

Visited January 1980 by
J H Williams. Notched elevation.
Triangular section with two flat
faces. Seaming.

Ploughed once since 1953.

May plough again in a few
years, for reseeding only.

Mound at base probably
entirely due to dumping by
farmer to stop cattle erosion.

The farmer Mr Owen, who
is the same man who was
interviewed by the OS field
(1) inspector, now claims the structure
in the next field, 1529, was a
clearance cairn

(1) OS Cord SW 03SW 3

OWNERSHIP AND TENANCY DETAILS

Mr W Owen,

Foggy Farm West,

Puncheston,
HAVERFORDWEST.
