1. Summary

1.1 This historic environment appraisal has been undertaken by Trysor to examine likely impacts on the historic environment from a proposed wind turbine at Upper Dredgman Hill, Haverfordwest, Pembrokeshire, planning application number 12/1068/PA.

1.2 The appraisal has looked at all known historic assets within an area measuring 2km in radius, focused on a central point at the proposed turbine site at SM9334512927, consulting the regional Historic Environment Record and the National Monuments Record, as well as examining historic maps. A field visit was also undertaken to examine the location of the turbine and record previously unknown historic assets.

1.3 The appraisal shows that no significant direct, physical impact or indirect, visual impact would be caused to the historic environment at, or around, the turbine site. Furthermore, no Scheduled Ancient Monuments within the appraisal area would be adversely affected by the development. With these points in mind, no archaeological mitigation is thought necessary for the proposed development.

2. Copyright

2.1 Trysor hold the copyright of this report. Further copies may be made of this report without gaining permission to reproduce but it must be noted that Figures 2, 4 and 5 include other copyrighted material and should not be copied.

3. Introduction

3.1 Ruth Goodfield, of Mosscliff Environmental Ltd, Horham Airfield, Horham Road, Eye, Suffolk, IP21 5DQ, commissioned Trysor heritage consultants to write an Historic Environment Appraisal to inform a planning application for a wind turbine at Upper Dredgman Hill, near Haverfordwest, Pembrokeshire, planning application number 12/1068/PA

3.2 Dyfed Archaeological Trust Heritage Management section supplied a brief for the appraisal, (DAT HM, 2013), which was to be a rapid appraisal of the readily available historic environment information including a site visit. The purpose of the appraisal was to inform DAT HM as to whether any further assessment or evaluation would be required as part of the planning process. Trysor prepared a specification based on the brief (Trysor, 2103)

4. The proposed development

4.1 It is proposed that a 250kW wind turbine, with 40m high tower to the hub and 55 metres to the top of the upright blade will be located in a field west of Upper Dredgman Hill, Haverfordwest, Pembrokeshire. The turbine is proposed to be located at SM9334512927, see Figure 1.

4.2 The turbine will require a foundation hole, 10 metres by 10 metres. A cable trench will run westwards down the slope to the nearest 3 phase connection.

Figure 1: Location of the proposed turbine, showing the 2km radius appraisal area.

5. Methodology

5.1 A study area of 2km radius circle centred on SM9334512927 was chosen for the initial appraisal of sites. This was reviewed after a site visit and the area of the appraisal altered to exclude sites from full appraisal on the eastern side of the circle, see Figure 2. These sites fell within an area which would have no direct impact from the development and also would have no indirect impact with regard to intervisibility and setting.

5.2 The HER enquiry for the 2km radius area yielded 87 records. Thirty two of these were within the excluded area, see Table 1. These sites were largely post medieval in date with no implications for buried archaeology beyond their immediate location.

Table 1: Sites within the Excluded area of the Appraisal Area.

5.3 Within the remaining 55 records one was a duplicate and one was a deleted record leaving 53 existing records in the appraisal dataset. One of these was a Scheduled Ancient Monument and one a Listed Building.

5.4 The proposed development site lies just outside the Uzmaston and Boulston Historic Landscape Characterisation area of the Milford Haven Landscape of Historic Interest, defined in the Register of Landscapes of Outstanding Historic Interest in Wales (Cadw/ICOMOS/CCW, 1998).

5.5 A site visit was made to Upper Dredgman Hill and the surrounding area on May 21st, 2013 to rapidly appraise if there were any visible archaeological features within the area directly affected by the turbine proposal and also the wider landscape context of the proposed development. The fields were under pasture at the time.

5.6 The aerial photographs on Google Earth, dating to 2006 and 2009, were used to inform the appraisal.

5.7 Historic mapping was consulted. The maps used included 19th and 20th century 1:2500 scale Ordnance Survey mapping and the undated Haverfordwest St Thomas parish tithe map and accompanying tithe schedule (dated to 1841).

5.8 All information gathered during the desktop appraisal and fieldwork was entered into a bespoke database in Access 2003 format to create an appraisal dataset. The dataset is the source of the material output in this report, including the GIS mapping which illustrates the location of sites in the area, and the tables and appendices which provide detailed information on the sites within the study area.

5.9 At the end of a rapid appraisal of the data, the information from the site visit and historic map search, the appraisal dataset contained 55 records. As stated in 5.3, two HER records were discarded as they were for a deleted record or duplicate record, whilst two new records were created as a result of the desktop work and field survey undertaken by Trysor.

5.9.1 The National Monuments Record was consulted and compared with the HER. No sites of significance or relevance were identified for inclusion in the appraisal.

5.9.2 New records were created in the project database by Trysor for Upper Dredgman Hill farmstead and its field system (ID numbers 54 & 55).

5.10 Each of the records in the final appraisal dataset was assessed for Period, Rarity, Documentation, Group Value¹, as well as Evidential Value, Historical Value, Aesthetic Value, Communal Value². Once these had been considered the significance of each site was determined and scored in accordance with the categories adopted by the Welsh Archaeological Trusts i.e. Nationally Important, Regionally Important, Locally Important, Minor and Features Needing Further Investigation (Unknown). Full details of this exercise are given in Appendix C.

5.11 As this exercise is an appraisal of the study area, not a full desk-based historic environment assessment, no site descriptions have been included in the appraisal dataset or this printed report, apart from newly recorded features (See Appendix B).

¹ Period, Rarity, Documentation and Group Value are criteria defined in the Welsh Office Circular 60/96, 1996.

² Evidential Value, Historical Value, Aesthetic Value and Communal Value are criteria defined in Cadw's Conservation Principles publication, 2011.

