

COMMENT	AUTHORITY
"The fourth stone, which is also of a soft gritty character, is an oval smooth worn stone, with a hole in its centre, having a minimum diameter at the centre of $3/8$" and a maximum diameter at the surface of $1 1/8$". Found in Teifi side, Cardu (NB on far right of illus.)	IC Peate in Arch. Camb 1925 p.205-6 T. Card. AS 1926 p.79-80
Macehead? in NMW? (formerly UCU Aberystwyth)	Griffiths in BA Finds: Card W-CD-4
Griffiths seems to be under the impression that this find was in UCU Aberystwyth Museum. However the articles he uses as sources in Arch Camb 1925 + T Card AS 1926 (see above) do not state that.
