OS 1:10000 SHEET: SM/SN 81NE	GRID REF: SM/SN 8990 1590
PRN: 9815 SITE NAME: BERRY HILL CAMP	
AIR PHOTO No 55/92/259 No GROUND PHOTOS: 4	LANDSCAPE TYPE: C
DATE SURVEYED: 9/11/94	SURVEYED BY: G.A. HOOD
ACCESS: Common LAND. Access along B4341 from Haverfordwest to Portfield Gate. Follow minor road to Sutton and rough track to Grid ref: 898159.	

B

LAND COVER:
SITE: Dense gorse + bracken.
HALO: Predominantly bracken over grass which may have been improved. Woody scrub / broadleaf trees along stream at northern edge of site.

BASELINE 1994

PRN: 9815

C

LAND MANAGEMENT:

SITE: Used as common land grazing. Horses present when wintered.

HALO: As above.

D

DESCRIPTION/CONDITION OF MONUMENT:

No obvious feature present at given location although ~~more~~ dense growth of gorse may be obscuring monument. A small section of brack? is visible but it is not clear whether this is related to the monument in question. (see photo 4).

E

POTENTIALLY THREATENING FACTORS: (see Table 1)

From conversation with local landowner - common has been managed. Bracken is cut and gorse cut and burnt. Grazing appears to be variable in intensity - some evidence of rabbit digging. Given that exact location of monument is uncertain it is difficult to assess those factors which may be directly threatening.
