

COMMENT

AUTHORITY

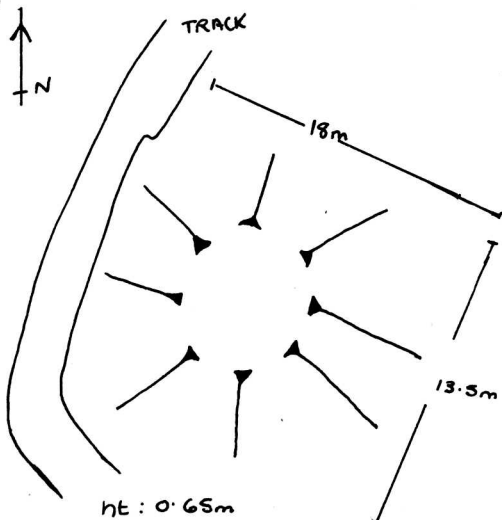

Eithin Fach mound is situated on a low ridge at the NW corner of a large pasture field. It measures 0.65m high and 13.5 - 18.0m diameter.

Another mound 1.1m high 15.2 - 24.7m diameter was observed at SN27441595. It is situated in a marshy field with many surface irregularities, and the west side of the mound appears to fall on to a low ridge which continues to the hedgeline. Natural?
