Trysor is a Registered Organisation with the Institute for Archaeologists and both partners are Members of the Institute for Archaeologists, <u>www.archaeologists.net</u>.

Jenny Hall (BSc Joint Hons., Geology and Archaeology, MIfA) had 12 years excavation experience, which included undertaking watching briefs prior to becoming the Sites and Monuments Record Manager for a Welsh Archaeological Trust for 10 years. She has been an independent archaeologist since 2004 undertaking a variety of work that includes upland survey, desk-based appraisals and assessments, and watching briefs.

Paul Sambrook (BA Joint Hons., Archaeology and Welsh, MIfA, PGCE) has extensive experience as a fieldworker in Wales. He was involved with Cadw's pan-Wales Deserted Rural Settlements Project for 7 years. He also undertook Tir Gofal field survey work and watching briefs. He has been an independent archaeologist since 2004 undertaking a variety of work including upland survey, desk-based appraisals/assessments, and watching briefs.

1. Summary

1.1 This historic environment appraisal has been undertaken by Trysor to examine likely impacts on the historic environment from a proposed single wind turbine at Rhydygwydd near Taliaris, Carmarthenshire.

1.2 The appraisal has looked at all known historic assets within an area measuring 2km in radius, focused on SN6246528041, the location of the proposed turbine sites, consulting the regional Historic Environment Record and the National Monuments Record, as well as examining historic maps. A field visit was also undertaken to examine the location of the turbine and record previously unknown historic assets.

1.3 The appraisal area was revised after the field visit to exclude areas where there could be no intervisibility or impact on setting.

1.4 A field boundary bank (ID number 36) and boundary wall (ID number 35) will experience some direct, physical impact as a result of opening access points in association with the proposed development.

1.5 There is 1 monument with Scheduled Ancient Monument status within the revised appraisal area, namely Maes y Castell Defended Enclosure (ID number 1). This will only experience a Very Low, indirect visual impact from the development, with no affect on its setting.

1.6 There are three Listed Buildings within the revised appraisal area, One of these, Salem chapel, experience a Very Low, indirect visual impact from the development, with no affect on its setting.

1.7 A further 10 historic assets would experience a Low or Very Low, indirect visual impact from the development, with no impact on their settings.

1.8 On the basis of this appraisal, mitigation has been put into the design and access statement to protect a newly discovered cairn (ID number 33) which lies close to the proposed development. This feature will be protected by a buffer zone and fence during the construction phase.

1.9 The integrity of the boundary wall (ID number 35) should also be respected during work to widen the access gateway and the ends of the wall should be left in such a condition as to prevent future decay.

1.10 The appraisal shows that there is evidence of buried archaeology close to the proposed development site, namely a cairn of unknown date and purpose (ID number 33), identified initially by field survey and proven through archaeological evaluation. The possibility of similar or related buried features at the development site cannot be excluded, therefore a watching brief should be undertaken during the construction of the access track, hardstanding area and turbine foundation.

2.1 Trysor holds the copyright of this report. Further copies may be made of this report without gaining permission to reproduce but it must be noted that Figures 3 and 5 include other copyrighted material and should not be copied.

3. Introduction

3.1 Mr Oliver Buxton of Seren Energy Ltd, 1, High Street, Clydach, Swansea, SA6 5LG has commissioned Trysor heritage consultants to write an Historic Environment Appraisal for a planning application for a turbine at Rhydygwydd, Taliaris, Llandeilo, Carmarthenshire, SA19 7NE.

3.2 Dyfed Archaeological Trust Heritage Management section have written a generic brief for such appraisals (DAT HM, Undated). These appraisals are intended to be a rapid appraisal of the readily available historic environment information including a site visit. The purpose of the appraisal is to inform interested parties as to whether any further assessment or evaluation would be required as part of the planning process. Trysor prepared a specification based on the brief (Trysor, 2013)

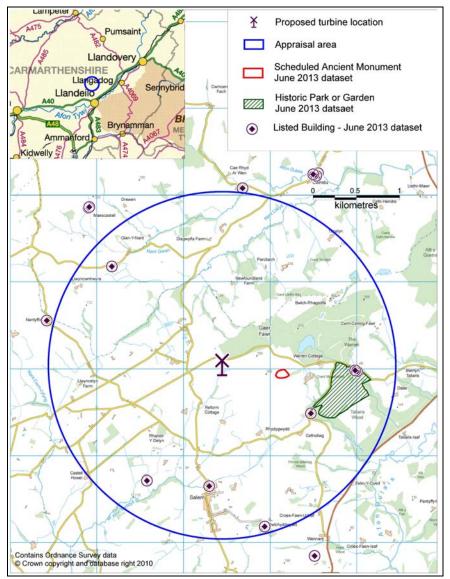

Figure 1: Location of the proposed turbine, showing the 2km radius appraisal area.

4. The proposed development

4.1 It is proposed that a single turbine, with a hub height of 50m, and 74m to the upright blade tip, will be located at SN6246528041, in a single field parcel at Rhydygwydd, Taliaris, Llandeilo, Carmarthenshire, SA19 7NE., see Figure 1.

