

Known from SAM LIST ONLY

43. (PRN 7645) CAIRN. SN 76328667.

30. Nant Maesnant-tach (fig. 1), excavated 1977. SN 76328667

7632 8667

Located at c. 4 km (2.5 mi) on a broad terrace in the upper Rhod. Valley now overlooking a reservoir. The cairn is a flat-topped, partially excavated mound with a diameter of 11.7 m and a height of 1.3 m. Two leaning slabs, possibly orthostatic, lie on the E. periphery of the mound and a further possible kerbstone lies on the SW. The cairn appears to be largely intact although it has been described in the vicinity of the putative kerbstones, probably by animal burrowing.
