## **INDEXING ARCHIVES**

Project archives should be indexed using the structures given below. This structure is based on the guidelines for a cataloguing and indexing system for excavation archives drawn up in 1987 and agreed by the NMR. It is also suitable for survey archives. Ideally all category sub-divisions should be shown on the index, with an 'N' or 'None' entered where no material exists. Where material does exist, some idea of the extent of it can be given, e.g.

B.1 Context records – paper...Contexts 1-136
