

- 46 No. 4 St. Elvis near Solva Cromlechs 2792
- Two cromlechs, both capstones thrown down. Twelve years ago the
- tenant blasted and carried off two legs of the eastern cromlech,
- but at the request of the writer ceased this work of destruction.
- The cromlech stand within two yards of each other. Each has only
- two legs left. The capstone of one measures 8 feet by 8 feet, and
- is about 3 feet 6 ins thick. The capstone of the larger cromlech
- measures 12 feet x 12 feet and is about 3 feet thick.

Site revisited, 4/2/83 - primarily
to check on D.A. components - nothing
visible - chambered tomb surroundings
much worse & Mr. George concerned
that "chipping" path would
damage his cattle's feet.
