

Dear Charlie,

Re your query - information as follows.

14th - 15th century French jeton of religious type probably from Tournay mint. Issued at the time of the Great Pestilence in the Low Countries 1338-40. and the Black Death 1347-9. Possibly used as amulets, there are some German & Italian variants but judging by other finds from this area it seems more likely to be French.

Any more info on the mint at St. Davids.

Sue
