

Nothing was seen on the ground on this field investigation.

Mr Davies has ploughed the field a number of times last time 5 years ago but has not found anything unusual.

Ellews 13/1/84

A concentric antenna enclosure with annexes off the back side of the entrance immediately in front of the entrance of the inner enclosure.

Dimensions of the inner enclosure 40-45m diameter; outer enclosure 150m diameter NS, EW uncertain due to variable crop in adjacent field not showing outer ditch. Entrance faces ESE, curving slightly. The area of the entrance very close to the mouth of the inner enclosure has dark macula representing pot holes or ditch re cuts.