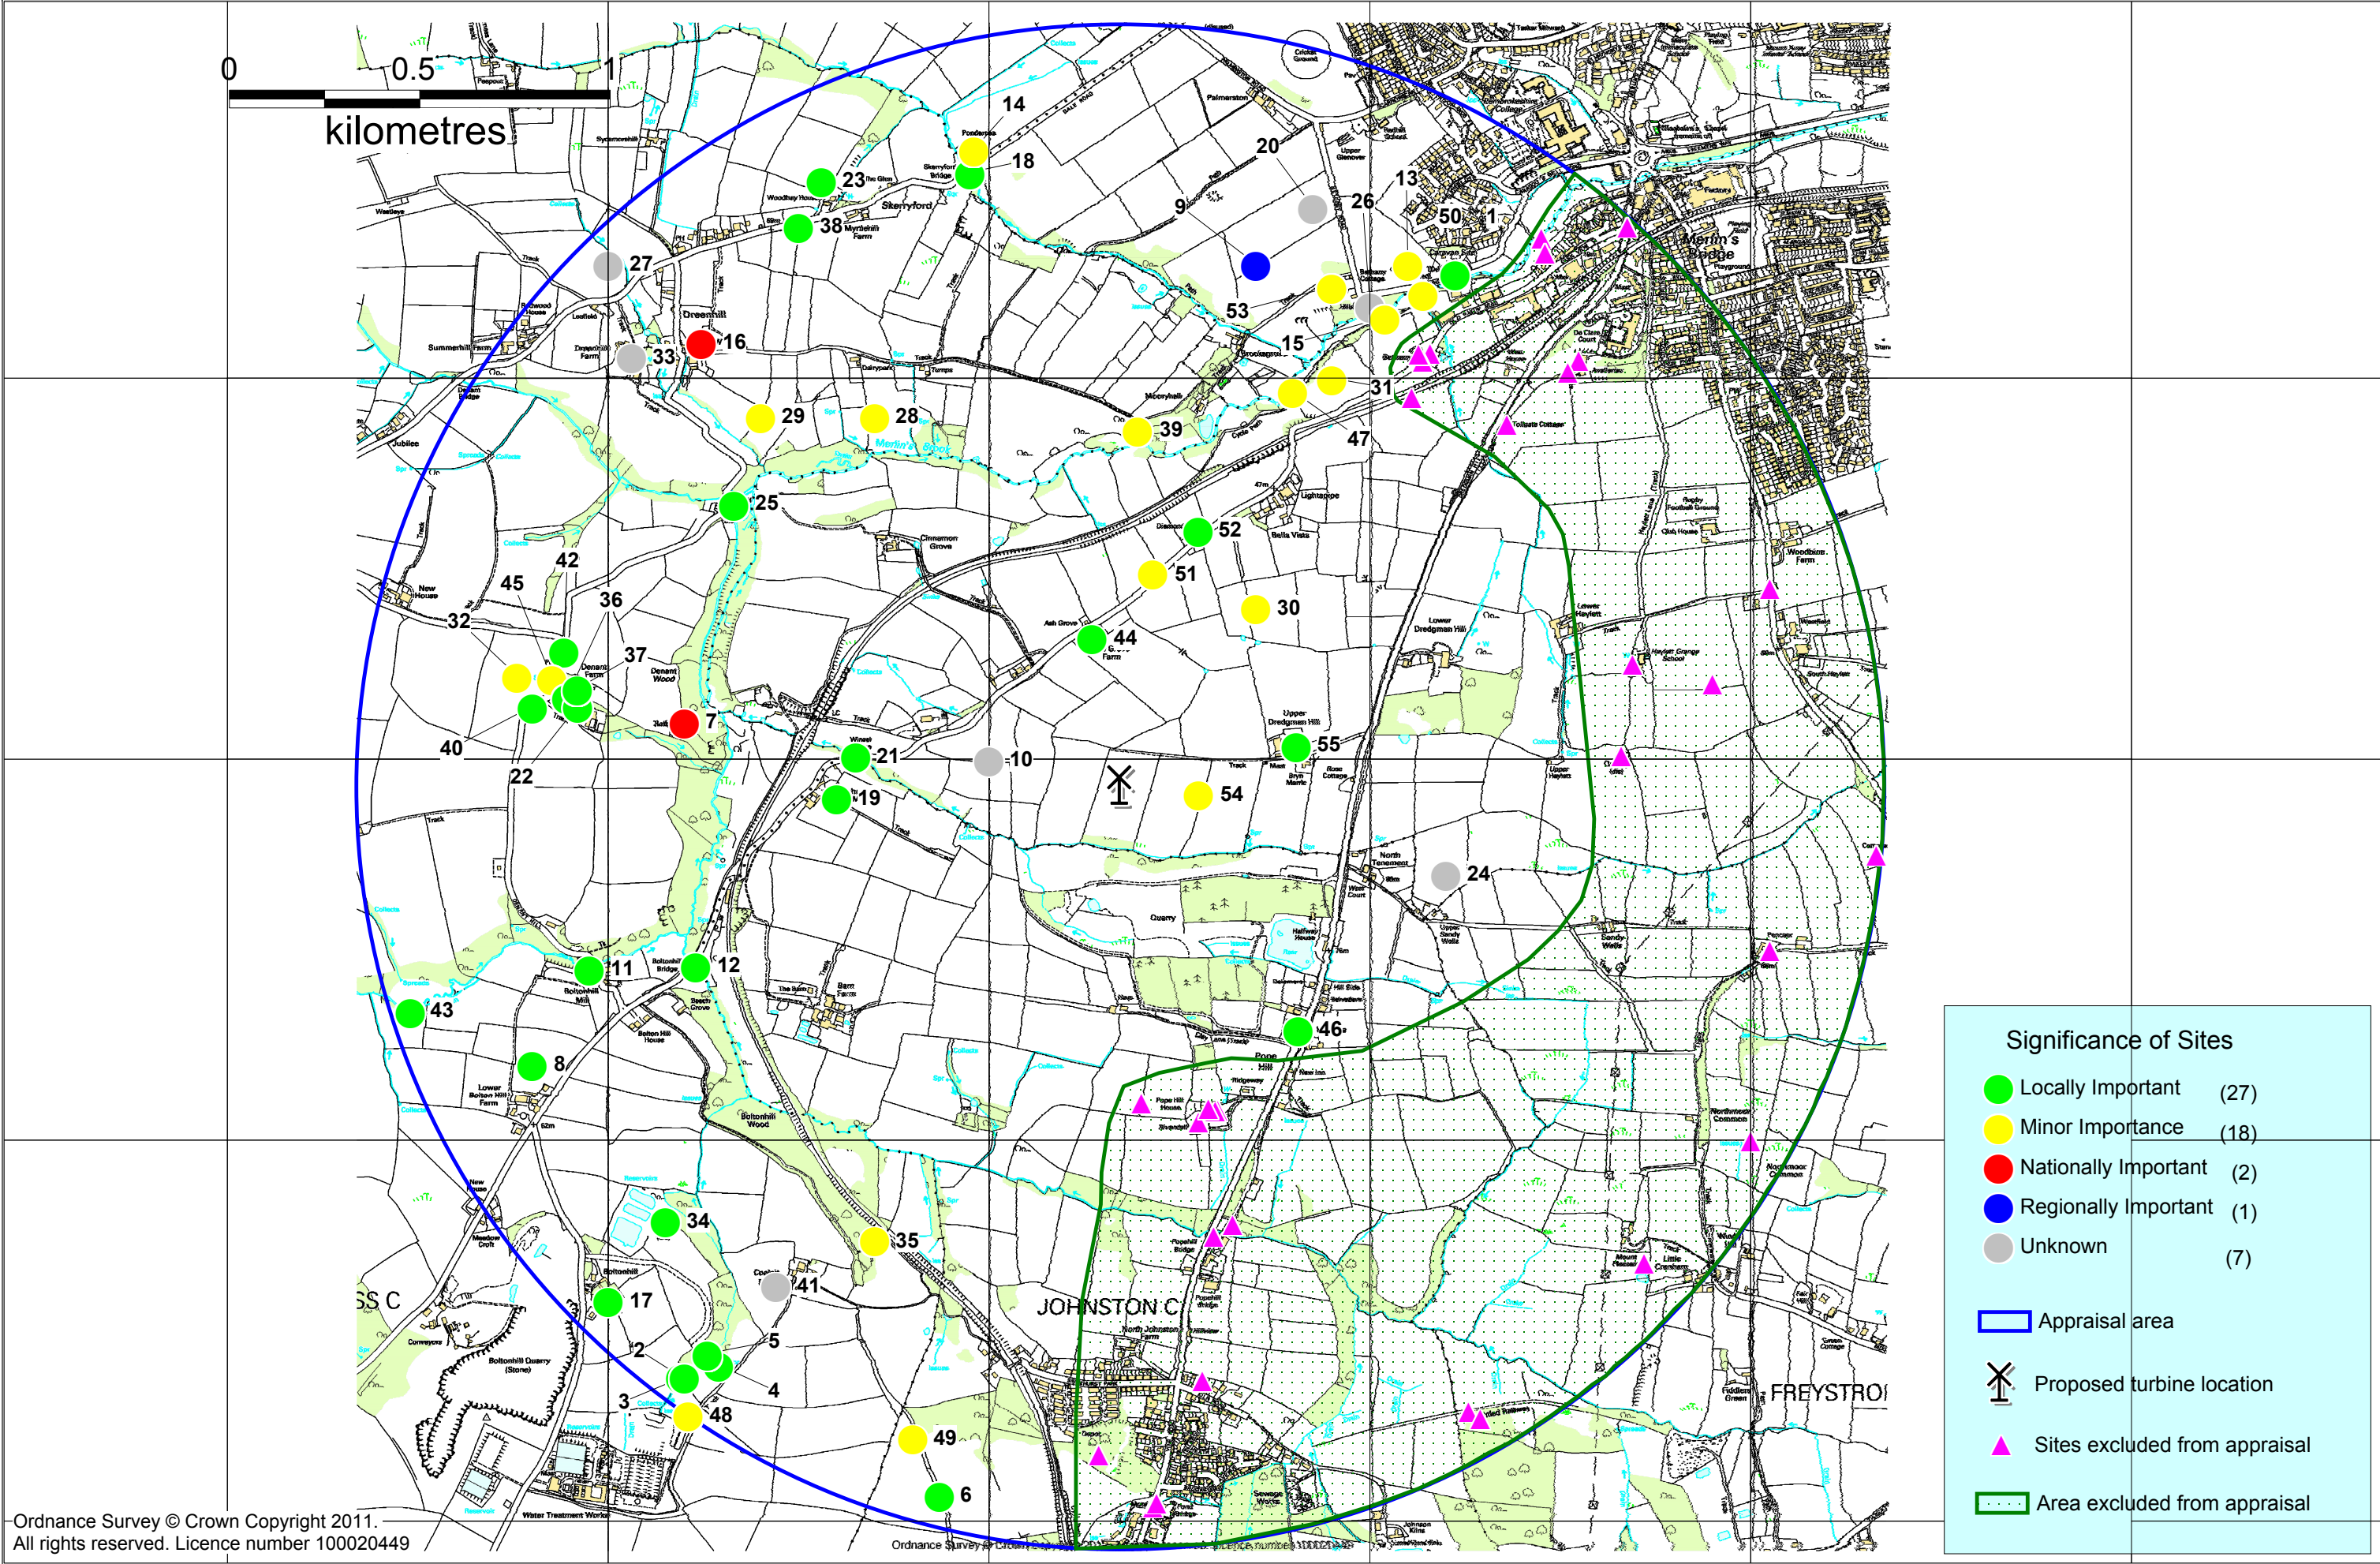

Figure 2: Sites showing significance, labelled with Project ID number

6. Upper Dredgman Hill: Historical overview

6.1 This farmstead is shown on the Ordnance Survey's Original Surveyors Drawing of 1810, but is labelled as Troopers Hill. The map seems to show the farmhouse in its present position, with a small outbuilding detached to its western side.

6.2 The farmhouse has been extended southwards since the early 19th century, but the original house is still discernable. The outbuildings have also been extended to form a courtyard to the western side of the house, but it is possible that the outbuilding shown in 1810 is incorporated into the existing range of outbuildings. Larger, 20th century farm buildings have been added to the west of the courtyard.