4.2 The turbine will require a foundation trench measuring 15 metres in diameter. A new access track, up to 5 metres wide, will be created as well as a crane hard standing measuring 20 x 30 metres. The trackway will require a widening of the present gateway. The exact route and nature of the cable trench will be determined separately in conjunction with Western Power Distribution.

5. Methodology

5.1 A study area of 2km radius circle centred on SN6246528041, the location of the proposed turbine, was chosen for the initial appraisal of sites. This area was revised to exclude two areas, one on the east and southeast and a smaller area to the southwest where there was no intervisibility or possibility of impact on setting of historic assets, see Figure 2.

5.2 The HER enquiry for the 2km radius area yielded 47 records.

5.3 Within the 47 records, 15 records lay within the excluded areas and were removed. Three were removed as they were for common land or DELETED records. This left 29 HER records in the appraisal dataset. One of these is a Scheduled Ancient Monuments and three are Listed Buildings.

5.4 A site visit was made to Rhydygwydd and the surrounding area on January 9th, 2014 to rapidly appraise if there were any visible archaeological features within the area directly affected by the turbine proposal and also the wider landscape context of the proposed development. The field was under pasture at the time.

5.5 The aerial photographs on Google Earth, dating to 2005, 2006, 2009 and 2013, were used to inform the appraisal.

5.6 Historic mapping was consulted. The maps used included 19th and 20th century 1:2500 scale Ordnance Survey mapping and the Llandeilo Fawr parish tithe map of 1841.

5.7 All information gathered during the desktop appraisal and fieldwork was entered into a bespoke database in Access 2003 format to create an appraisal dataset. The dataset is the source of the material output in this report, including the GIS mapping which illustrates the location of sites in the area, and the tables and appendices which provide detailed information on the sites within the study area.

5.8 At the end of a rapid appraisal of the data, the information from the site visit and historic map search, the appraisal dataset contained 37 records. As stated in 5.3, 18 HER records were discarded as they were for deleted record, and those which fell within the excluded area.

5.8.1 Eight new records were created in the project database by Trysor. These were for four ruined cottages (ID numbers 30, 31, 32 & 37), a boundary bank (ID number 35), a boundary wall (ID number 36), a mound of uncertain origin (ID number 33) and a minor quarry (ID number 34).

5.8.2 The mound ID number 33 was subject to an archaeological evaluation and shown to be a stone cairn of unknown date and origin (retaining the ID number 33). The development design has been amended by Seren Energy to protect this feature from damage during construction.

5.9 Each of the records in the final appraisal dataset was assessed for Period, Rarity, Documentation, Group Value¹, as well as Evidential Value, Historical Value, Aesthetic Value, Communal Value². Once these had been considered the significance of each site was determined and scored in accordance with the categories adopted by the Welsh Archaeological Trusts i.e. Nationally Important, Regionally Important, Locally Important, Minor and Features Needing Further Investigation (Unknown), see Figure 3. Full details of this exercise are given in Appendix C.

5.10 As this exercise is an appraisal of the study area, not a full desk-based historic environment assessment, no site descriptions have been included in the appraisal dataset or this printed report, apart from newly recorded features (See Appendix B).

¹ Period, Rarity, Documentation and Group Value are criteria defined in the Welsh Office Circular 60/96, 1996.

² Evidential Value, Historical Value, Aesthetic Value and Communal Value are criteria defined in Cadw's Conservation Principles publication, 2011.

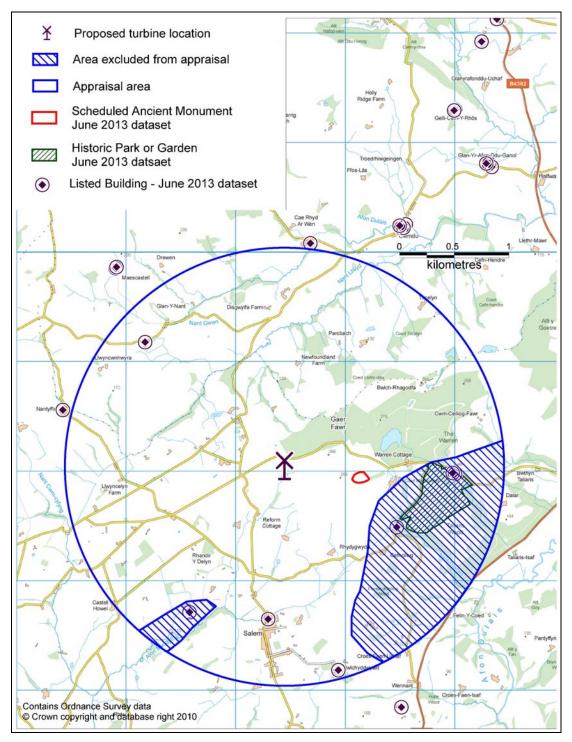

Figure 2: Showing the area excluded from the appraisal area as there would be no intervisibility with the proposed turbine.

