

9. (PRN 11873) ? RING CAIRN; SETTLEMENT. SN 76788766. Bryny Beddan. Fig. 3.
(see also sites 35-39). Situated on a slight rocky eminence lie the remains
of a D-shaped feature some 12 m long by 7 m wide, which though not circular

2.

has much in common with ring cairns. Two wells of fieldstone run up to and
merge with this feature on its western side. This site is located only a
couple of metres below the maximum height of the reservoir; all the peat has
been eroded, and the site is beginning to disintegrate. The eastern side of
the site and lengths of the fieldwalls are obscured by "beach shingle".