6.3 The tithe schedule of 1841 names Thomas Davies as the owner of the farm, and the 1841 census shows that one of several properties grouped under the name "Dredgman Hill" was occupied by a farmer named Daniel Thomas and his family. The 1851 census shows that the same family were still residing here, farming 120 acres, and also naming the property as Upper Dredgman Hill. By the time of the 1890 1:2500 Ordnance Survey map, the name of the property on maps had changed to Upper Dredgman Hill.

6.4 Historic Ordnance Survey and tithe maps show that the field pattern on the farmstead has changed very little since the first half of the 19th century, compare Figures 3 & 4. The rectangular field parcel in which the proposed turbine will stand is field parcel number 97 in Figure 3, showing the tithe map. The field parcels shown on the tithe map are named as follows;

Owner: Thomas Davies

96	West Eight Acres
97	Lower Eight Acres
98	Little Corner Field
99	The Large Eight Acres
100	Middle Eight Acres
101	Higher Eight Acres
102	East Eight Acres
103	Field by Road
104	Field by House
105	Homestead
106	Eleven Acres
107	Crooked Field

The regularity of the field pattern and the sizes of many of the fields may indicate that the field parcels were only defined in earlier post-medieval times.

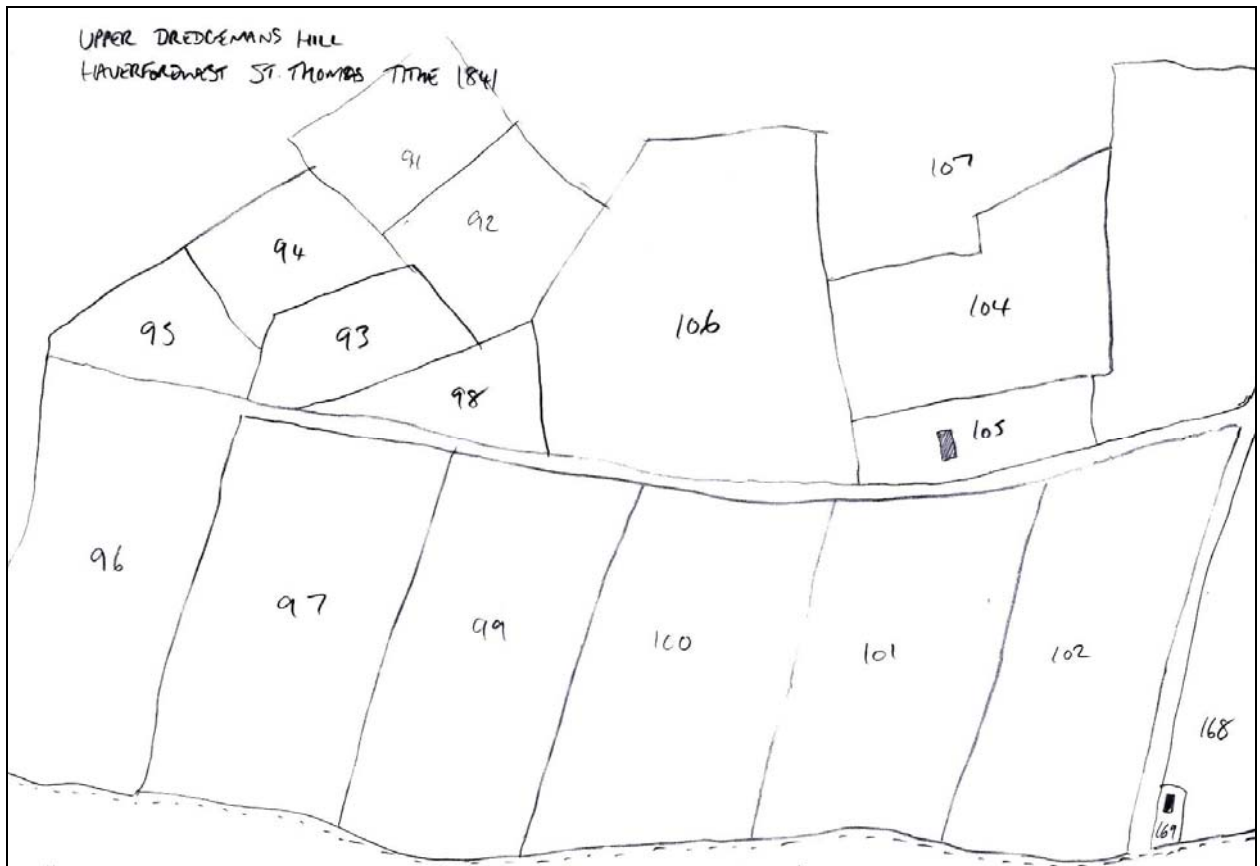

Figure 3: Tithe map

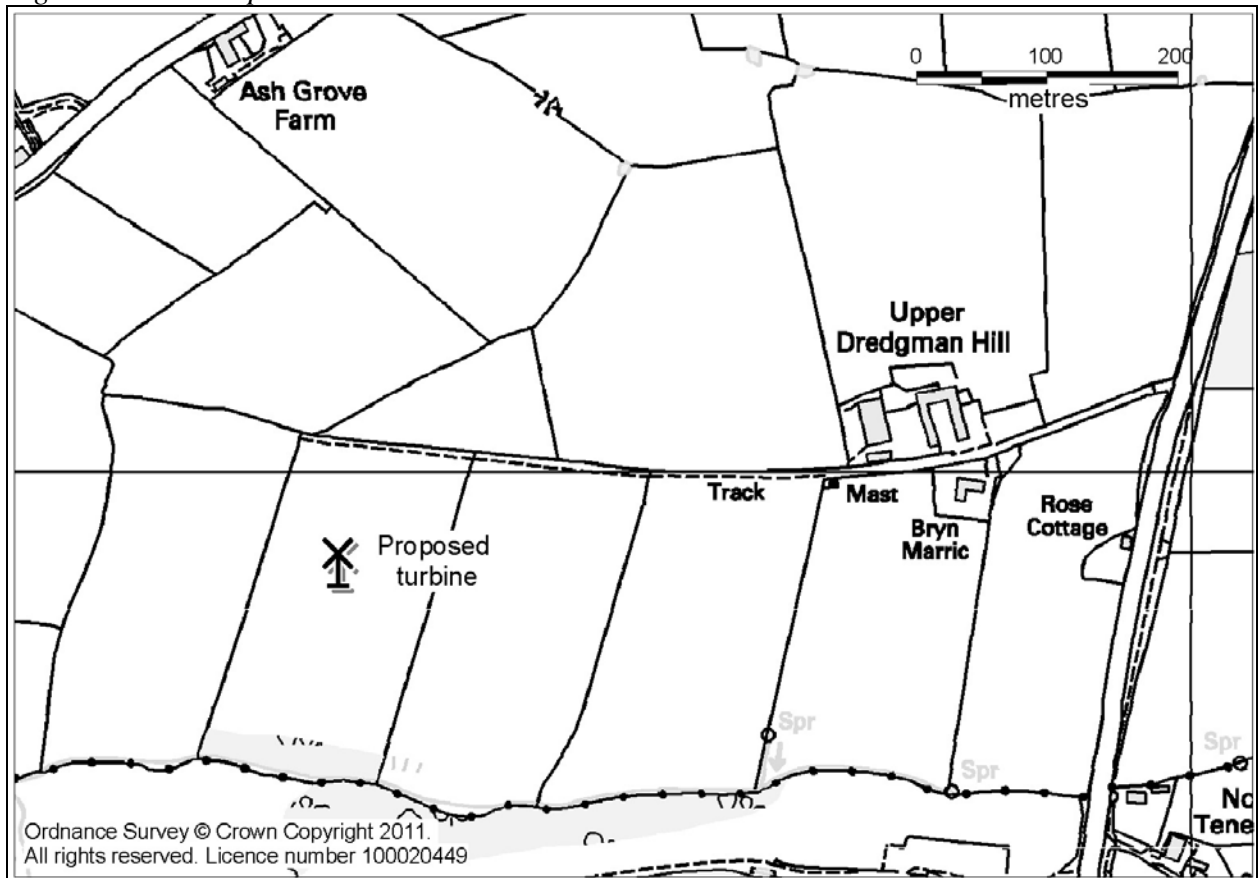

Figure 4: Modern day mapping showing the fields on the tithe map in figure 3.

7. Upper Dredgman Hill Farm: Proposed turbine site

7.1 The proposed turbine at Upper Dredgman Hill is to be located at SM9334512927 in a rectangular pasture field to the west of the farm buildings at Upper Dredgman Hill. The proposed cable trench will run westwards from the turbine to the nearest 3 phase connection.

7.2 When the farm and its environs were visited in May 2013, an assessment was made of the intervisibility of key monuments in the local landscape with the proposed turbine site. The key monuments were the Iron Age hillfort at Denant (ID number 7) and the former chapel at Dreenhill (ID number 16). This assessment was undertaken in good light.

8. Impact Assessment

8.1 Within the revised area a total of 55 sites were recorded in the appraisal database.

8.2 The Direct and Indirect impact on each site was assessed taking into account both physical and non-physical impacts. A full table is found in Appendix A but a summary is tabulated in Table 2 below.

8.3 As Table 1 and Appendix A show, no recorded archaeological sites within the area of the appraisal were determined to be exposed to any significant impact from the proposed turbine development. (Details of the appraisal for direct and indirect impact for each of the sites in Table 1 can be found in Appendix A).

8.4 The precise location and length of the cable trench is not known at this point, but the farmer provided sufficient detail to assist the appraisal. It is known that the trench will run downslope to the west, away from the farm itself. It would appear that it would cut through at least two field boundary banks.