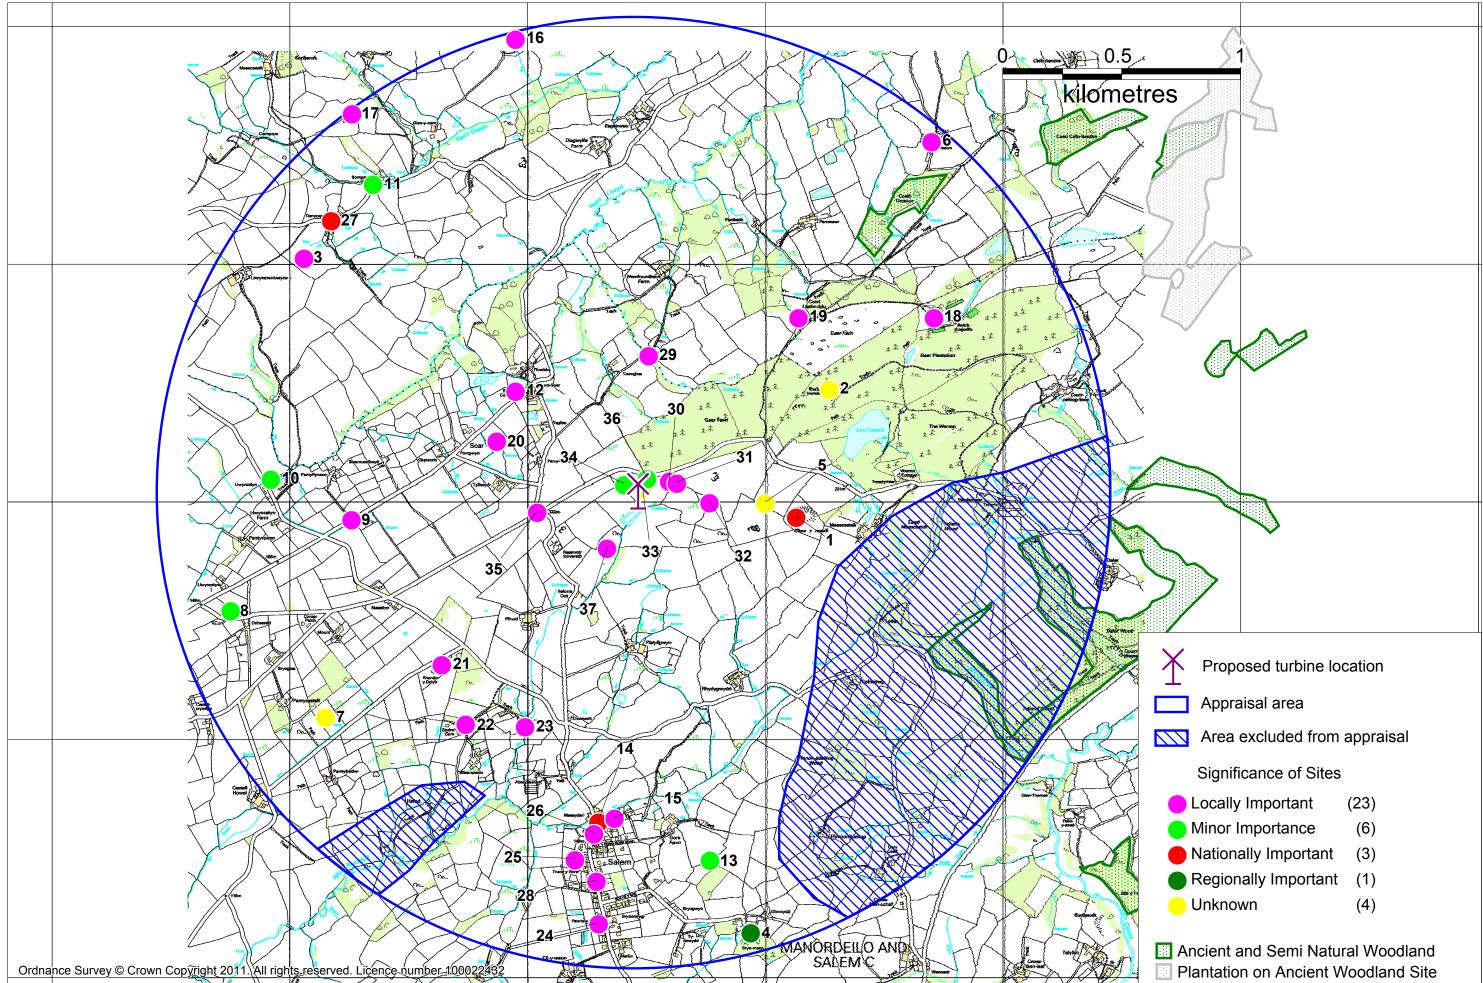

Figure 3: The 2km appraisal area showing significance of sites, labelled with Project ID number

6. Rhydygwydd: Historical overview

6.1 The land on which the proposed turbine would be sited appears to have been in an area of unenclosed moorland known as Mynydd Bach Ffair at the time the Llannon map sheet of the Ordnance Survey Original Surveyors Drawing, which was surveyed in 1813.

