984

Telecom. with Mr Reeley ascertained that the
axe was found c. 1973 after ploughing the
amalgamated fields of 3228 + 3229 (OS) - see
DAT record map for position. It has been
shown to CM in c. 1973 probably to Mr. J.
Little although this is not absolutely certain.
This explains the letter a) on the axe. The
present curator of CM Mr C Delaney has no
information concerning this axe and it
appears not to have been published
at any time.
