

87A No. 4

Brunt Farm

Two Celts

3038

In Tenby Museum. Presented by H. Mathias Esq. They were found by Mr. Allen, the tenant, and by him given to Mr. Mathias. One was broken by the finder "to see what it was made of". The perfect one is formed from a grey-coloured metamorphic rock. It is 6 ins long with a circumference of 7 ins at the widest place.
