All the sources refer to this axe as being made of dolomite. Only the OS ① say that it is made of diorite but as their primary sources are the TCASFC vol. 5 ② and the RCAHM ③, both of whom refer to the axe being made of dolomite, then I think we can safely assume that they are mistaken.

Mr Jenkins Jr had no recollection of anything being found on this farm and when shown the drawing (RCAHM CAHM Inv. 1917, No. 223) said that they had never found anything similar.