6.2 The 1831 1" to 1 mile scale Ordnance Survey map shows that the land had by that time been enclosed, with the stone boundary wall (ID number 36) that now defines the northern side of the field parcel in which the turbine would stand appearing to be in place.

6.3 The Llandeilo Fawr parish tithe map of 1841 shows the field system here in detail. The field parcel in question formed the eastern half of a larger field named *Y Bank* by the tithe schedule. The land was at that time part of the farmstead of Cwm Ceiliog, a holding on the Taliaris estate, nearly 2km to the east-northeast of *Y Bank*.

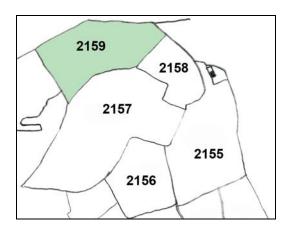

Figure 4: Land at Y Bank (parcel 2159) as shown on the Llandeilo Fawr parish tithe map of 1841.

6.4 The 1888 1:2500 Ordnance Survey map shows the field system had developed further and the large field parcel at *Y* Bank had been divided into two fields, as at present, by the addition of a boundary bank. This bank survives in the modern landscape, just to the west of the proposed turbine site, but it has not been maintained as an effective division between the two field parcels for a considerable time and parts of it have fallen into a ruinous or denuded state.

6.5 The field system shown at *Y Bank* on late 19th and early 20th century maps, including the field in which the proposed turbine would stand, has undergone relatively few changes during the past century and a half, although there has been a trend to maintain the perimeter or holding boundary whilst leaving some internal boundaries unfenced to permit the passage of stock freely from field to field.

6.6 One of the most notable changes has been the creation of an entrance into the field through the boundary wall (ID number 36) during the 20th century and the creation of a fenced enclosure just inside the gateway. This has had a minor impact on the field system however and the essential elements of this 19th century field system are still recognisable today.

7. Rhydygwydd: Proposed turbine site

7.1 The proposed turbine at Rhydygwydd is to be located at SN6244628039 in a pasture field. The route and character of the associated cable trench has not been determined at present, although it is likely to carry the cable 2km to the south-southeast to the nearest three-phase electricity line. A new access track will be created, the present gateway being widened to facilitate the entry of vehicles into the field.

7.2 When the field and its environs were visited in January 2014, an assessment was made of the intervisibility of key monuments in the local landscape with the proposed turbine site. This assessment was undertaken on a dry day and in good light.

8. Impact Assessment

8.1 Within the revised area a total of 37 sites were recorded in the appraisal database.

8.2 The Direct and Indirect impact on each site was assessed taking into account both physical and non-physical impacts. Each impact was assessed within the scale Very Low, Low, Moderate, High and Very High, taken into account the significance of the site and the nature of the impact. A full table is found in Appendix A but a summary is tabulated in Table 1 below and illustrated in Figure 5.

8.3 As Table 1 and Appendix A show, no recorded historic assets within the area of the appraisal were determined to be exposed to any significant impact from the proposed turbine development. (Details of the appraisal for direct and indirect impact for each of the sites in Table 1 can be found in Appendix A).

8.4 An examination of the proposed development site identified a single feature of possible archaeological interest. This was a low, earth mound (ID number 33). The land was under pasture with very little exposure of the underlying soil surface.

8.4.1 An archaeological evaluation was subsequently undertaken on this mound and it was shown to be a buried stone cairn.

8.5 A new access track would be created via an existing gateway, which would be widened for ease of entry into the field. The access track, as originally proposed, would have passed very close to cairn ID number 33. Mitigation has been undertaken to reposition the access track and an associated hardstanding area. A buffer zone and plans to fence of the cairn are proposed to ensure the cairn will not be damaged by vehicles or machinery during construction.

8.6 The exact route and nature of the cable trench has not been determined at the time this appraisal was undertaken. An assessment of impacts on the historic environment and any archaeological mitigation would have to be determined at a later date as part of a separate proposal.

| Table 1: Impact on sites | within the appraisal | area around Rhvdvgwvda | l proposed turbine site |

9. Historic Landscape Aspects Relating to the Rhydygwydd Proposed Turbine

9.1 The following aspects of the historic environment around the Rhydygwydd proposed turbine site have also been considered by this appraisal, as required by in the generic brief used by the Dyfed Archaeological Trust Heritage Management Section (DAT, HM, Undated);

9.2 Scheduled Ancient Monuments in their settings

There is one Scheduled Ancient Monument within the revised appraisal area, see Table 2. This is the Iron Age Defended Enclosure at Maes y Castell, which would largely be screened from views of the turbine, although the top of the turbine may be visible from parts of the site. There would be no impact on the setting of the monument.

