

The surface of the field called
Parr Gann is very smooth and no
ground swellings or evidence of
earthworks were visible. However,
on the south side of the field, showing
up in the hedgeline were 2 mounds.
Mound 'A' measured 27m long x 2m wide
x 1m high and Mound 'B' measured
31m long x 1m high x 3m wide.
The south side of the mounds have
been destroyed by the road and the
north side by the hedgelines.
See GPS.
