- 68 No. 2 Llan Remains of Cromlechs 3771-3
- Mr. A. Lascelles states that when he remembers this place (some 30 years ago) there were several complete cromlechs. Now there are groups of one, three, and six stones, but many very substantial stones are to be found on the farm doing duty as gate posts.

Site visited in response to a report of damage. Site is undisturbed and corresponds with Star Rzes' descriptive text in 1981.