| SAM Number | ID Number | PRN | Site Name | Site Type | Level of Impact |
|---------------|--------------|-----|----------------|-----------|--------------------|
| CM149 | 1 | 834 | MAES Y CASTELL | DEFENDED | Very |
| CW1149 | 1 | | | ENCLOSURE | Low |

 Table 2: Impacts on Scheduled Ancient Monuments

9.3 Previously Recorded Non-scheduled Ancient Monuments in their settings

A small number of historic assets in the revised appraisal area are thought likely to experience a Very Low indirect, visual impact. This is due to their being intervisible with the proposed turbine over distance, but in no case would their setting be affected by the development. These sites are listed in Table 3 below. Potential impacts on Non-scheduled Ancient Monuments are included in Appendix A and Table 3. The significance of Non-scheduled Ancient Monuments is addressed in Appendix C.

| ID Number | Site Name | Site Type | Level of Impact |
|--------------|------------------|-----------|--------------------|
| 13 | PANT-Y-FFYNNON | WELL | Very Low |
| 14 | SALEM | CHAPEL | Very Low |
| 24 | PEN Y RHIW | COTTAGE | Very Low |
| 25 | SALEM;HEOL GALED | VILLAGE | Very Low |

Table 3: Impacts on Non-scheduled Ancient Monuments

9.4 Newly identified sites of historic importance

Eight newly recorded sites of historic importance were noted for this appraisal at or near the turbine site (see Table 4). The details of these sites are included in Appendices A, B & C.

| ID Number | Site Name | Site Type | Level of Impact |
|--------------|---------------------|---------------|--------------------|
| 30 | TY'RLAN? | COTTAGE | Low |
| 31 | MAES Y CWAR | COTTAGE | Very Low |
| 32 | GLAN BANC YR EITHIN | COTTAGE | Low |
| 33 | Y BANC | CAIRN | Moderate |
| 34 | Y BANC | QUARRY | Low |
| 35 | TY LLWYD | BOUNDARY BANK | High |
| 36 | Y BANC | WALL | Low |
| 37 | BLACK SWAN | COTTAGE | Very Low |

Table 4: Impacts on Newly Recorded Sites of Historic Importance

9.5 Listed Buildings in their settings

There are three Listed Buildings within the revised appraisal area. Only one of these, Salem Chapel (ID number 14) is thought likely to experience a Very Low, indirect visual impact from the proposed turbine, although there would be no impact on the setting of the building. See Table 5.

| ID Number | Site Name | Site Type | Level of Impact |
|--------------|-----------------------------------|-----------|--------------------|
| 14 | SALEM | CHAPEL | Very Low |
| 4 | BRYNMAEN FRIENDS BURIAL GROUND | CEMETERY | None |
| 27 | DANYCAPEL | FARMHOUSE | None |

Table 5: Impacts on Listed Buildings

9.6 Non-statutory buildings of local importance

No non-statutory buildings of local importance included on a local list were identified as being affected by the proposed development.

9.7 Registered Parks & Gardens and their essential settings.

There is one Registered Park and Garden within the revised study area. This is the Taliaris parkland and pleasure gardens which is recorded in the Register as PGW(Dy)13(CAM). None of the land within the Registered Park & Garden would be intervisible with the proposed turbine.

9.8 Registered Historic Landscapes

The development site does not lie in a Registered Historic Landscape.

9.9 Non-registered Historic Landscapes

There are no identified non-registered Historic Landscapes within the revised study area.

9.10 LANDMAP and landscape characterisation information

The proposed turbine would stand in the extensive Llanfynydd LANDMAP Historic Landscape Aspect Area (CRMRTHL42450), which covers a varied rural landscape to the north of the Tywi valley. It has a High overall evaluation. The proposed development would not impact on the essential character of the area.

9.11 Conservation Area

There are no Conservation Areas within the revised study area.

9.12 Tir Gofal interests or requirements

No Tir Gofal interests were identified.

9.13 Buried archaeological potential

The initial examination of the proposed development site identified a single feature of possible archaeological interest. This was a low, earth mound (ID number 33). An archaeological evaluation subsequently demonstrated that the mound was in fact a grassed-over, stone cairn. The date and purpose of the cairn were not established by the evaluation. It is not know whether any similar or related features are present within the development area, but this must be considered to be a possibility. ID number 33 was an ephemeral surface feature and its true character was only revealed during the evaluation.

9.14 Palaeoenvironmental potential

No palaeoenvironmental potential was identified at the Rhydygwydd turbine site. It is situated in a well-drained pasture field.

9.15 Hedgerows and field patterns

The proposed development would be located in a pasture field, which was enclosed in its present form during the second or third decade of the 19th century. The proposed development will not change the character of the post medieval field system or have any effect on any field boundary banks.

9.16 Ancient woodland

There are two Ancient and Semi-natural Woodlands within the revised appraisal area. Coed Tir Celyn lies 1.4km to the northeast. Taliaris Wood lies 1.4km to the east-southeast. Neither would be affected by the proposed turbine.