8.5 As the cable trench is likely to be less than 50cm wide, a watching brief would be highly unlikely to throw any light on unknown archaeological features and any disruption of the historic landscape would be minimal. There is no evidence of archaeological features in the area through which the cable trench will pass, and the boundary banks are thought to be of post-medieval date.

8.6 The only mitigation thought necessary in relation to the cable trench is to ensure that the disturbance to the banks and hedges is minimised and any cut through any boundaries should be followed by the restoration of the banks and the replacement of any affected hedgerow.

8.7 An examination of the proposed development site identified no evidence of surface material of archaeological interest. The land was under pasture and generally well-grassed, with very little exposure of the underlying soil surface.

Table 2: Impact on sites within the appraisal area around Upper Dredgman Hill Farm proposed turbine site

9. Historic Landscape Aspects Relating to the Upper Dredgman Hill Proposed Turbine

9.1 The following aspects of the historic environment around the Upper Dredgman Hill proposed turbine site have also been considered by this appraisal, as required by the brief supplied by the Dyfed Archaeological Trust Heritage Management Section (DAT, HM, 2013);

a) Scheduled Ancient Monuments in their settings

There is a single Scheduled Ancient Monument within the appraisal area, Denant hillfort (ID number 7), which will not be affected by the proposed development. The setting of the scheduled site is also unaffected as it lies in thick woodland, hidden from view, at a distance from the development.

b) Non-scheduled Ancient Monuments in their settings

Potential impacts on Non-scheduled Ancient Monuments are included in Appendix A. The significance of Non-scheduled Ancient Monuments is addressed in Appendix C. There are no direct, physical impacts on any of these monuments, other than a Low impact on limited elements of the field system (ID number 55) immediately around the development site. In a small number of instances a Low or Very Low, indirect, visual impact was identified, none of which were considered significant.

c) Listed Buildings in their settings

There is only a single Listed Building within the revised appraisal area. This is the former chapel at Dreenhill (ID number 16). There would only be a low, visual impact, over distance, which would not affect the setting of the listed building, which has itself undergone conversion and no longer survives in its original condition.

d) Non-statutory buildings of local importance

No non-statutory buildings of local importance were identified as being affected by the proposed development.

e) Registered Parks & Gardens and their essential settings.

