AUTHORITY

Site visited by J H Williams, 19/4/77
Small univallate enclosure (1) now
destroyed. Position shown (2) is the west
of a ridge with ground falling gently on
the W & E.

The portion of the site west of the
NS hedgebank was destroyed, presumably
by agriculture, by 1969(1) & no trace of
antiquity can be found in an area of
pasture. The hedgebank itself & the area
east of it has now been destroyed by
open cast mining.
