

Pipe laid circa 1978. Stone lined graves reported

Work has proceeded on the site & a number of bungalows have been completed & foundations laid for more.

There is already an access road to the bungalows that have been completed & those under construction.

A further access road is under construction but work on further proposed bungalows in the area nearest the main road is not expected to begin until the later part of 1986.

The T.C.B. Driver & builders on site are aware of the possibility of unearthing further graves in this area & have agreed to notify the Trust of any findings