There are no Registered Parks and Gardens within the overall study area.

f) Registered Historic Landscapes

The development site lies to the west and north of the Milford Haven Area Historic Landscape area. The western edge of the Uzmaston and Boulston Characterisation Area includes Upper Dredgman Hill farmhouse and a field to its eastern side. Those parts of the Milford Haven Area Historic Landscape area which lie to the east and south of the proposed development are largely blocked from view by high ground from Bolton Hill eastwards. Those parts of the Milford Haven Area Historic Landscape area which extends westwards towards Dale are over 5km away, including the Amoco Oil Refinery HLC area, and any view of the proposed turbine would be at such range as to make it inconspicuous and visual impact would be minimal.

g) Non-registered Historic Landscapes

There are no identified non-registered Historic Landscapes within the overall study area.

h) Conservation Area

There are no Conservation Areas within the overall study area.

i) Buried archaeological potential

There is no identifiable buried archaeological potential at the proposed turbine site at Upper Dredgman Hill Farm. A small number of findspots are recorded within the wider appraisal area, the most significant being a Mesolithic flint-working site over 1.5km to the north at Palmerston Farm (ID number 9, PRN 7349). The landscape context at Upper Dredgman Hill, which is high and exposed, is very different to that at Palmerston Farm, which is low and sheltered, therefore there would be no reason to expect comparable features around the proposed development. There is also no surface, map, aerial photographic or documentary evidence suggestive of buried archaeology at the proposed development site.

j) Palaeoenvironmental potential

No palaeoenvironmental potential can be identified at the Upper Dredgman Hill Farm turbine site. It is situated in a pasture field which is relatively well-drained.

k) Hedgerows and field patterns

The proposed development would be located in a pasture field, which seems to have retained its form and boundaries throughout the past 175 years. It is part of a post-medieval field system. The proposed development will not change the character of the field system or have a significant effect on any field boundary banks.

l) Ancient woodland

There are three areas of Ancient and Semi-natural Woodland within the appraisal area. Two are Ancient and Semi-Natural Woodland and one is a Plantation on Ancient Woodland Site. All three lie in the Merlin's Brook valley to the west of the turbine site.

m) Place-names

There are no significant place-names associated with the proposed development site. The field parcel names recorded on the parish tithe map have no archaeological significance.

n) Cumulative impact

Several small turbines were visible from the proposed development site, most of these were at considerable distance to the north, over 7km away. The nearest is relatively small, single turbine, 4.2km to the northwest. The oil refineries of the Milford Haven area are mostly visible from the proposed development site, well over 5km to the southwest.

n) Newly identified sites of historic importance

The only newly recorded sites of historic importance recorded for this appraisal were that of Upper Dredgman Hill farmstead (ID number 54) and its associated field system (ID number 55). The details of these sites are included in Appendices A & C.

10. Conclusion

10.1 There would not be a significant impact on the historic environment or on individual historic assets in relation to the proposed development of the proposed wind turbine at Upper Dredgman Hill Farm, Haverfordwest.

10.2 No sites have been found to be likely to be exposed to moderate or high impact, either in terms of direct physical or indirect visual impact. Most sites which would experience any impact at all would only be exposed to low, indirect visual impact, generally over distances of a kilometre or more.

10.3 Only the field boundaries in immediate proximity to the development would experience a physical impact, in relation to the cutting of a narrow cable trench, but this would be at a very low level and remedial measures could easily remove all traces of impact.

10.4 On the basis of this appraisal, no archaeological mitigation is thought necessary in relation to the excavation of the turbine base or the cable trench.

11. Reporting

11.1 Copies of this report will be provided to the client and the Regional Historic Environment Record.

Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None No archaeological feature is recorded in association with this placename.

=====

ID number: 30
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None No archaeological features are associated with this record.

=====

ID number: 31
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None Not intervisible with the proposed development site, but there is no known archaeological feature here.

=====

ID number: 32
Is there a Direct Impact: No
Is there an Indirect Impact: No The feature is not thought to be an antiquity and is not intervisible with the proposed development site.
Overall Impact: None

=====

ID number: 33
Is there a Direct Impact: No
Is there an Indirect Impact: No The stone no longer appears to exist
Overall Impact: None The stone seems to have been removed

=====

Upper Dredgman Hill, Haverfordwest, Pembrokeshire, Historic Environment Appraisal

ID number: 34
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None

Not intervisible with the proposed development, 1.65km to the northeast, due to being sheltered from view by woodland.

=====

ID number: 35
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None

This ruined cottage is not intervisible with the proposed development.

=====

ID number: 36
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None

It appears that the house and farm buildings are not intervisible with the development site, over 1.4km away, as a wooded area lies between them.

=====

ID number: 37
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None

It appears that the house and farm buildings are not intervisible with the development site, over 1.4km away, as a wooded area lies between them.

=====

ID number: 38
Is there a Direct Impact: No
Is there an Indirect Impact: Yes
Overall Impact: Very Low

The site may be intervisible with the proposed development at a distance
 Intervisible with the proposed development at 1.7km distance.

=====

ID number: 39
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None

The quarry is overgrown and would not be intervisible with the proposed development site.

Upper Dredgman Hill, Haverfordwest, Pembrokeshire, Historic Environment Appraisal

ID number:	40	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	It appears that the house and farm buildings are not intervisible with the development site, over 1.4km away, as a wooded area lies between them.
=====		
ID number:	41	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	No archaeological feature is associated with this record.
=====		
ID number:	42	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	Not intervisible with proposed development site.
=====		
ID number:	43	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	A slight rise in the land and tree cover probably block the view northeastwards towards to proposed development, nearly 2km away.
=====		
ID number:	44	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	Low	The proposed turbine would be on the hill 400m to the south. The former farmstead has a northwestern aspect however and faces away from the turbine. Its setting has already been heavily modified.
=====		
ID number:	45	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	This structure no longer survives and its site is not intervisible with the development.
=====		

Upper Dredgman Hill, Haverfordwest, Pembrokeshire, Historic Environment Appraisal

