Hi Alison

I've been doing end of year housekeeping and realised that there are some consultations which have been missed, I do apologise for the delay.

Thank you for your screening request. I have checked your proposals against the regional Historic Environment Record and other sources and there are no recorded Historic Environment Features within this consultation area.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can be provided as required.

If you require any more information or guidance please get in touch.

Best wishes

Alice

Dear Alice

I am currently preparing a 0.5ha Morewoods scheme for Woodland Trust for the site noted below and would be grateful for any information that may impact the landowners plans for planting.

GR SM930366 / SA659PY Land at Manorowen, Fishguard – 0.5ha native woodland copses – although a rectangular area is mapped below, planting will be in groups of trees with shrubby edges dotted through this – approx. 500 trees and shrubs in total planted as approx. 5 small irregular edged copses with open ground between that will be left to naturalise.

Kind regards

Alison Wheeler
