LAND COVER:
SITE: Improved grassland.
HALO:

**PRESELI ESA, HISTORIC MONITORING**

**BASELINE 1994**

**PRN: 2393**

**C**

**LAND MANAGEMENT:**

**SITE:** Used for grazing, no livestock present when visited. Continuous green cover no scrub etc. Has been down to green

**HALO:** for at least 20 years according to farmer.

**D**

**DESCRIPTION/CONDITION OF MONUMENT:** No immediately obvious feature evident. Field does appear to be on two distinct levels with a slight bank ~ 1m high dividing the areas. There may be a suggestion of a circular bank?, and perhaps linear furrows (as in old field systems (strip + furrows)) although there may be natural or caused by drainage works in the past. No obvious feature on air photos.

**E**

**POTENTIALLY THREATENING FACTORS: (see Table 1)**

Site was very wet when visited and poaching is a potential problem.
