BASELINE 1994

PRN: 18584

C

LAND MANAGEMENT:

SITE: Grazing of dairy cattle. Field not ploughed recently due to wetness.

Appears well managed - not overgrazed and little damage to ward by poaching etc.

HALO:

D

DESCRIPTION/CONDITION OF MONUMENT:

Very slight variation in ground contours. No real discernable pattern or shape. Continuous grass cover.

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

None at present. Land is well managed, there is no scrub encroachment and field is too wet for cultivation. Any damage has probably already taken place since feature is not visible.
