

Site visited 8/4/86 - viewed from road only. Site is as described ~~from~~ in RCAHM Carm (field name checked on Tiddle map). Confusion has arisen due to incorrect long: lat, + resultant wrong grid ref. Stone stands close to field boundary, + is possibly threatened as farmer is grubbing up other boundaries in the area.

Site identified from RCAHM field report / description on 10/2/86. Own research E. Morgan

----- - destroyed hedges (April 1986) CMS & Tenge.
