

Discovered by WH Morris. Possible

sub-rectangular enclosure ENE of

Caerbisgyn Farm, but area heavily

disturbed by mining.

Emyr,

on PRN 5779 there is no

shown on OS MAP at SN 488 068

doubt that the earthwork Λ on Caerbisgyn

farm is an old drift mine (coal). There

is a deep cut on the ^{steep} hillside, with a
spoil-heap on the down-slope side. I suggest

the term earthwork is scrubbed from the PRN

form and replaced with a placename. The

mine can be given a separate number.
