X	and the second second
COMMENT	AUTHORITY
A group of six mounds situated on fairly level ground on the east side of the Afon Hengwm. Four mounds are of a similar size, about 6m. across and 1m. high. The other two are rectangular in shape; 10m. long, 7m. across and 7m. long, 5m. across, both about 1m. high. All ie in an area that appears to have been once cut for peat.	M. Johnson, 1986
