[enquiries@trysor.net](mailto:enquiries@trysor.net)

Trysor is a Registered Organisation with the Institute for Archaeologists and both partners are Members of the Institute for Archaeologists, [www.archaeologists.net](http://www.archaeologists.net) .

Jenny Hall (BSc Joint Hons., Geology and Archaeology, MifA) had 12 years excavation experience, which included undertaking watching briefs prior to becoming the Sites and Monuments Record Manager for a Welsh Archaeological Trust for 10 years. She has been an independent archaeologist since 2004 undertaking a variety of work that includes upland survey, desk-based appraisals and assessments, and watching briefs.

Paul Sambrook (BA Joint Hons., Archaeology and Welsh, MifA, PGCE) has extensive experience as a fieldworker in Wales. He was involved with Cadw's pan-Wales Deserted Rural Settlements Project for 7 years. He also undertook Tir Gofal field survey work and watching briefs. He has been an independent archaeologist since 2004 undertaking a variety of work including upland survey, desk-based appraisals/assessments, and watching briefs.

## **1. Summary**

1.1 This historic environment appraisal has been undertaken by Trysor to examine likely impacts on the historic environment from a proposed wind turbine at Parsonage Farm, Amroth, Pembrokeshire.

1.2 The appraisal has looked at all known historic assets within an area measuring 2km in radius, focused on a central point at the proposed turbine site at SN1663709083, consulting the regional Historic Environment Record and the National Monuments Record, as well as examining historic maps. A field visit was also undertaken to examine the location of the turbine and record previously unknown historic assets.

1.3 The appraisal area was revised after the field visit to exclude areas where there could be no intervisibility or impact on setting.

1.4 The appraisal shows that there is no evidence of buried archaeological features at the proposed development site.

1.5 The Scheduled Ancient Monument and Listed Building within the revised appraisal area would not be significantly affected by the development.

1.6 The appraisal shows that no direct, physical impact or significant indirect, visual impact would be caused to the historic environment at the turbine site

1.7 On the basis of this appraisal, no archaeological mitigation is thought necessary for the proposed development.

## **2. Copyright**

2.1 Trysor holds the copyright of this report. Further copies may be made of this report without gaining permission to reproduce but it must be noted that Figures 3 and 5 include other copyrighted material and should not be copied.

## **3. Introduction**

3.1 Good Life Incorporated, 2, St James Street, Narberth, Pembrokeshire, SA67 7DB commissioned Trysor heritage consultants to write an Historic Environment Appraisal as part documentation for a planning application for a single wind turbine at Parsonage Farm, Amroth.

3.2 Dyfed Archaeological Trust Heritage Management section supplied a generic brief for such appraisals (DAT HM, Undated). These appraisals are intended to be a rapid appraisal of the readily available historic environment information including a site visit. The purpose of the appraisal is to inform DAT HM as to whether any further assessment or evaluation would be required as part of the planning process. Trysor prepared a specification based on the brief (Trysor, 2013)

#### 4. The proposed development

4.1 It is proposed that a single turbine with a 20 m high tower and 23.5 m to the upright blade tip will be located in a single field parcel at SN1663709083 at Parsonage Farm, Amroth, Narberth, Pembrokeshire, SA67 8PR, see Figure 1. The field parcel lies within the Pembrokeshire Coast National Park

4.2 The turbine will require a foundation hole, approximately 5 metres square, and with a cable trench up to 1 metre deep running approximately east northeast for approximately 140 metres to an existing farm building, via an existing gateway. Access will be via existing trackways and gates, and a temporary trackway will not be necessary.

