Dear Peter,

Apologies for the delay and thank you for your screening request. I have checked your proposals against the regional Historic Environment Record and other sources and there are no recorded Historic Environment Features within this consultation area.

There is always the possibility for previously unknown remains to survive within this area of which we have no knowledge. Should further archaeological features or finds be identified it is important that Dyfed Archaeological Trust Heritage Management is informed and further information and advice can be provided as required.

If you require any more information or guidance please get in touch.

Best wishes

Alice

Subject: Llanwrda railway structure

Hi Alice

We're planning a fish passage easement scheme at Llanwrda railway bridge (SN7169531226) scheduled for delivery in summer 2024. The works involve prebarrages to raise water levels at the base of the weir, replacing existing baulks to increase water depth over bridge apron, and installation of a eel/lamprey pass through the true right baulk. I've attached designs and method statement. The image below shows materials drop off point, access route, site compound and works footprint.

I've had a look and Archwilio and cant see any historic environment records in the area that would be affected. Can you confirm this is the case?

Thanks
Peter
