

38 No. 4

Castell

Camp

2413

Fenton, p. 335, thinks this work must have preceded the CASTELL at Little Newcastle, the word NEW being used to distinguish the latter from the older work. On the west side of this camp is a bank about 6 feet wide, a ditch all round, with a good spring on the southern side, and a covered way to the water. The diameter is 62 yards.