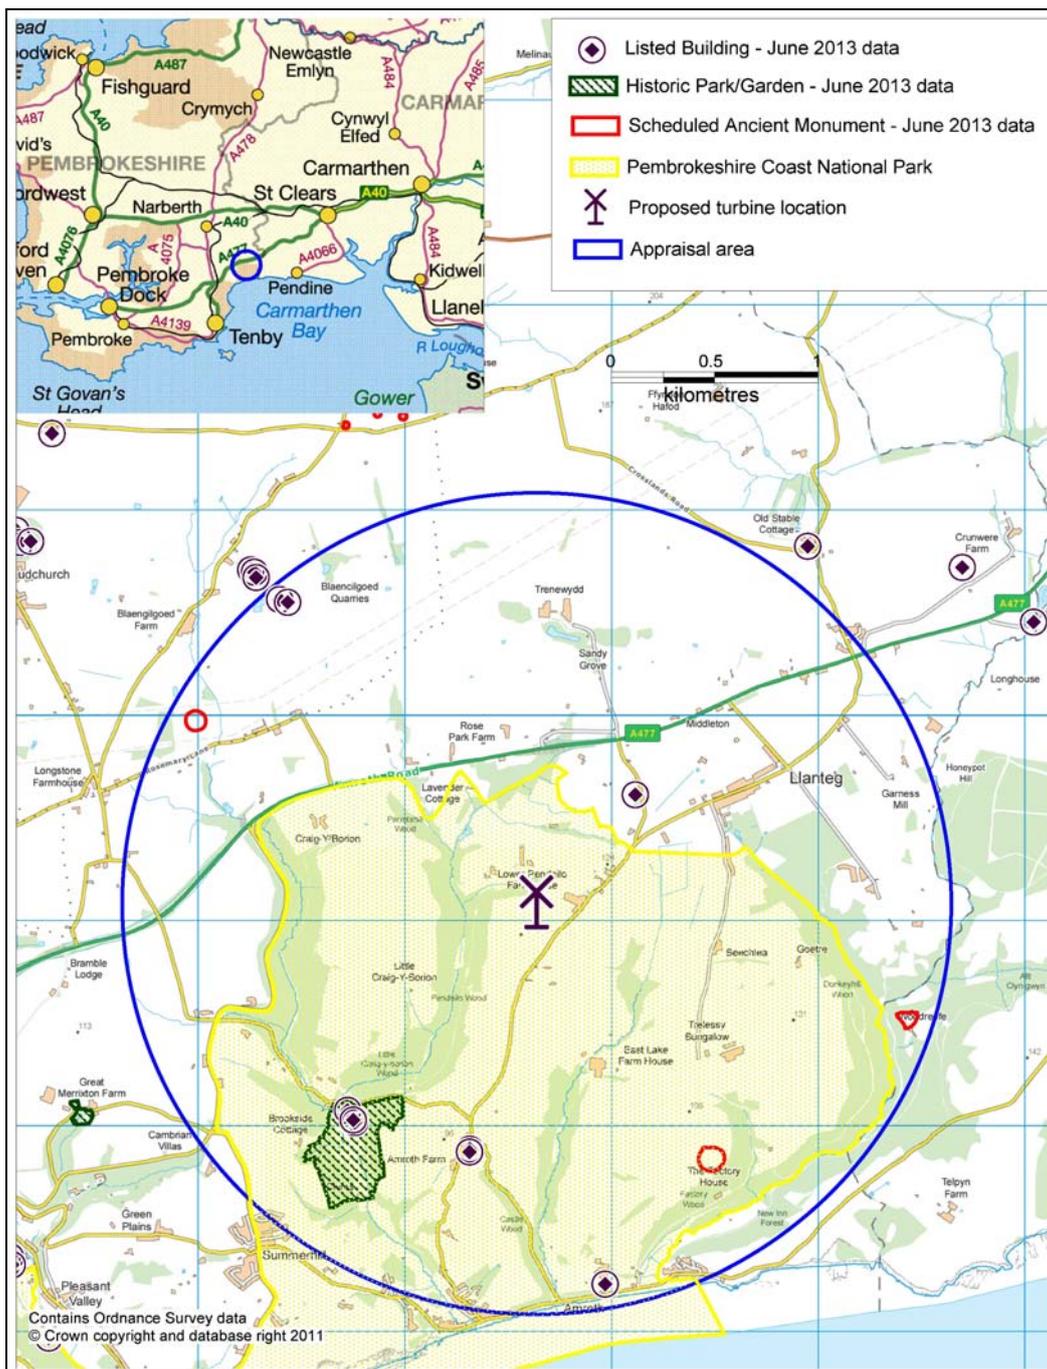

Figure 1: Location of the proposed turbine, showing the 2km radius appraisal area.

## **5. Methodology**

5.1 A study area of 2km radius circle centred on SN1663709083 was chosen for the initial appraisal of sites. This area was revised to exclude areas on the east and southern sides where there was no intervisibility or possibility of impact on setting of historic assets, see Figure 2. These areas either dipped down to the coast or lay within one of the incised valleys that characterise the district.

5.2 The HER enquiry for the 2km radius area yielded 122 records.

5.3 Within the 122 records, five had inaccurate NGRs and actually lay outside the revised study area, one was a duplicate, one was for Common Land and one for Church Land based on place-name evidence only, and these were all removed from the dataset. A further 93 records lay within the excluded area and were also removed. This left 21 HER records in the appraisal dataset. One of these was a Scheduled Ancient Monument and one was a Listed Building.

5.4 A site visit was made to Parsonage Farm and the surrounding area on August 20th, 2013 to rapidly appraise if there were any visible archaeological features within the area directly affected by the turbine proposal and also the wider landscape context of the proposed development. The field was under pasture at the time.

5.5 The aerial photographs on Google Earth, dating to 2006 and 2009, were used to inform the appraisal.

5.6 Historic mapping was consulted. The maps used included 19<sup>th</sup> and 20<sup>th</sup> century 1:2500 scale Ordnance Survey mapping and the Amroth parish tithe map and accompanying tithe schedule (dated to 1845).

5.7 All information gathered during the desktop appraisal and fieldwork was entered into a bespoke database in Access 2003 format to create an appraisal dataset. The dataset is the source of the material output in this report, including the GIS mapping which illustrates the location of sites in the area, and the tables and appendices which provide detailed information on the sites within the study area.

5.8 At the end of a rapid appraisal of the data, the information from the site visit and historic map search, the appraisal dataset contained 22 records. As stated in 5.3, one hundred and one HER records were discarded as they were for a record that lay outside the area, a deleted record or a duplicate record or within the excluded area, whilst one new record was created as a result of the desktop work and field survey undertaken by Trysor.

5.8.1 The National Monuments Record was consulted and compared with the HER. No records were added from this source to the appraisal dataset.

5.8.2 A new record was created in the project database by Trysor for the farmstead at Parsonage Farm (ID number 22).

5.9 Each of the records in the final appraisal dataset was assessed for Period, Rarity, Documentation, Group Value<sup>1</sup>, as well as Evidential Value, Historical Value, Aesthetic

---

<sup>1</sup> Period, Rarity, Documentation and Group Value are criteria defined in the Welsh Office Circular 60/96, 1996.

Value, Communal Value<sup>2</sup>. Once these had been considered the significance of each site was determined and scored in accordance with the categories adopted by the Welsh Archaeological Trusts i.e. Nationally Important, Regionally Important, Locally Important, Minor and Features Needing Further Investigation (Unknown), see Figure 2. Full details of this exercise are given in Appendix C.

5.10 As this exercise is an appraisal of the study area, not a full desk-based historic environment assessment, no site descriptions have been included in the appraisal dataset or this printed report, apart from newly recorded features (See Appendix B).