9.17 Place-names

There are no significant place-names in close association with the proposed development site.

9.18 Cumulative impact

No other wind turbines were noted in the immediate landscape around the proposed Rhydygwydd turbine site. The wind farm at Mynydd y Betws could be seen on the distant horizon, over 18km away.

9.19 National Park

The western edge of the Brecon Beacons National Park lies 5.5km to the southeast of the proposed turbine site.

10. Evaluation of Mound ID number 33

10.1 The initial appraisal identified a High Direct and Indirect impact on mound ID number 33. As the result of discussions with Seren Energy to explore options to relocate the turbine further away from the mound, it was agreed that a limited evaluation should be undertaken to establish whether the grassed-over mound represented an archaeological feature.

10.2 The evaluation was undertaken on March 4th, 2014. A 2 metre x 0.75 metre evaluation trench was opened. It was found that the grass cover was thin and immediately below the surface the stones of a small, man-made cairn were revealed. It is difficult to be certain of the dimensions of the cairn, most of which remained buried, but was thought likely that it would be up to 4 metres in diameter.

10.3 Having established the existence of an archaeological feature, the evaluation trench was backfilled. It was not the intention of the evaluation to establish the purpose or date of the cairn, merely to establish that it was an archaeological feature.

10.4 A separate report is being prepared for Seren Energy, fully documenting the evaluation (Trysor, 2014).

10.5 Having established the existence of the cairn, Seren Energy have subsequently amended the design of the access track and hardstanding area for the turbine in order to ensure that the feature will be avoided. It would be fenced off during the construction phase to avoid unintended damage by vehicles or machinery.

Plate 1: The stone cairn (ID number 33) revealed in the evaluation trench

11. Conclusion

11.1 One feature has been assessed by this appraisal as likely to experience a High, direct impact from the proposed development. This is a post-medieval field boundary bank (ID number 35) which will have a section removed to facilitate access.

11.2 A cairn of unknown date (ID number 33), which has been identified by archaeological evaluation. Originally this feature was identified as a mound of unknown origin, which would have been subject to a High, direct impact due to its proximity to the proposed access track and hardstanding area for the turbine. Following the recommendations arising from an archaeological evaluation of the feature, which was shown to be a cairn, the developer has amended the site plan to avoid damaging this feature during the construction phase. This will include a 7 metre buffer zone around the cairn, which will be fenced off during construction. This mitigation would reduce the impact from development to a Moderate, indirect, visual impact.

11.3 One historic asset, a boundary wall (ID number 36) would be exposed to a Low direct, physical impact, as a section would be removed to widen the gateway giving access into the field. The impact is reduced as part of the wall was removed during the 20th century to create the present access point into the field, and therefore most of the section to be removed, to the east of the present gateway, has been disturbed and is not in good condition.

11.3.1 The section of boundary wall (ID number 36) to be removed to widen the gateway should be dismantled with care and the ends of the wall either side of the gateway finished neatly to avoid future decay.

11.4 Only one Scheduled Ancient Monument is found within the appraisal area, the Maes y Castell Defended Enclosure (ID number 1), which would experience a Very Low indirect, visual impact, based on the visibility of the turbine at distance. Its setting would not be affected by the development.

11.5 Of the three Listed Buildings within the appraisal area, only one, Salem Chapel (ID number 14) would experience a Very Low indirect, visual impact, based on the visibility of the turbine at distance. Its setting would not be affected by the development.

11.6 A further 3 historic assets would experience a Low indirect, visual impact and 5 other sites would experience a Very Low indirect, visual impact, based on the visibility of the turbine at distance. The settings of these sites would not be compromised by the development.

12. Reporting

| Overall Impact: | None | The location of this putative stone circle has not been fixed and its existence remains unproven, despite antiquarian references. |

