Castlebythe Quarry

Camp

1530

A bank 5 feet high, with a ditch, remains on the south and west. The bank can be traced on the east. A hedge has been built across the camp on the north, from which point to the south it measures 31 yards, and from east to west 52 yards. The camp can be traced for about 14 yards beyond the hedge; on this side it was protected by a steep declivity with a stream at the foot.
