

57 No. 1

Howney Stone

Camp

3148, 3133

This is not correctly marked on the ordnance map. The ramparts run right across the point. There are 2 ramparts; the outer is 76 yards long and about 16 feet high; the inner is nearly 20 feet high, but not so long as the outer, as the point contracts. There is a space of about half an acre between the inner rampart and the sea. There are remains of another cliff castle with one rampart on the third point towards the west a short distance off.