ID number:	46	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	The chapel no longer exists.
=====		
ID number:	47	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	Not intervisible with the proposed development site.
=====		
ID number:	48	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	It is thought that woodland and scrub growth block view towards proposed development to the northeast.
=====		
ID number:	49	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	This dwelling had been destroyed before the late 19th century.
=====		
ID number:	50	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	None	Not intervisible with the proposed development site
=====		
ID number:	51	
Is there a Direct Impact:	No	
Is there an Indirect Impact:	No	
Overall Impact:	Very Low	The proposed turbine would be visible some 600m to the south, but mostly shielded from view by an intervening hedgerow.
=====		

Upper Dredgman Hill, Haverfordwest, Pembrokeshire, Historic Environment Appraisal

ID number: 52
Is there a Direct Impact: No
Is there an Indirect Impact: Yes
Overall Impact: Very Low

This dwelling faces the proposed development site 700m to the southwest, but will be screened from view by trees close to the house and also the hill, but might have winter views of the turbine blades

=====

ID number: 53
Is there a Direct Impact: No
Is there an Indirect Impact: No
Overall Impact: None

The quarry has been infilled and the site reused.

=====

ID number: 54
Is there a Direct Impact: Yes
Is there an Indirect Impact: Yes
Overall Impact: Low

The cable leading west from the turbine will be taken through one of the field banks
The turbine will stand within the field system
Although the turbine will be within the turbine, it will have little direct impact.

=====

ID number: 55
Is there a Direct Impact: No
Is there an Indirect Impact: Yes
Overall Impact: Very Low

The turbine will be visible from the farmhouse and buildings, but will not affect its setting.

=====

Appendix B: Written Descriptions Of Newly Recorded Archaeological Sites

Upper Dredgman Hill, Haverfordwest, Pembrokeshire, Historic Environment Appraisal

ID number: 54 UPPER DREDGMAN HILL FIELD SYSTEM
HER PRN: **NMR NPRN:** 0
NGR: SM9355012910 Grid reference taken at centre of site
Broadclass: AGRICULTURE AND SUBSISTENCE
Period: Post Medieval
Form: Earthwork **Condition:** Intact
Site Status: **SAM number:** **LB number:** 0 **grade:**
Description: The field system associated with Upper Dredgman Hill appears to be relatively unchanged since the time of the St. Thomas parish tithe map of the early 1840s. The field parcels are mostly large and regular in form, defined by earthwork boundary banks, set with hedges composed mostly of blackthorn and hawthorn. The boundary banks are up to 1 metre high and 2 metres wide at base, with generally rounded profiles, though sometimes steep-sided.
Significance: Minor Importance

=====

ID number: 55 UPPER DREDGMAN HILL FARMSTEAD
HER PRN: **NMR NPRN:** 0
NGR: SM9380713037 Grid reference taken at centre of site
Broadclass: AGRICULTURE AND SUBSISTENCE
Period: Post Medieval
Form: Complex **Condition:** V
Site Status: **SAM number:** **LB number:** 0 **grade:**
Description: This farmstead is shown on the Ordnance Survey's Original Surveyors Drawing of 1810, but was at that time known as Troopers Hill. It would appear that this map shows the farmhouse in its present position, with a small outbuilding detached to its western side. The house has been extended southwards since the early 19th century, but the original house is still discernable. The outbuildings have also been extended to form a courtyard to the western side of the house, but it is possible that the building shown in 1810 is incorporated into the existing range of outbuildings. Larger, 20th century farm buildings have been added to the west of the courtyard.

The tithe schedule of 1841 names Thomas Davies as the owner of the farm, and the 1841 census shows that one of several properties grouped under the name "Dredgman Hill" was occupied by a farmer named Daniel Thomas and his family. The 1851 census shows that the same family were still residing here, farming 120 acres, and also naming the property as Upper Dredgman Hill. By the time of the 1890 1:2500 Ordnance Survey map, the name of the property had changed to Upper Dredgman Hill.

The core of the farmstead occupies the flanks and crest of a block of high ground, which runs east to west, which is known as Dredgman Hill. This hill rises to 88 metres in height, close to the farmyard, giving excellent views northwards across Haverfordwest and towards the Preseli Hills.

Significance: Locally Important

NGR: SM92701174 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** DOMESTIC
Form: Documents **Condition:** Unknown
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER
Documentation:
Group Value: None
Evidential Value: Historic mapping only
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 36 DENANT FARMSTEAD
HER PRN: 50789 **NMR NPRN:**
NGR: SM91891213163 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** AGRICULTURE AND SUBSISTENCE
Form: Building **Condition:** Near Intact
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER; Jones, F., 1996, Historic Houses of Pembrokeshire and their Families, p.53-54. Brawdys Books
Documentation:
Group Value: An historic farmstead complex
Evidential Value: Complex of standing buildings
Historical Value: Described by Major Francis Jones in Historic Houses of Pembrokeshire
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 37 DENANT DWELLING
HER PRN: 50788 **NMR NPRN:** 96121
NGR: SM9191913185 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** DOMESTIC
Form: Building **Condition:** Intact
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Not rare
Reference: Regional HER; Jones, F., 1996, Historic Houses of Pembrokeshire and their Families, p.53-54. Brawdy Books
Documentation:
Group Value: Part of a historic farmstead complex
Evidential Value: Standing building
Historical Value: Described by Major Francis Jones in Historic Houses of Pembrokeshire
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 38 SKERRYFORD FIELD BOUNDARY?
HER PRN: 50787 **NMR NPRN:**
NGR: SM92501440 Grid reference taken at point along linear site
Period: Unknown **Broadclass:** MONUMENT <BY FORM>
Form: Earthwork **Condition:** Damaged
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Unknown
Reference: Regional HER
Documentation:
Group Value: Unknown
Evidential Value: Slight earthwork
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 39 MOORYHALL QUARRY
HER PRN: 17777 **NMR NPRN:**
NGR: SM9339013865 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** INDUSTRIAL
Form: Earthwork **Condition:** Unknown
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference:
Documentation:
Group Value: None
Evidential Value: Disused quarry
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 40 DENANT CART SHED
HER PRN: 50785 **NMR NPRN:**
NGR: SM9180113139 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** TRANSPORT
Form: Building **Condition:** Near Intact
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Not rare
Reference: Regional HER; Jones, F., 1996, Historic Houses of Pembrokeshire and their Families, p.53-54. Brawdys Books
Documentation:
Group Value: Part of a historic farmstead complex
Evidential Value: Standing building
Historical Value: Described by Major Francis Jones in Historic Houses of Pembrokeshire
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 41 COALPIT PARK COAL MINE?
HER PRN: 17805 **NMR NPRN:**
NGR: SM92441162 Unknown
Period: Post Medieval **Broadclass:** INDUSTRIAL
Form: Place-name **Condition:** Unknown
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER
Documentation:
Group Value: Possibly one of many workings in local coalfield area
Evidential Value: Place name only
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Unknown

