

THE PREHISTORIC SOCIETY

11. Bryngwyn Bach 3 (fig. 7; surveyed 1980) SN 76 SW

7281 6281

This cairn lies immediately to the S of site No. 10 above. It consists of a poorly consolidated mound of stones and has been badly disturbed. It measures 9.3 m (E-W) \times 8 m and has a maximum height of 0.5 m. Protruding from the cairn is a discontinuous ring of 13 upright and fallen slabs and blocks. A ruined cist lies at the centre of the mound.