| ID number: | 6 TIRCELYN Is there a Direct Impact: No | LONGHOUSE |
|--|---|---|
| Overall Impact: | <i>Is there a Direct Impact:</i> No <i>Is there an Indirect Impact:</i> No None | The proposed turbine is unlikely to be visible from this location. The house faces southeast, the turbine is to the southwest, with farm buildings close to the house blocking the view in that direction. |
| =================== ID number: | 7 PANT Y CASTELL Is there a Direct Impact: No | DEFENDED ENCLOSURE? |
| Overall Impact: | <i>Is there an Indirect Impact:</i> No None | This site is a cropmark seen on a 1940s aerial photograph. It remains unverified and the site has become overgrown in recent times making assessment impossible. |
| =================== ID number: | 8 PANT-Y-FFYNNON Is there a Direct Impact: No | WELL |
| Overall Impact: | <i>Is there an Indirect Impact:</i> No None | The proposed turbine would not be visible from this location as the view to the east-northeast is blocked by deciduous trees. |
| ====================================== | 9 TALIARIS WELSH INDEPENDENT SUNDAY SCHOOL Is there a Direct Impact: No Is there an Indirect Impact: No | SUNDAY SCHOOL |
| | | |
| Overall Impact: | None | The proposed turbine would not be visible from this location as the Sunday School is now surrounded by trees which block views to the east. |
| Overall Impact: ==================================== | None 10 PANT-Y-FFYNNON Is there a Direct Impact: No | this location as the Sunday School is now surrounded by trees which block views to the |
| ====================================== | None 10 PANT-Y-FFYNNON 1s there a Direct Impact: No Is there an Indirect Impact: No None | this location as the Sunday School is now surrounded by trees which block views to the east. WELL There are no archaeological features associated with this "ffynnon" placename. |
| ====================================== | None 10 PANT-Y-FFYNNON 1s there a Direct Impact: No None 11 PONT-GAREG 1s there a Direct Impact: No | this location as the Sunday School is now surrounded by trees which block views to the east. WELL There are no archaeological features associated with this "ffynnon" placename. |
| ID number: Overall Impact: ID number: ID number: Overall Impact: | None 10 PANT-Y-FFYNNON 1s there a Direct Impact: No 1s there an Indirect Impact: No None 11 PONT-GAREG | this location as the Sunday School is now surrounded by trees which block views to the east. WELL There are no archaeological features associated with this "ffynnon" placename. BRIDGE The proposed turbine would not be visible from this location. |

| ID number: | 12CAPEL SOARIs there a Direct Impact:NoIs there an Indirect Impact:No | CHAPEL |
|--|---|--|
| Overall Impact: | None | The proposed turbine would not be visible from this location as mature trees to the south of the building would block the view towards the turbine. |
| ID number: | 13 PANT-Y-FFYNNON Is there a Direct Impact: No | WELL |
| | Is there an Indirect Impact: Yes | Intervisibility |
| Overall Impact: | Very Low | It is likely that the proposed turbine would be visible from this location but at distance and with no impact of significance on the well site. |
| ====================================== | 14 SALEM Is there a Direct Impact: No | CHAPEL |
| | Is there an Indirect Impact: Yes | Intervisibility |
| Overall Impact: | Very Low | It is possible that the top of proposed turbine would just be visible c.1.4km to the north, but the development would have no impact on the setting of the chapel. |
| ====================================== | 15 SALEM Is there a Direct Impact: No Is there an Indirect Impact: No | SCHOOL |
| Overall Impact: | None | The proposed turbine would not be visible from this location as mature trees to the rear of the property block the view northwards where the development would occur. |
| ====================================== | 16 CWM-Y-GIGFRAN;CWMG FRAN Is there a Direct Impact: No | IG COUNTRY HOUSE |
| | Is there an Indirect Impact: No | |
| Overall Impact: | None | The proposed turbine would not be visible from this location as the ruined mansion is now overgrown and hidden in woodland. |
| | | |

| ID number: | 17 LLETTY FINON Is there a Direct Impact: | No | COTTAGE |
|--|--|---------|---|
| Overall Impact: | <i>Is there an Indirect Impact:</i> None | | This ruined cottage is surrounded by mature deciduous trees which would block views towards the proposed turbine, which would stand nearly 2km to the southeast. |
| =================== ID number: | 18BWLCH RAGODF.Is there a Direct Impact: | A No | COTTAGE |
| Overall Impact: | <i>Is there an Indirect Impact:</i> None | NO | The proposed turbine would not be visible from this location as higher ground lies between the two sites. |
| ====================================== | 19 LLETHR-DDU? Is there a Direct Impact: | No | COTTAGE |
| Overall Impact: | <i>Is there an Indirect Impact:</i> None | Νο | The proposed turbine would not be visible from this location as the long-ruined cottage site is hidden in mature deciduous woodland and no views would be possible of the development. |
| ====================================== | 20 FFYNNON-WEN Is there a Direct Impact: | No | COTTAGE |
| Overall Impact: | <i>Is there an Indirect Impact:</i> None | No | The proposed turbine would not be visible from this location as the ruined cottage is hidden in a stand of mature deciduous trees and there would be no view towards the turbine. |
| =================== ID number: | 21 RHANDIR Y DELY Is there a Direct Impact: | No | COTTAGE |
| Overall Impact: | <i>Is there an Indirect Impact:</i> None | | The proposed turbine would not be visible from the former cottage as it is in a wooded parcel with a larger wooded area screening views to the northeast. |
| ====================================== | 22 GODRE'R GORS Is there a Direct Impact: | | COTTAGE |
| Overall Impact: | <i>Is there an Indirect Impact:</i> None | No | The cottage no longer stands and its site is hidden in woodland with no views towards the proposed turbine site. |