ID number: 42 DENANT GARDEN WALL
HER PRN: 50783 **NMR NPRN:**
NGR: SM9188413285 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** GARDENS PARKS AND URBAN SPAC
Form: Other structure **Condition:** Intact
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Not rare
Reference: Regional HER
Documentation:
Group Value: Part of a historic farmstead complex
Evidential Value: Possibly a standing structure
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 43 BOLTONHILL MILL LEAT LEAT
HER PRN: 50782 **NMR NPRN:**
NGR: SM91481234 Grid reference taken at point along linear site
Period: Post Medieval **Broadclass:** WATER SUPPLY AND DRAINAGE
Form: Other structure **Condition:** Damaged
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Not rare
Reference: Regional HER
Documentation:
Group Value: Associated with Boltonhill Mill
Evidential Value: Partial survival as an earthwork feature
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 44 ASH GROVE FARM FARMSTEAD
HER PRN: 22370 **NMR NPRN:**
NGR: SM93271332 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** AGRICULTURE AND SUBSISTENCE
Form: Building **Condition:** Restored
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER;
Documentation:
Group Value: None
Evidential Value: Standing building, now converted and non-agricultural
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 45 DENANT PUMP HOUSE
HER PRN: 50786 **NMR NPRN:**
NGR: SM9185213213 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** WATER SUPPLY AND DRAINAGE;IN
Form: Building **Condition:** Near Destroyed
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Not rare
Reference: Regional HER;
Documentation:
Group Value: Part of a historic farmstead complex
Evidential Value: Documents only
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 46 HOREB CHAPEL CHAPEL
HER PRN: 17948 **NMR NPRN:**
NGR: SM9381212291 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** RELIGIOUS RITUAL AND FUNERAR'
Form: Building **Condition:** Destroyed
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER
Documentation:
Group Value: None
Evidential Value: Historic mapping only
Historical Value: None
Aesthetic Value: None
Communal Value: Former place of worship
Significance: Locally Important

ID number: 47 MERLINS BROOK WEIR
HER PRN: 43509 **NMR NPRN:**
NGR: SM9379713967 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** WATER SUPPLY AND DRAINAGE
Form: Other structure **Condition:** Near Destroyed
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER;
Documentation:
Group Value: None
Evidential Value: Slight remains noted in 2001
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 48 BOLTONHILL DWELLING
HER PRN: 37413 **NMR NPRN:**
NGR: SM92211128 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** DOMESTIC
Form: Earthwork **Condition:** Near Destroyed
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER;
Documentation:
Group Value: None
Evidential Value: Slight remains recorded in 1999
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 49 JOHNSTON MOOR DWELLING
HER PRN: 37414 **NMR NPRN:**
NGR: SM92801122 Unknown
Period: Post Medieval **Broadclass:** DOMESTIC
Form: Documents **Condition:** Destroyed
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER
Documentation:
Group Value: None
Evidential Value: Historic maps only
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 50 MERLINS BROOK BRIDGE BRIDGE
HER PRN: 43096 **NMR NPRN:**
NGR: SM9414014220 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** TRANSPORT
Form: Other structure **Condition:** Damaged
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER;
Documentation:
Group Value: None
Evidential Value: Standing structure
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 51 UNKNOWN DWELLING
HER PRN: 43507 **NMR NPRN:**
NGR: SM9343013490 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** DOMESTIC
Form: Building **Condition:** Near Destroyed
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER
Documentation:
Group Value: None
Evidential Value: Slight ruins only survive
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 52 DIAMOND HILL DWELLING
HER PRN: 43508 **NMR NPRN:**
NGR: SM9354913603 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** DOMESTIC
Form: Building **Condition:** Unknown
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER;
Documentation:
Group Value: None
Evidential Value: Standing building
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Locally Important

ID number: 53 HILLSIDE QUARRY
HER PRN: 17824 **NMR NPRN:**
NGR: SM93901424 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** INDUSTRIAL
Form: Earthwork **Condition:** Unknown
Site Status: **SAM number:** **LB number:** **grade:**
Rarity: Common
Reference: Regional HER
Documentation:
Group Value: None
Evidential Value: Historic maps only
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 54 UPPER DREDGMAN HILL FIELD SYSTEM
HER PRN: **NMR NPRN:** 0
NGR: SM9355012910 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** AGRICULTURE AND SUBSISTENCE
Form: Earthwork **Condition:** Intact
Site Status: **SAM number:** **LB number:** 0 **grade:**
Rarity: Common
Reference:
Documentation:
Group Value: Associated with the farmstead, and surrounding fields
Evidential Value: The fields as shown on the tithe map are still intact
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Minor Importance

ID number: 55 UPPER DREDGMAN HILL FARMSTEAD
HER PRN: **NMR NPRN:** 0
NGR: SM9380713037 Grid reference taken at centre of site
Period: Post Medieval **Broadclass:** AGRICULTURE AND SUBSISTENCE
Form: Complex **Condition:** V
Site Status: **SAM number:** **LB number:** 0 **grade:**
Rarity: Common
Reference: Haverfordwest St. Thomas Parish Tithe Schedule, 1841;
Documentation:
Group Value: None
Evidential Value: Farmstead is still in use
Historical Value: None
Aesthetic Value: None
Communal Value: None
Significance: Locally Important