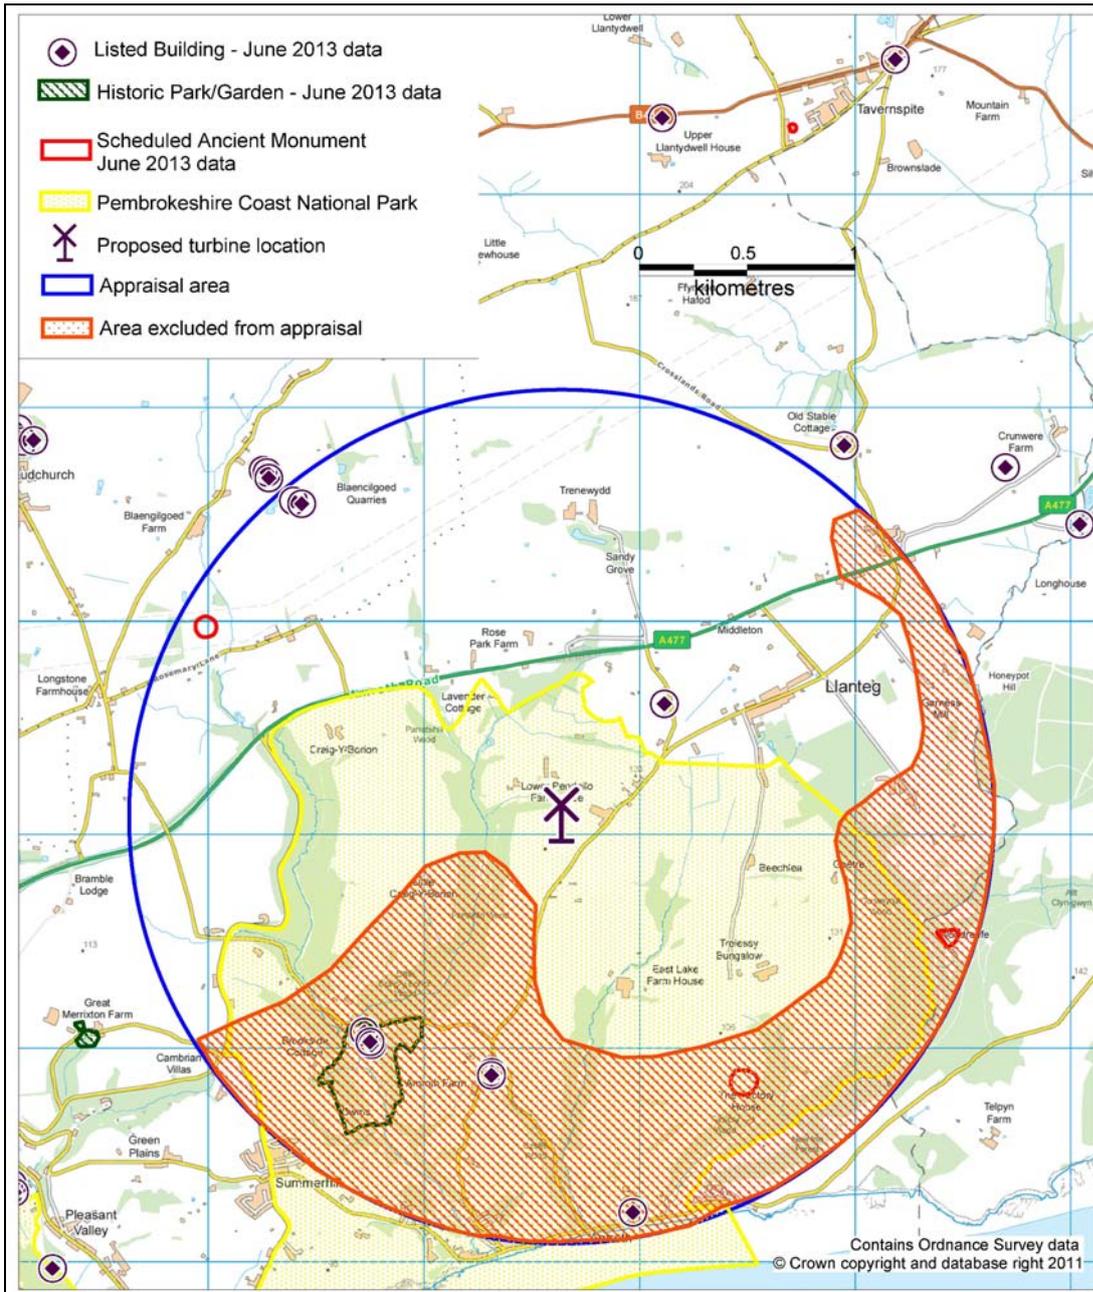

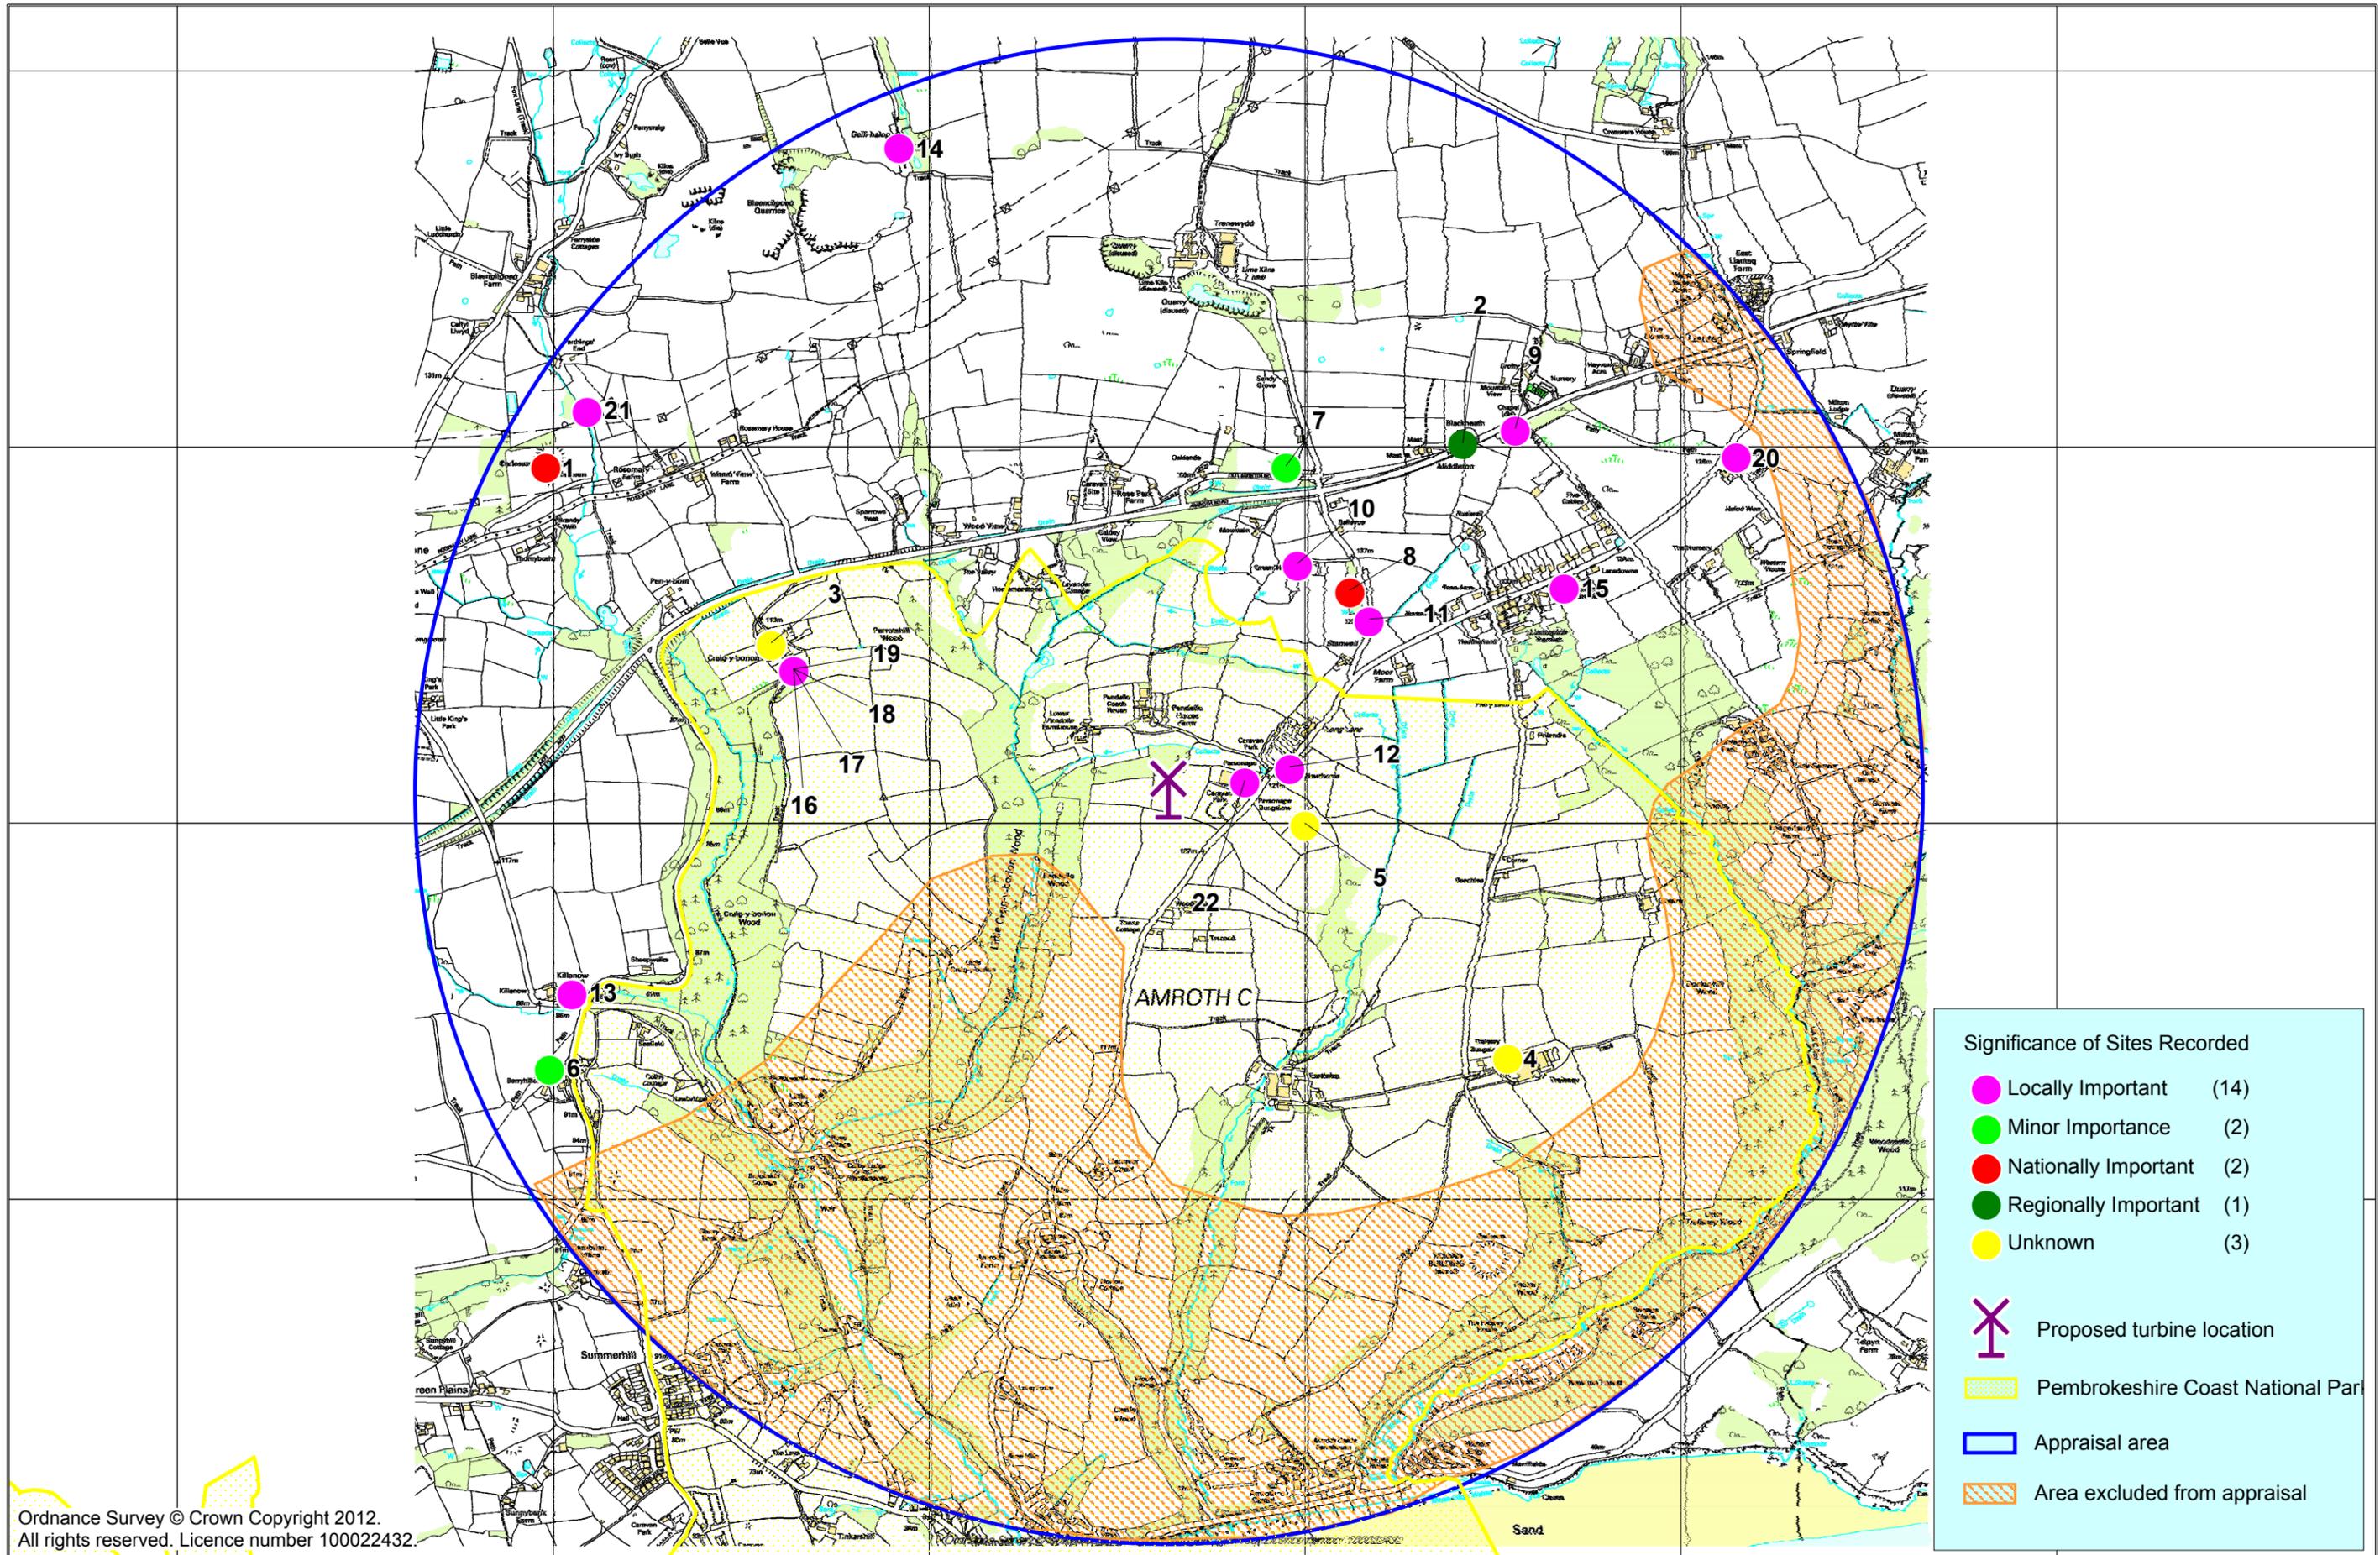

Figure 2: Showing the area excluded from the appraisal area as there was no intervisibility between the areas.

<sup>2</sup> Evidential Value, Historical Value, Aesthetic Value and Communal Value are criteria defined in Cadw's Conservation Principles publication, 2011.

