

## COMMENT

## AUTHORITY

Three mounds are sited on a gentle slope at the confluence  
of the Afon Hyddgen and Hengwm. The largest mound,  
8m. diameter and over 1.5m. high, occupies a central  
position within a wide meander of the river. The two  
smaller mounds, 6m. diameter, 1m. high, lie a short  
distance to the east and south of the larger one.