| ID number: | 23GLAN Y NANTIs there a Direct Impact:No | COTTAGE |
|--|---|--|
| Overall Impact: | Is there an Indirect Impact: No None | A modern house now stands on the site of this post medieval cottage. |
| ID number: | 24PEN Y RHIWIs there a Direct Impact:No | COTTAGE |
| | Is there an Indirect Impact: Yes | Intervisibility |
| Overall Impact: | Very Low | The top of the proposed turbine would be visible from Penrhiw, 1.8km to the north, but the development would have no impact on the setting of the house. |
| ====================================== | 25 SALEM;HEOL GALED Is there a Direct Impact: No | VILLAGE |
| | Is there an Indirect Impact: Yes | Intervisibility |
| Overall Impact: | Very Low | Views of the top of the proposed turbine, between 1.4km and 2km to the north may be possible from some parts of the village, but this will not impact significantly on historic buildings or affect the setting of the settlement. |
| ====================================== | 26 ANGEL INN Is there a Direct Impact: No Is there an Indirect Impact: No | PUBLIC HOUSE |
| Overall Impact: | None | There would be no view towards the proposed turbine from the pub as the neighbouring chapel would interrupt the view northwards. |
| ====================================== | 27 DANYCAPEL (FORMER FARMHOUSE), DANYCA Is there a Direct Impact: No | FARMHOUSE |
| | Is there an Indirect Impact: No | |
| Overall Impact: | None | The proposed turbine is unlikely to be visible from this dwelling as mature deciduous trees in front of the house block the view to the southeast. |
| | | |

| ID number: | 28 TROED-Y-RHIW C Is there a Direct Impact: | COTTAGE No | COTTAGE |
|--|--|-------------------------|--|
| | Is there an Indirect Impact: | No | |
| Overall Impact: | None | | The proposed turbine would not be visible from this cottage as trees and buildings screen views to the north, where the development would take place. |
| ============ ID number: | 29 TY-UCHAF Is there a Direct Impact: | No | COTTAGE |
| | Is there an Indirect Impact: | No | |
| Overall Impact: | None | | The proposed turbine would not be visible from this location as the long-ruined cottage site is hidden in mature deciduous woodland and no views would be possible of the development. |
| | | ======= | |
| ID number: | 30 TY'RLAN? <i>Is there a Direct Impact:</i> | No | COTTAGE |
| | - | | T |
| 0 | Is there an Indirect Impact: | Yes | Intervisibility |
| Overall Impact: | Low | | The proposed turbine, 160m to the west-southwest, would be visible from this location. The development would have no physical impact on the cottage site or interfere with its setting. |
| | | | |
| ID number: | 31MAES Y CWARIs there a Direct Impact: | No | COTTAGE |
| | Is there an Indirect Impact: | Yes | Intervisibility |
| Overall Impact: | Very Low | | The proposed turbine, 200m to the west-southwest, would be visible from this location, though trees would screen the view to a large extent. The development would have no physical impact on the cottage site or interfere with its setting. |
| ====================================== | 32 GLAN BANC YR E Is there a Direct Impact: | ======= EITHIN No | COTTAGE |
| | Is there an Indirect Impact: | | Intervisibility |
| Overall Impact: | Low | | The proposed turbine, 330m to the west-northwest, would be visible from this location. The development would have no physical impact on the cottage site or interfere with its setting. |

| ID number: Overall Impact: | 33 Y BANC Is there a Direct Impact: Is there an Indirect Impact: Moderate | No Yes | CAIRN This feature will be fenced off to avoid unintended damage during construction Intervisibility This slight feature could easily be damaged or destroyed during the construction phase as it would be very close to the proposed access track to the turbine site. |
|--|--|---------------|--|
| ID number: | 34 Y BANC Is there a Direct Impact: | ======= No | QUARRY |
| | Is there an Indirect Impact: | | Intervisibility |
| Overall Impact: | Low | | The proposed turbine would be located c.40m southeast of this minor quarry working. The development would not have a direct impact on the feature. |
| ID number: | 35 TY LLWYD | ====== | BOUNDARY BANK (EARTHWORK) |
| | Is there a Direct Impact: Is there an Indirect Impact: | Yes | A short section of this bank will be removed to create temporary access associated with a wind turbine proposed for erection at neighbouring Rhydygwydd farm Intervisibility |
| Overall Impact: | High | | A section of the bank in the eastern corner of the field, c.15m in total, will be removed to create a temporary storage and access area for wind turbine components for neighbouring Rhydygwydd farm. |
| ====================================== | 36 Y BANC | ======= | WALL |
| | Is there a Direct Impact: Is there an Indirect Impact: | | A short section of this wall would be removed, at an existing gateway, to widen the entrance and give access for wind turbine construction Intervisibility |
| Overall Impact: | Low | | The existing gateway has been created in the past by knock a gap in the wall. The condition of the wall at this point is not good and widening the entrance would not significantly detract from the wall, of which better sections survive. |
| ====================================== | 37 BLACK SWAN Is there a Direct Impact: | ======= No | COTTAGE |
| | Is there an Indirect Impact: | Yes | Intervisibility |
| Overall Impact: | Very Low | | This cottage stood 260m south-southwest of the proposed turbine site. The cottage no longer exists as a feature in the landscape and its site is surrounded by mature trees. The turbine would have a minimal, visual impact on the site. |