Figure 3: Sites showing significance, labelled with Project ID number

## 6. Parsonage Farm: Historical overview

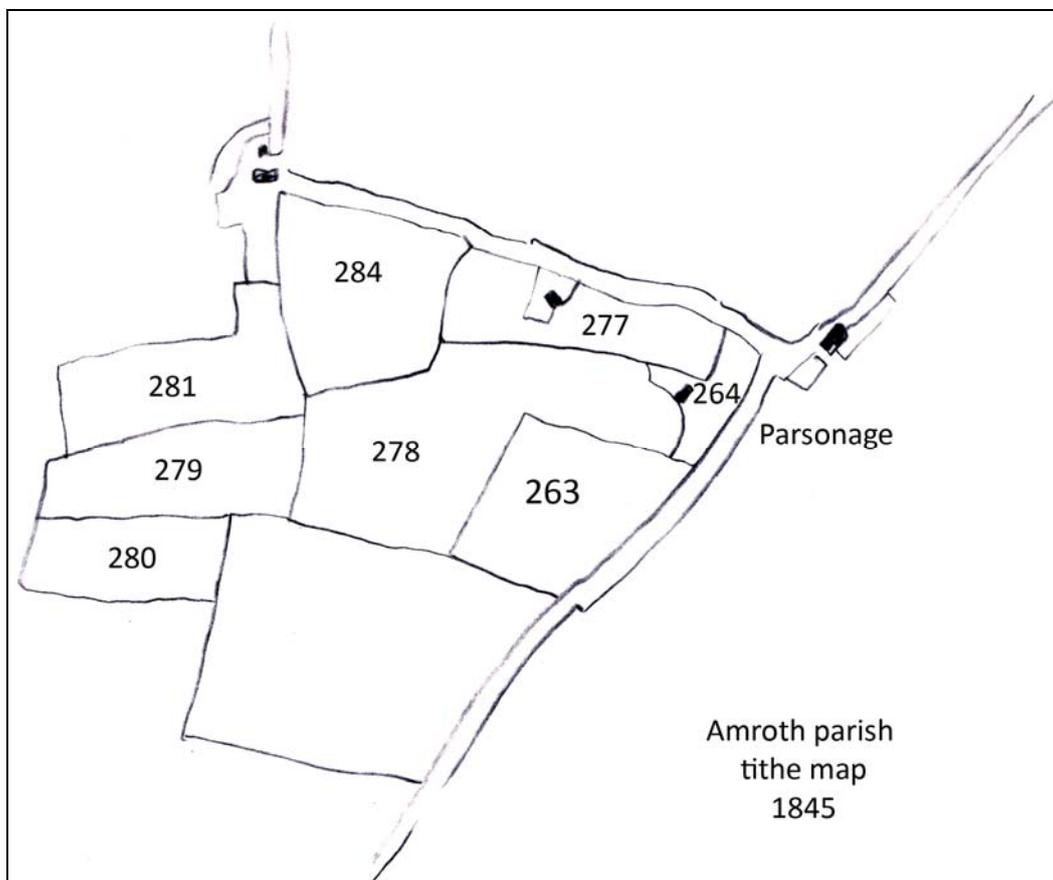

6.1 The farmstead is shown on the 1809 Tenby sheet of Ordnance Survey Original Surveyors Drawing and the 1819 1" to 1 mile scale Ordnance Survey map

6.2 On tithe survey in 1845, the farmhouse and fields at Parsonage Farm are shown very much as there are today. The farm was recorded as being owned by the Reverend William Harries and occupied by George Davies (see Figure 4). Field parcel 278, in which the turbine will stand, was larger and included the parcel to the east towards the farmhouse which on the 1890 map, and later, is shown as separate field parcel.

6.3 The 1890 1:2500 Ordnance Survey map shows the farm buildings clearly for the first time. The farmhouse was in its present position, some 200 metres east northeast of the proposed turbine, with several outbuildings to its east and south. These buildings seem to be still in place today, with the addition of some more recent buildings, in particular a large shed to the west of the farmhouse.

6.4 The field system shown to the west of the farmhouse on 19<sup>th</sup> century maps, including the field in which the proposed turbine would stand has undergone few changes during the past century. One boundary may have been added in between the farmhouse and where the proposed turbine would stand.

6.5 The farm was occupied by the Davies family from the 1840s until at least 1911.

*Figure 4: Parsonage farm on the 1845 Amroth parish tithe map*

## **7. Parsonage farm: Proposed turbine site**

7.1 The proposed turbine at Parsonage Farm is to be located at SN23933147 in a pasture field, 150 metres to the west southwest of the farm buildings at Parsonage Farm. The proposed cable trench will run back towards the farm buildings via the field gateway where it will connect to an existing electricity supply. The existing access track will be used.

7.2 When the farm and its environs were visited in August 2013, an assessment was made of the intervisibility of key monuments in the local landscape with the proposed turbine site. This assessment was undertaken on a dry day and in reasonable light.

## **8. Impact Assessment**

8.1 Within the revised area a total of 22 sites were recorded in the appraisal database.

8.2 The Direct and Indirect impact on each site was assessed taking into account both physical and non-physical impacts. Each impact was assessed within the scale Very Low, Low, Moderate, High and Very High, taken into account the significance of the site and the nature of the impact. A full table is found in Appendix A but a summary is tabulated in Table 1 below and illustrated in Figure 4.

8.3 As Table 1 and Appendix A show, no recorded historic assets within the area of the appraisal were determined to be exposed to any significant impact from the proposed turbine development. (Details of the appraisal for direct and indirect impact for each of the sites in Table 1 can be found in Appendix A).

8.4 An examination of the proposed development site identified no evidence of surface material of archaeological interest. The land was under pasture with very little exposure of the underlying soil surface.

8.5 An existing access track would be used and there will be no impact on any historic assets.

8.6 The cable trench will run northeast towards the farm buildings, through the existing gateway and along the track.

Table 1: Impact on sites within the appraisal area around Parsonage Farm proposed turbine site

## **9. Historic Landscape Aspects Relating to the Parsonage Farm Proposed Turbine**

9.1 The following aspects of the historic environment around the Parsonage Farm proposed turbine site have also been considered by this appraisal, as required by the brief supplied by the Dyfed Archaeological Trust Heritage Management Section (DAT, HM, Undated);

### **a) Scheduled Ancient Monuments in their settings**

There is one Scheduled Ancient Monument within the revised appraisal area. Longstone Camp Defended Enclosure (ID number 1) lies 1.8 kilometres to the northwest of the proposed turbine location and would not be intervisible with the proposed turbine, as it is surrounded by scrub growth and mature trees which block the view.

### **b) Previously Recorded Non-scheduled Ancient Monuments in their settings**

A small number of historic assets in the revised appraisal area are thought likely to experience a low or very low indirect, visual impact. This is due to their being intervisible with the proposed turbine over distance, but in no case would their setting be affected by the development. These sites are a cultivation terrace at Killanow (ID number 6), the settlement of Llanteglos (ID number 15) and Parsonage Farm farmstead (ID number 22)

Potential impacts on Non-scheduled Ancient Monuments are included in Appendix A. The significance of Non-scheduled Ancient Monuments is addressed in Appendix C.

### **c) Newly identified sites of historic importance**

One newly recorded site of historic importance was noted for this appraisal at or near the turbine site. This was the farmstead at Parsonage Farm (ID number 22).

