ne mound is almost obliterated, except a portion on the routh. It was in oval form from north-west to south-east about 100 feet.	north and about 200		HOM HOME
This and shaped rath is partly enclosed by an onter palmaded enclosure on the E, N and NW side, with a flanking entrance approach on the west. Outside this palmisaded enclosure, on the SE side is a nectornallar, straight sided nectourge are anclosure c. 51 m × 48 m. Although the sides of the two enclosures are not payently parallel it seems probable that the palmade datch a fle Rath reports the line of the nectourge and enclosure, rather than the appointe. Presumably the nectour for enclosure is contemporary with the rath. This juxtaposition was noted at Wescangam (amouther (PRN 11811), only	2 MOV	20 20 20 20 20 20 20 20 20 20 20 20 20 2	######################################
