Subject: RE: Screening Advice Note - Havan Metal Mine Site remediation

Dear Dayne,

Thank you for asking Dyfed Archaeological Trust to comment on the Environmental Screening Advice Note for Havan Metal Mine Remediation. As your document notes this site is an historic metal mine and consists of a complex of historic features as well as the Scheduled Monument of Carn Owen (CD045) nearby, see map below. Due to the potential for proposed works to impact on these historic features we recommend that an archaeological desk-based assessment (DBA) and accompanying walkover survey should be undertaken and this will help inform the scope of further archaeological mitigation required for the scheme. The DBA should adhere to the standards and guidance provided by the Chartered Institute for Archaeologists (CIfA) (2014, updated 2020 <https://www.archaeologists.net/codes/cifa>). Cadw must be consulted on any works which impact the scheduled monument or its setting.

I hope these comments are helpful, but please get back to me if you wish to discuss further,

Alice

Apologies, could you send the response for the below screening and the Van mine screening I consulted on directly to Dayne (cc'd)

Many thanks
Josh

Hi Alice,

Would it be possible to chase the below screening please?
Much appreciated

Josh

Hi Alice,

Hope all is well with you.

As per the MoU, I am seeking a historic environment screening for the attached Screening Advice Note – this sets out briefly the location and potential scope of works for this project.

Please do let me know if you require any additional information to make your screening

Many thanks
Josh