The detail of this site is included in Appendices A, B & C.

### **d) Listed Buildings in their settings**

There is one Listed Building within the revised appraisal area. It is Zoar Baptist chapel (ID number 8) which lies 700 metres to the northeast of the proposed turbine location. The top of the proposed turbine is likely to be visible but would not have a significant effect on the setting of the chapel, which has been converted for other uses and the impact is assessed as Low.

### **e) Non-statutory buildings of local importance**

No non-statutory buildings of local importance included on a local list were identified as being affected by the proposed development. One building of local interest is thought likely to experience low indirect visual impact as a result of the development. This is a cottage called Great Griggs (ID number 10) but the setting of this building will not be affected.

### **f) Registered Parks & Gardens and their essential settings.**

There are no Registered Parks and Gardens within the revised study area. Colby Lodge, PGW (Dy) 29(PEM), lies within the area excluded as there is no intervisibility between the proposed turbine location and the historic garden.

### **g) Registered Historic Landscapes**

The development site does not lie in a Registered Historic Landscape.

**h) Non-registered Historic Landscapes**

There are no identified non-registered Historic Landscapes within the revised study area.

**i) LANDMAP and landscape characterisation information**

The proposed turbine would stand in the Amroth LANDMAP Historic Landscape Aspect Area (PMBRKHL46162). This large aspect area follows the incised plateau inland from the coast. It has a High overall evaluation. Most of the fields are medium-sized and regular although there are all sorts represented. Deciduous woodland lies mainly in the steep sided, incised valleys with some plantations of mixed woodland elsewhere. Patches of moorland still exists on the higher ground. Dispersed settlement is typical with some nucleations, which are largely post-medieval, developing from the local coal industry.

The proposed development would not impact on the essential character of the area.#

**j) Conservation Area**

There are no Conservation Areas within the revised study area.

**k) Tir Gofal interests or requirements**

No Tir Gofal interests were identified.

**l) Buried archaeological potential**

There is also no surface, map, aerial photographic or documentary evidence suggestive of significant buried archaeology at the proposed development site.

**m) Palaeoenvironmental potential**

No palaeoenvironmental potential can be identified at the Parsonage Farm turbine site. It is situated in a pasture field which is well-drained.

**n) Hedgerows and field patterns**

The proposed development would be located in a pasture field, which seems to have become enclosed in its present form from at least the mid 19<sup>th</sup> century. The proposed development will not change the character of the field system or have a significant effect on any field boundary banks.

**o) Ancient woodland**

Parts of four areas of Ancient and Semi-natural Woodland lie within the revised appraisal area and one Plantation on Ancient Woodland Site. These are all woodlands on valley sides and will not be affected by the proposed turbine location.

**p) Place-names**

There are no significant place-names in close association with the proposed development site.

**q) Cumulative impact**

No turbines were visible from the proposed turbine location.

**m) National Park**

The proposed turbine location does lie within the Pembrokeshire Coast National Park. Its location is sheltered from most of the coastline and the coastal slopes by topography and trees as shown in Figure 5.

## **10. Conclusion**

10.1 There would not be a significant impact on the historic environment or on individual historic assets in relation to the proposed development of the proposed wind turbine at Parsonage Farm, Amroth, Pembrokeshire.

10.2 There is no evidence to indicate the possibility of buried archaeology at the turbine site.

10.3 No known historic asset would be exposed to a direct physical impact.

10.4 Two historic assets, including Listed Building, Zoar chapel (ID number 8) would be exposed to a Low indirect, visual impact. There would be some level of intervisibility over a distance but it would not affect the setting of the historic assets. Three historic assets would be exposed to a Very Low indirect, visual impact, again which would not affect their setting.

10.5 On the basis of this appraisal, no archaeological mitigation is thought necessary.

## **11. Reporting**

11.1 Copies of this report will be provided to the client and the Regional Historic Environment Record.

## **Appendix A: Parsonage Farm Impacts**

Parsonage Farm, Amroth, Pembrokeshire, Historic Environment Appraisal

**ID number:** 1 LONGSTONE CAMP; DEFENDED ENCLOSURE  
 BRANDYWELL CAMP;  
 PARROT'S WALLS  
*Is there a Direct Impact:* No  
*Is there an Indirect Impact:* No  
**Overall Impact:** None This enclosure would not be intervisible with the proposed turbine, 1.8km to the southeast, as it is surrounded by scrub growth and mature trees which block the view to the southeast.

=====  
**ID number:** 2 LLANTEG ENCLOSURE DEFENDED ENCLOSURE  
*Is there a Direct Impact:* No  
*Is there an Indirect Impact:* No  
**Overall Impact:** None Only a small portion of the enclosure bank now survives and the view from this towards the proposed turbine would be blocked by the house and buildings of Blackheath.

=====  
**ID number:** 3 CRUGVORION; SETTLEMENT  
 GRAIG-Y-BO RION  
*Is there a Direct Impact:* No  
*Is there an Indirect Impact:* No  
**Overall Impact:** None There are no recorded archaeological features associated with this settlement, mentioned in early sources but as yet unlocated in the field.

=====  
**ID number:** 4 TRESSYLYN;TRELLESSY SETTLEMENT  
*Is there a Direct Impact:* No  
*Is there an Indirect Impact:* No  
**Overall Impact:** None There are no recorded archaeological features associated with this settlement, mentioned in early sources but as yet unlocated in the field.

=====  
**ID number:** 5 ST TEILO'S CHAPEL CHAPEL  
*Is there a Direct Impact:* No  
*Is there an Indirect Impact:* No  
**Overall Impact:** None There are no recorded archaeological features associated with this chapel, mentioned in early sources but as yet unlocated in the field.

=====  
**ID number:** 6 KILLANOW CULTIVATION TERRACE  
*Is there a Direct Impact:* No  
*Is there an Indirect Impact:* Yes Possible intervisibility  
**Overall Impact:** Very Low The top of the proposed turbine, some 1.8km to the east-northeast, may be visible from here but it would have no impact on the setting of the features recorded here.

Parsonage Farm, Amroth, Pembrokeshire, Historic Environment Appraisal

<b>ID number:</b>	<b>7</b>	<b>FOLLY</b>	<b>FOLLY?</b>
		<i>Is there a Direct Impact:</i>	No
		<i>Is there an Indirect Impact:</i>	No
<b>Overall Impact:</b>	<b>None</b>		Only a place-name record for a Folly, no site identified.
=====			
<b>ID number:</b>	<b>8</b>	<b>ZOAR BAPTIST CHAPEL</b>	<b>CHAPEL</b>
		<i>Is there a Direct Impact:</i>	No
		<i>Is there an Indirect Impact:</i>	Yes    Intervisible
<b>Overall Impact:</b>	<b>Low</b>		The top of the proposed turbine is likely to be visible some 700 metres to the southwest, but would not have a significant effect on the setting of the chapel, which has been converted for other uses.
=====			
<b>ID number:</b>	<b>9</b>	<b>LLANTEG CONGREGATIONAL CHAPEL</b>	<b>CHAPEL</b>
		<i>Is there a Direct Impact:</i>	No
		<i>Is there an Indirect Impact:</i>	No
<b>Overall Impact:</b>	<b>None</b>		This former chapel would not be intervisible with the proposed turbine as buildings and trees block the view towards the southwest.
=====			
<b>ID number:</b>	<b>10</b>	<b>GREAT GRIGGS</b>	<b>COTTAGE</b>
		<i>Is there a Direct Impact:</i>	No
		<i>Is there an Indirect Impact:</i>	Yes    Intervisible
<b>Overall Impact:</b>	<b>Low</b>		This cottage would be intervisible with the proposed turbine, c.675 metres to the south-southwest.
=====			
<b>ID number:</b>	<b>11</b>	<b>GREENACRE</b>	<b>COTTAGE</b>
		<i>Is there a Direct Impact:</i>	No
		<i>Is there an Indirect Impact:</i>	No
<b>Overall Impact:</b>	<b>None</b>		The cottage has fallen into complete ruin and is now hidden in a small parcel of mature trees which block view from the site towards the proposed development.
=====			
<b>ID number:</b>	<b>12</b>	<b>WATER GOCH</b>	<b>COTTAGE</b>
		<i>Is there a Direct Impact:</i>	No
		<i>Is there an Indirect Impact:</i>	No
<b>Overall Impact:</b>	<b>None</b>		It is unlikely that the turbine would be visible from here as a caravan park and a number of trees lie between the two sites and appear to block the view.

=====

**ID number:** 13 KILLANOW FARM FARMSTEAD

*Is there a Direct Impact:* No

*Is there an Indirect Impact:* No

**Overall Impact:** None

It is unlikely that the proposed turbine would be visible from Killanow, as mature trees block the view to the east-north east and the farmhouse faces the south-southeast.

=====

**ID number:** 14 GELLI-HALOG DWELLING

*Is there a Direct Impact:* No

*Is there an Indirect Impact:* No

**Overall Impact:** None

This derelict dwelling would not be intervisible with the proposed turbine as a mature woodland blocks the view to the southeast.

=====

**ID number:** 15 LLANTEGLOS SETTLEMENT

*Is there a Direct Impact:* No

*Is there an Indirect Impact:* Yes

**Overall Impact:** Very Low

Possible intervisibility

The proposed turbine, which would be about 1km to the southwest, may be visible from some parts of the village but it would have no impact on the setting of the settlement.

=====

**ID number:** 16 CRAIG-Y-BORION BUILDING

*Is there a Direct Impact:* No

*Is there an Indirect Impact:* No

**Overall Impact:** None

This building would not be intervisible with the proposed turbine.

=====

**Description:** The farmstead at Parsonage is shown on the 1809 Tenby sheet of Ordnance Survey Original Surveyors Drawing and the 18191 1" to 1 mile scale Ordnance Survey map but not named.  
 On tithe survey in 1845, the farmhouse and fields at Parsonage Farm are shown very much as there are today. The farm was recorded as being owned by the Reverend William Harries and occupied by George Davies (see Figure 3).  
 The 1890 1:2500 Ordnance Survey map shows the farm buildings clearly for the first time. The farmhouse was in its present position, with several outbuildings to its east and south. These buildings seem to be still in place today, with the addition of some more recent buildings, in particular a large shed to the west of the farmhouse.  
 The field system shown to the west of the farmhouse on 19th century maps, including the field in which the proposed turbine would stand has undergone few changes during the past century.  
 According to the census data George Davies (35), a farmer, and his wife Anne (27) were living at Parsonage in 1841. They had four children William (4) James (2) and Humphrey (21 months). Anne Pridey (15) lived with them as a servant.  
 On the 1851 census the property was mistakenly called Vicarage but George and Ann still lived there, now with 7 children William (14), James (12), Humphrey (10), Robert (7), George (4), Elizabeth (2) and Ann (1 month)  
 The farm was defined as being 37 acres in 1861, and George (56) and Ann (49) still had a large family at home, James (22), Humphrey (20), George (14), Elizabeth (12), Ann (10) and Rachel (7).  
 By 1871, George (66) was a widower. He farmed 40 acres with James (29) and George (22) with Ann (19) as housekeeper and Rachel (16) still at home. George was still in charge farming 45 acres in 1881 with James (41) and George (32), both unmarried with a niece aged 12 and Mary Morris (49), a dressmaker  
 A change of generation had happened by 1891 when George's son George (44) now was head of the farm with his wife Sarah (44) and their daughter Elizabeth (4) and a farm servant William Henry (16)  
 The farm was referred to as Amroth Parsonage on the 1901 census, still farmed by George (54) and Sarah (53) with their daughter Elizabeth (14). They were stil there in 1911 with Elizabeth working as a farmer's daughter doing diary work. There was also a boarder, a retired bricklayer called Thomas James (66)
